P/C Insurance Overview & Outlook: Outline

- **P/C Financial Overview & Outlook in the Post-COVID, High-Inflation Era**
  - Premium Growth
  - CAT Loss Update/Reinsurance
  - SC Personal Auto Overview
  - Underwriting Performance
  - Capital and Capacity
- **Economic Overview & Outlook—Impacts for P/C Insurers**
  - Growth, Employment, Inflation and Recession
  - Investment Environment
- **Inflation: Where it Is Headed & What It Means for P/C Insurers**
  - Impacts on claim severities and loss ratios
  - Cost Drivers for P/C insurers and impact on rates
  - Long-term inflation considerations
- **Legal System Abuse/Social Inflation: Another Major Driver of Cost**
- **Summary and Q&A**

P/C Insurance Industry Financial Overview & Outlook:

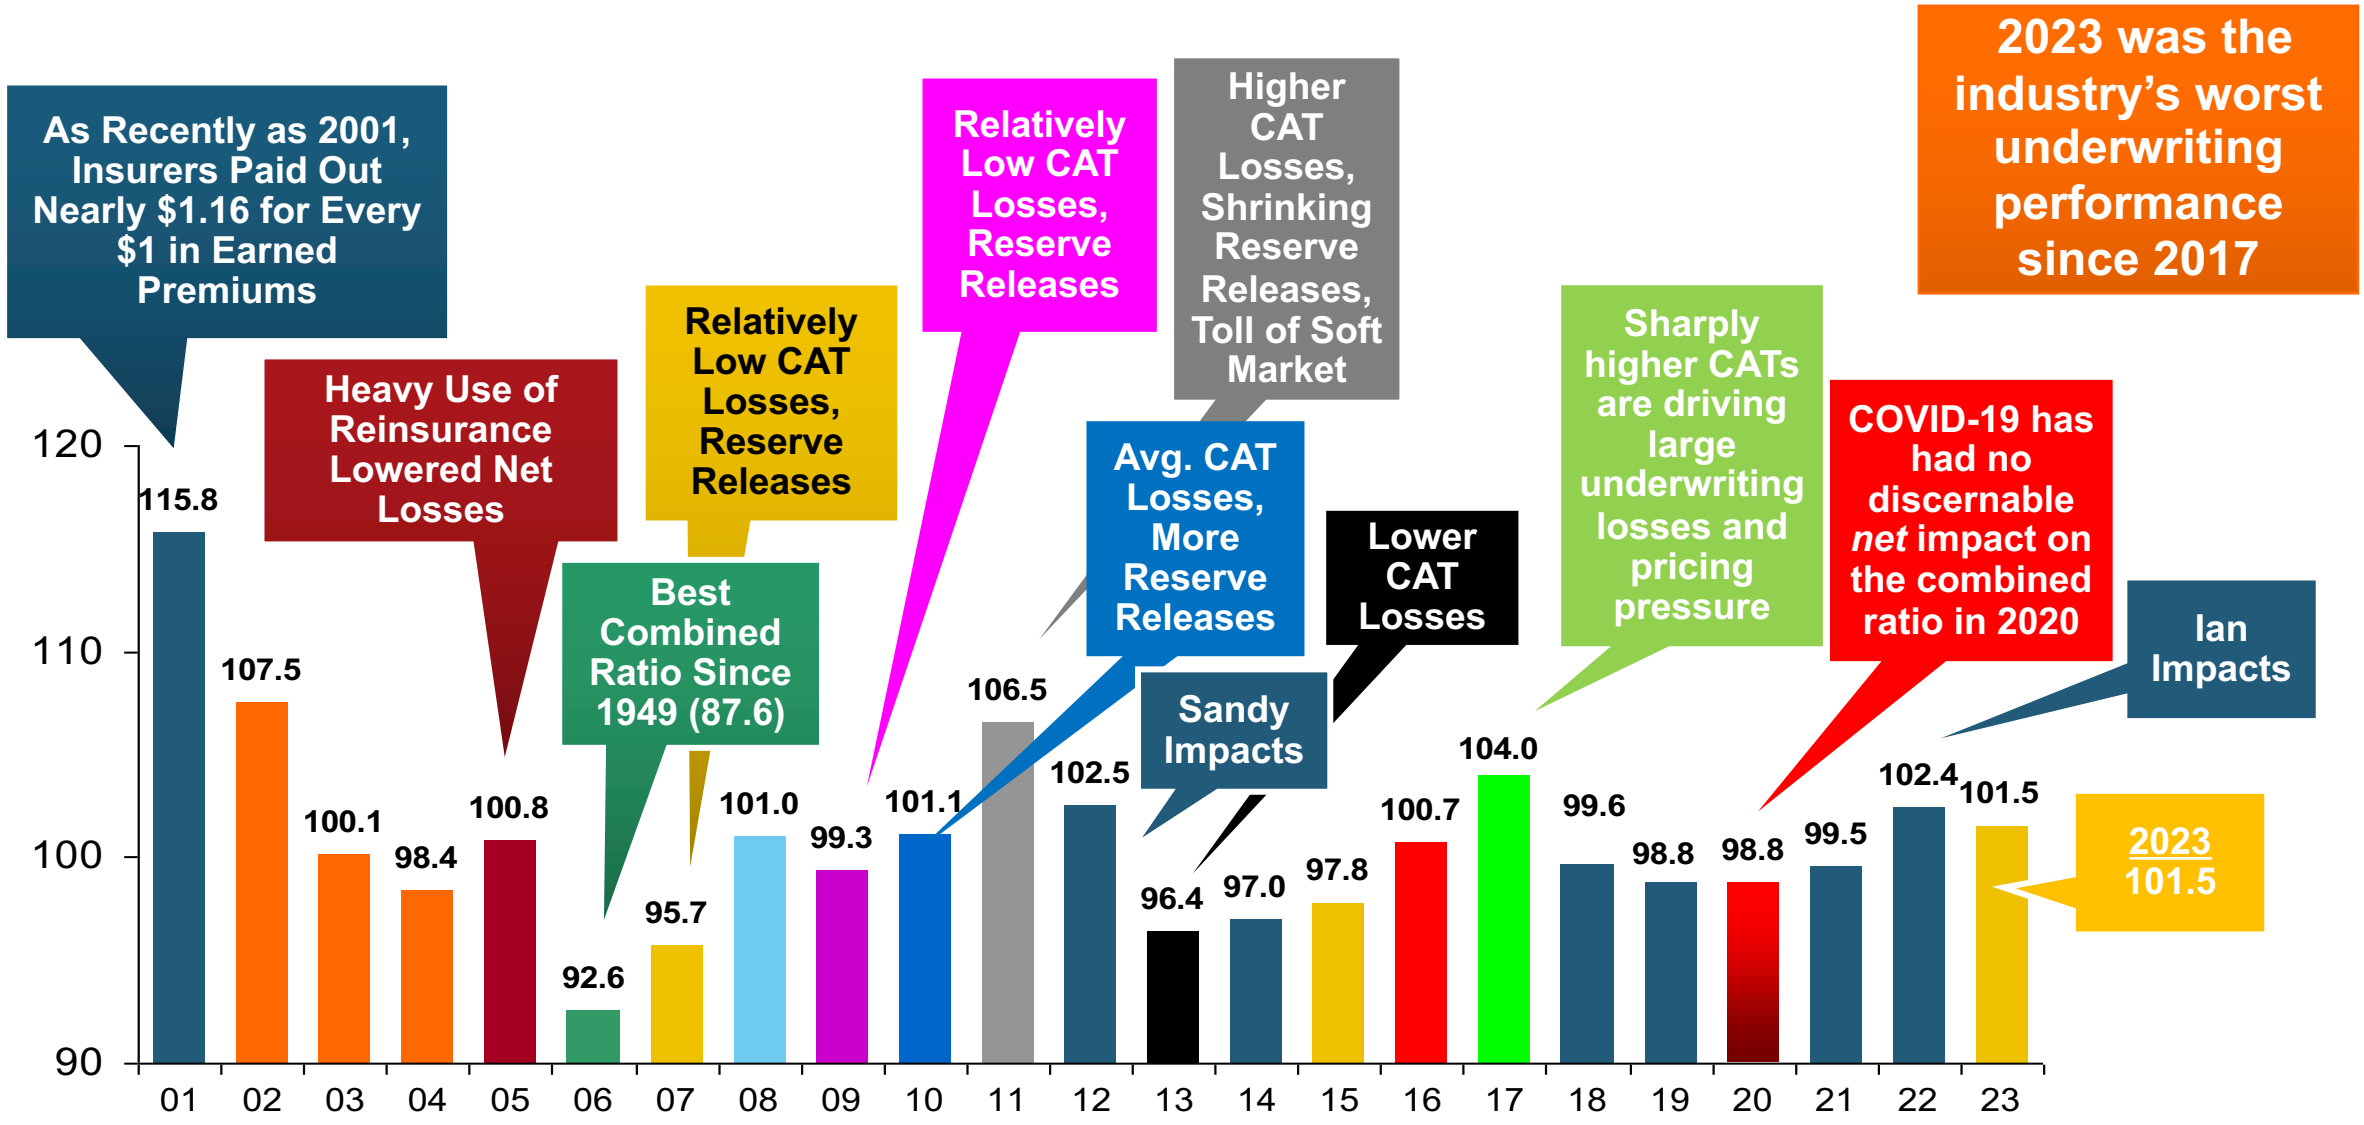
Challenges Amid Inflation and Higher Interest Rates

The Current Economic Environment Presents Many Challenges for P/C Insurers

Industry Remains Strong

3

P/C Insurance Industry Combined Ratio, 2001–2023*



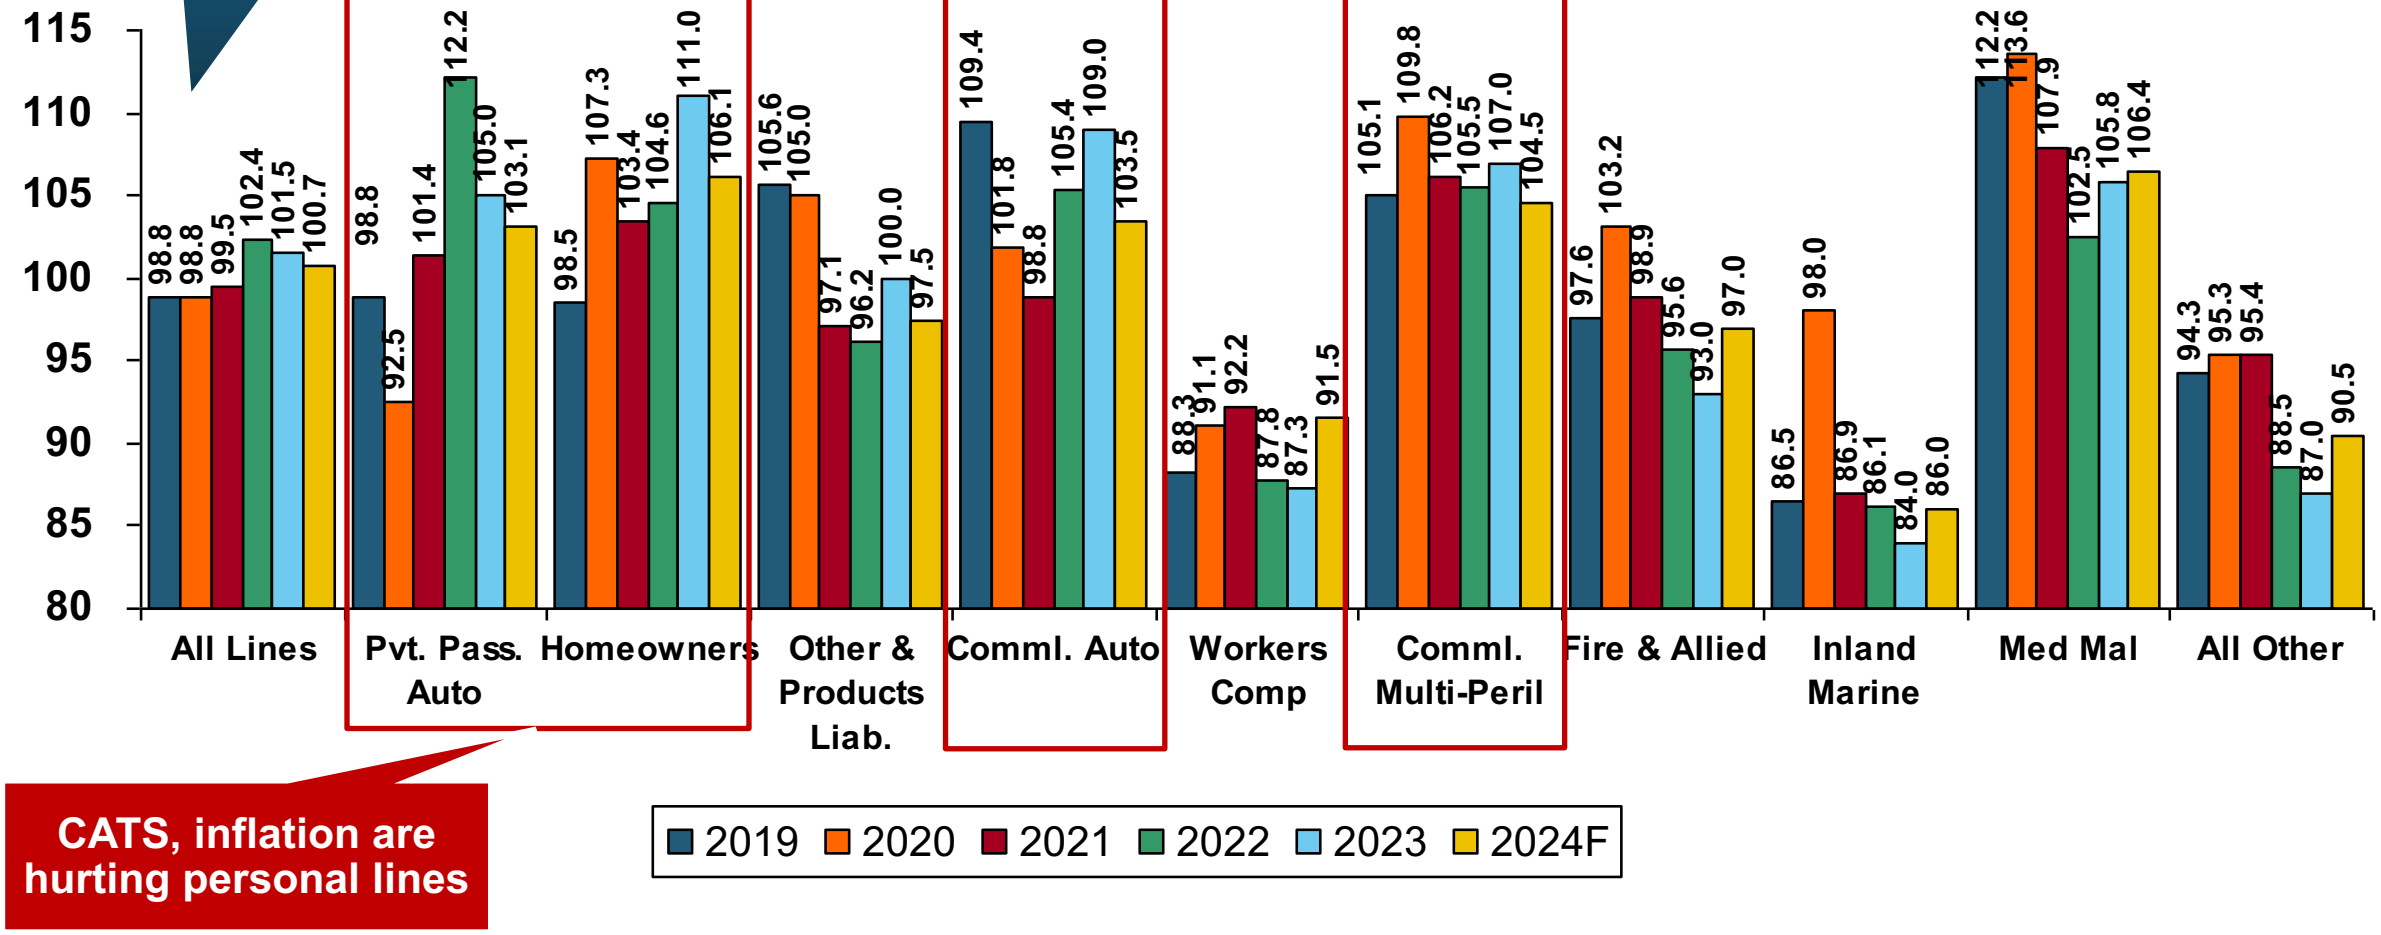
*Excludes Mortgage & Financial Guaranty insurers 2008–2014.
Sources: A.M. Best, ISO (2014-2023).

Combined Ratios by Line: 2019 – 2024F*

High CAT losses and inflation are pushing up combined ratios

Commercial Auto, MP have struggled amid inflation, CATs

Lingering inflation will continue to pressure combined ratios in 2024



CATS, inflation are hurting personal lines

Source: A.M. Best *Review & Preview* (2019-2022; 2024 forecasts as of Mar. 2024); A.M. Best data for 2023 (as of 6/24). Univ. of South Carolina, Risk and Uncertainty Management Center.

P/C Insurance Industry Combined Ratio, 2016–2025F

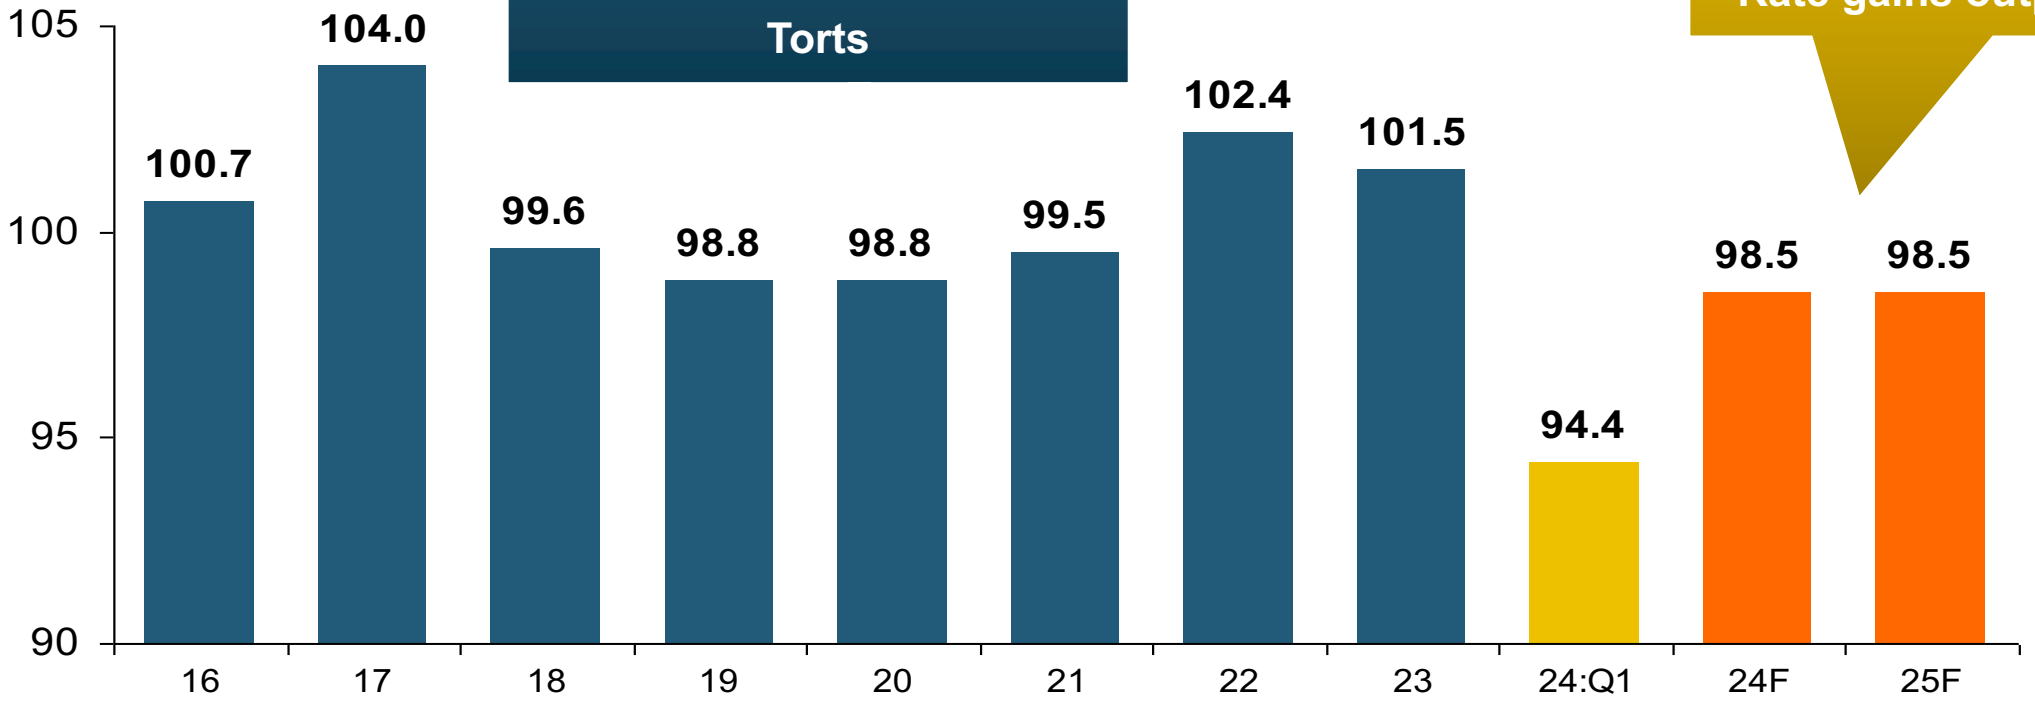
P/C insurer underwriting performance has been highly variable over the past decade, largely due to:

- CATs
- Inflation
- Torts

Significant improvement expected in P/C underwriting performance in 2024/25—led by Personal Lines and especially Personal Auto

DRIVERS

- Inflation moderates
- Rate gains outpace claim costs

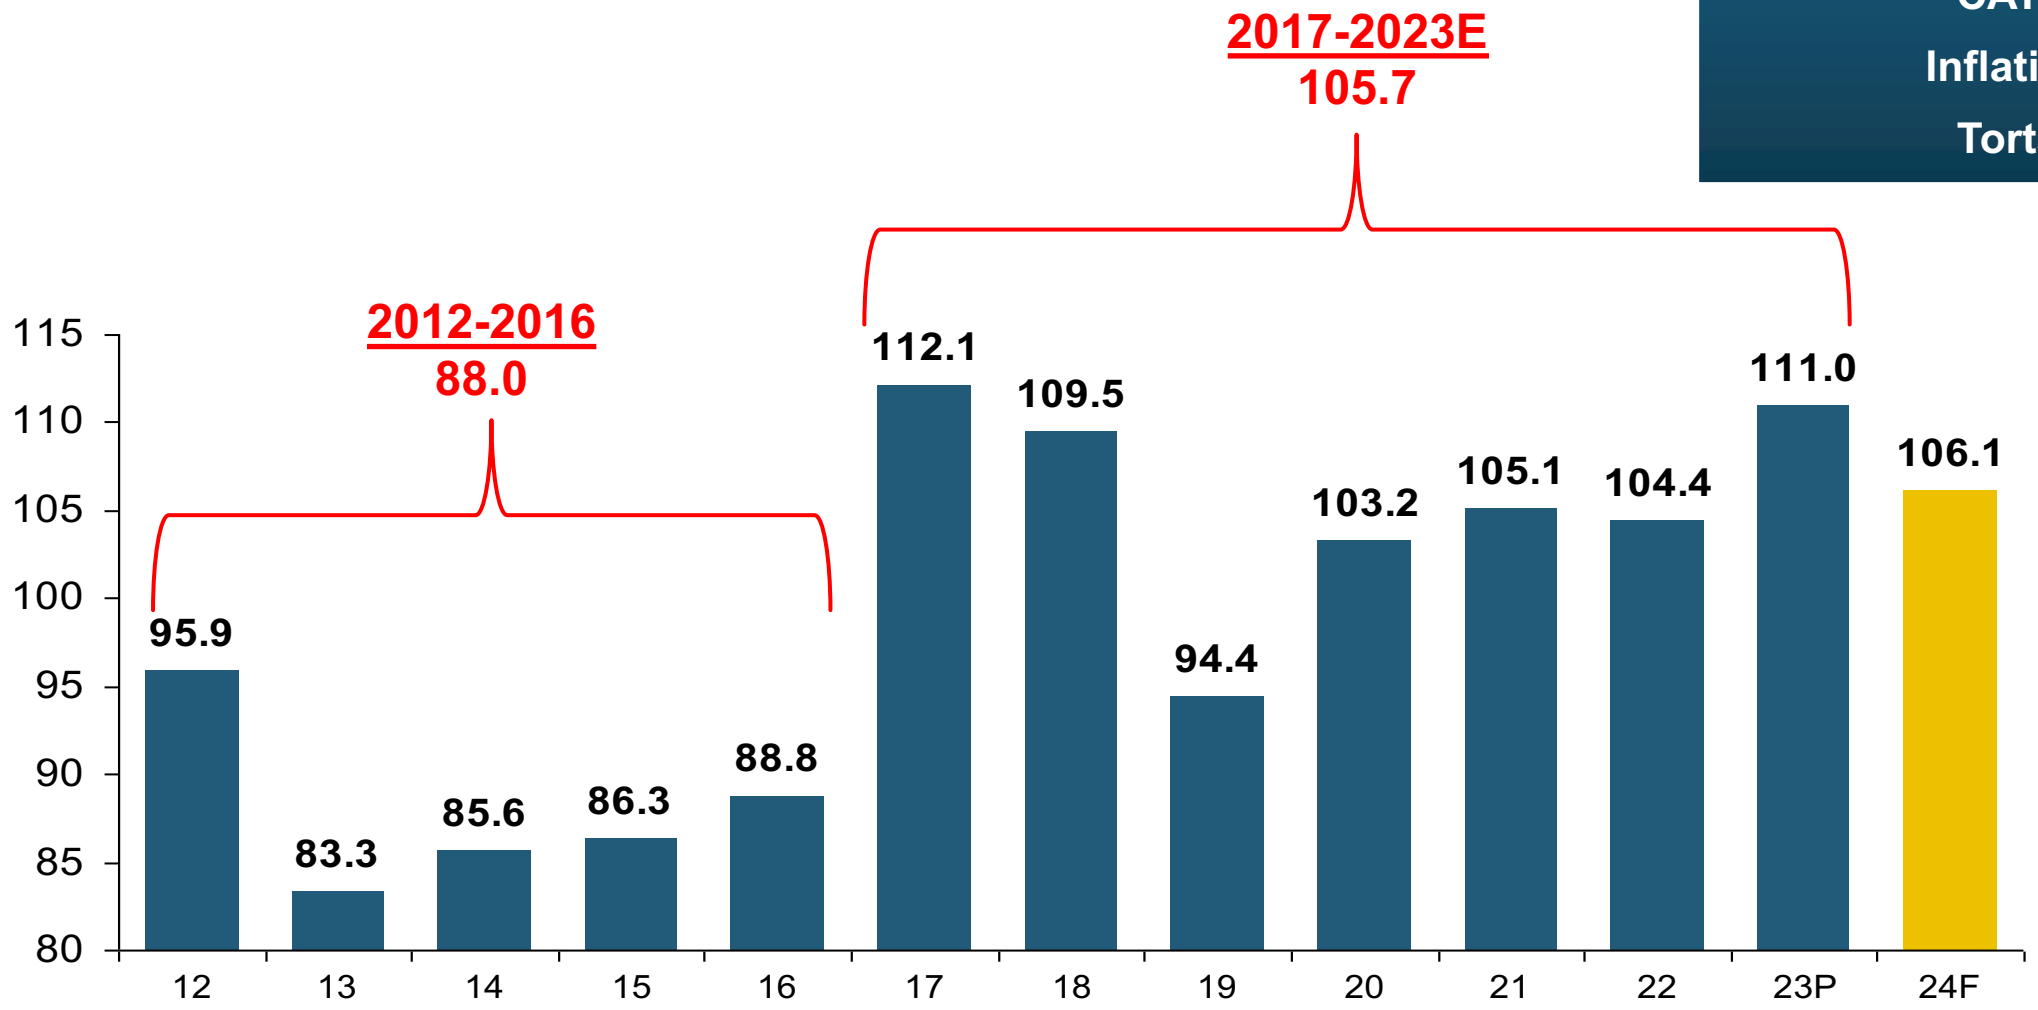


Sources: A.M. Best (2016-2023); Swiss Re (2024:Q1 and 2024F, 2025F).

Homeowners Combined Ratio, 2012–2024F

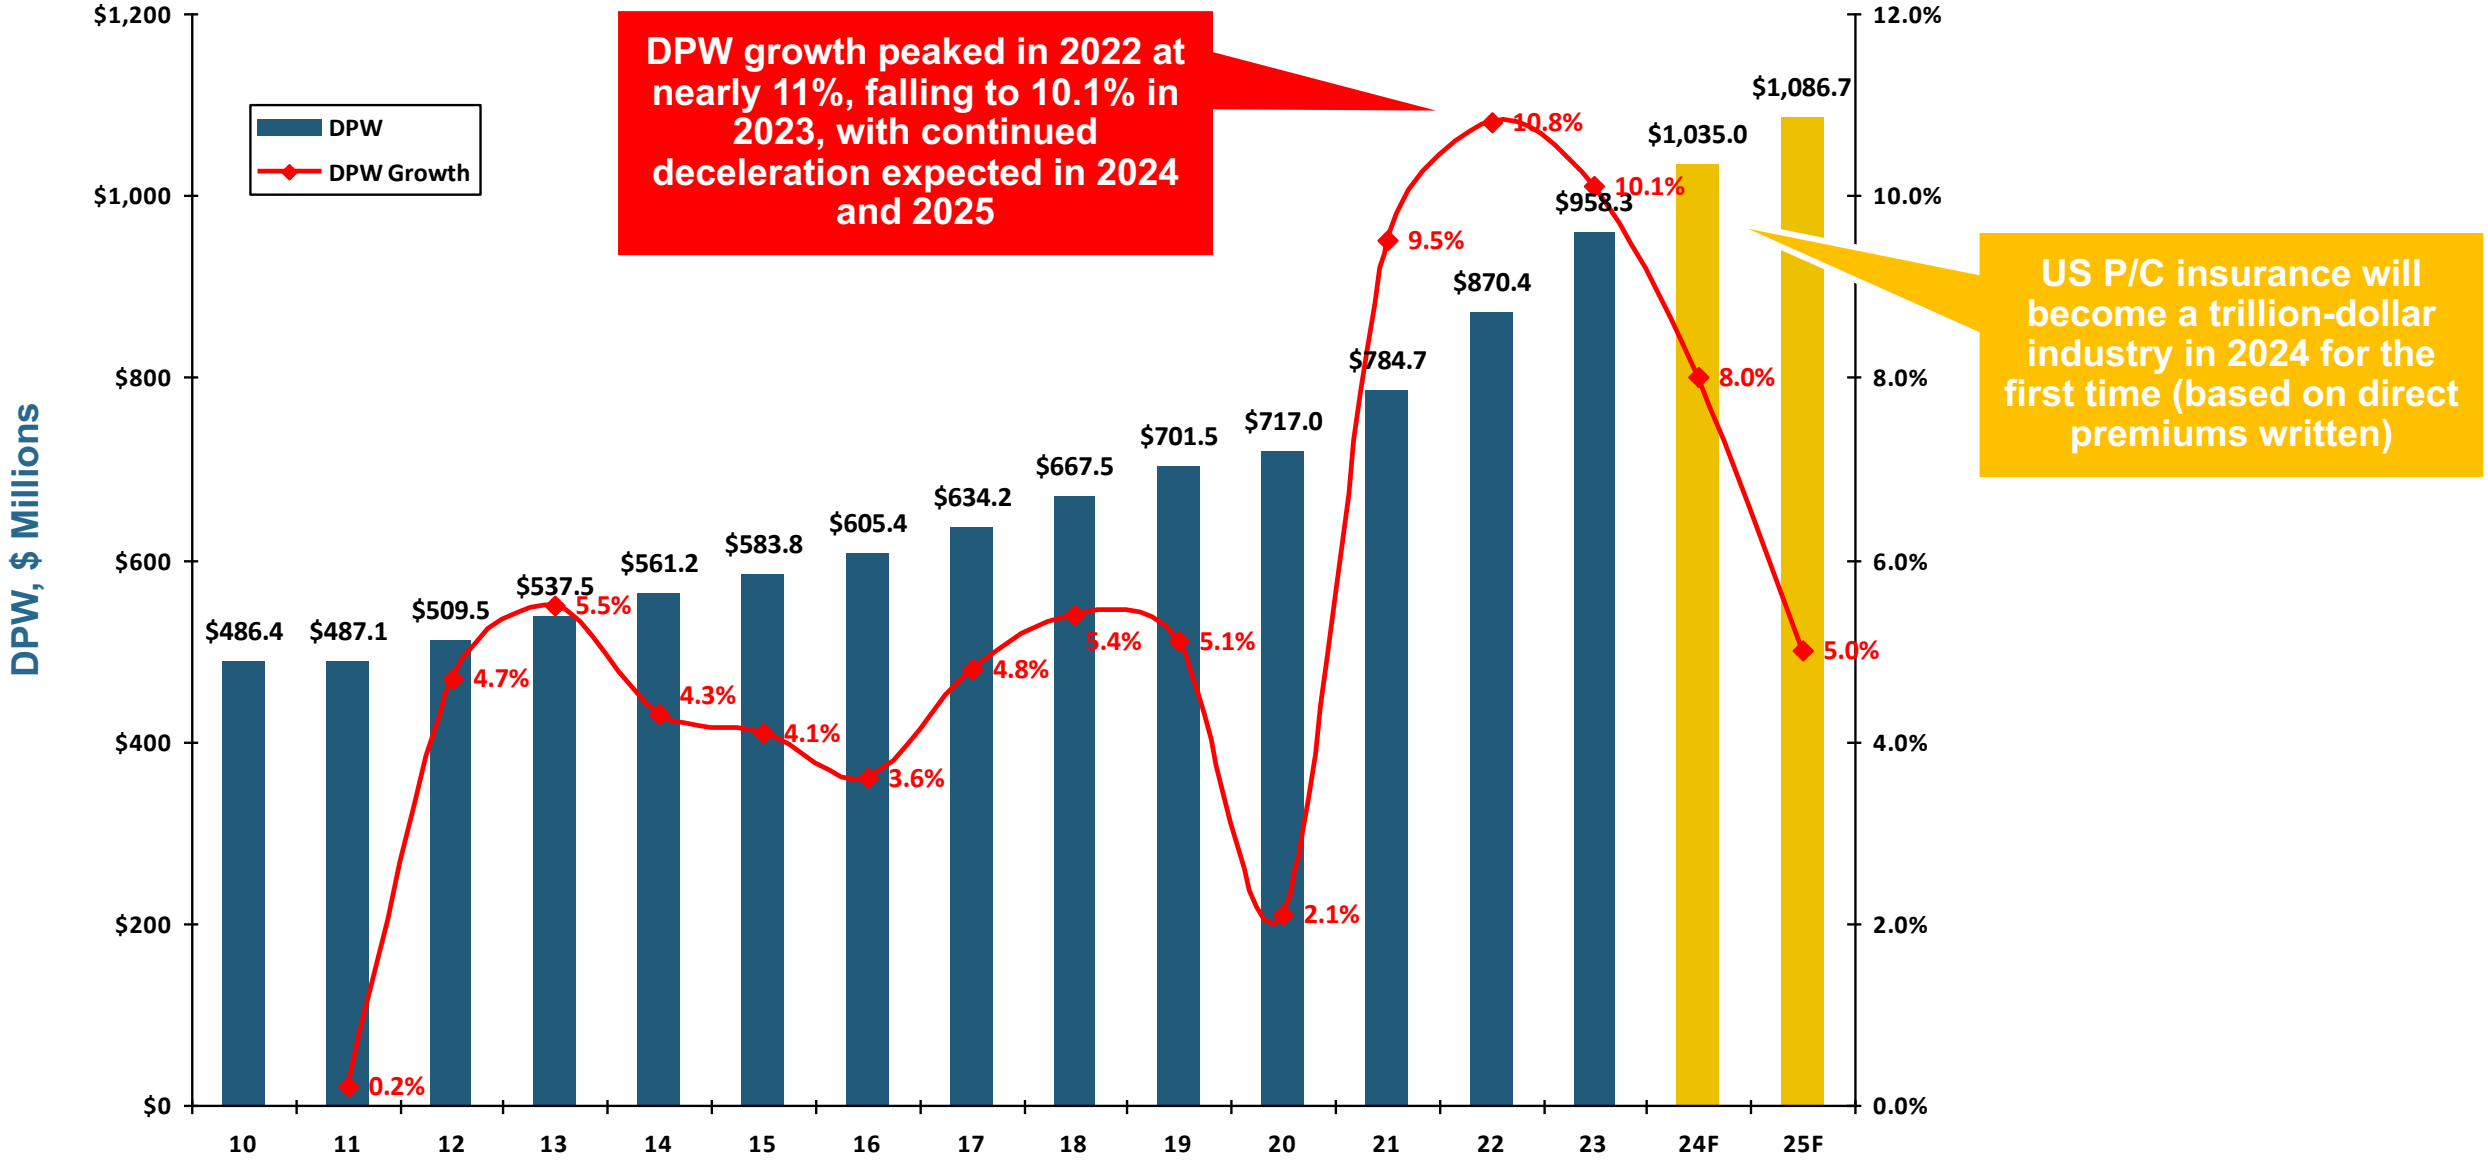
Homeowners insurance results have deteriorated markedly since 2017, largely due to:

- **CATs**
- **Inflation**
- **Torts**



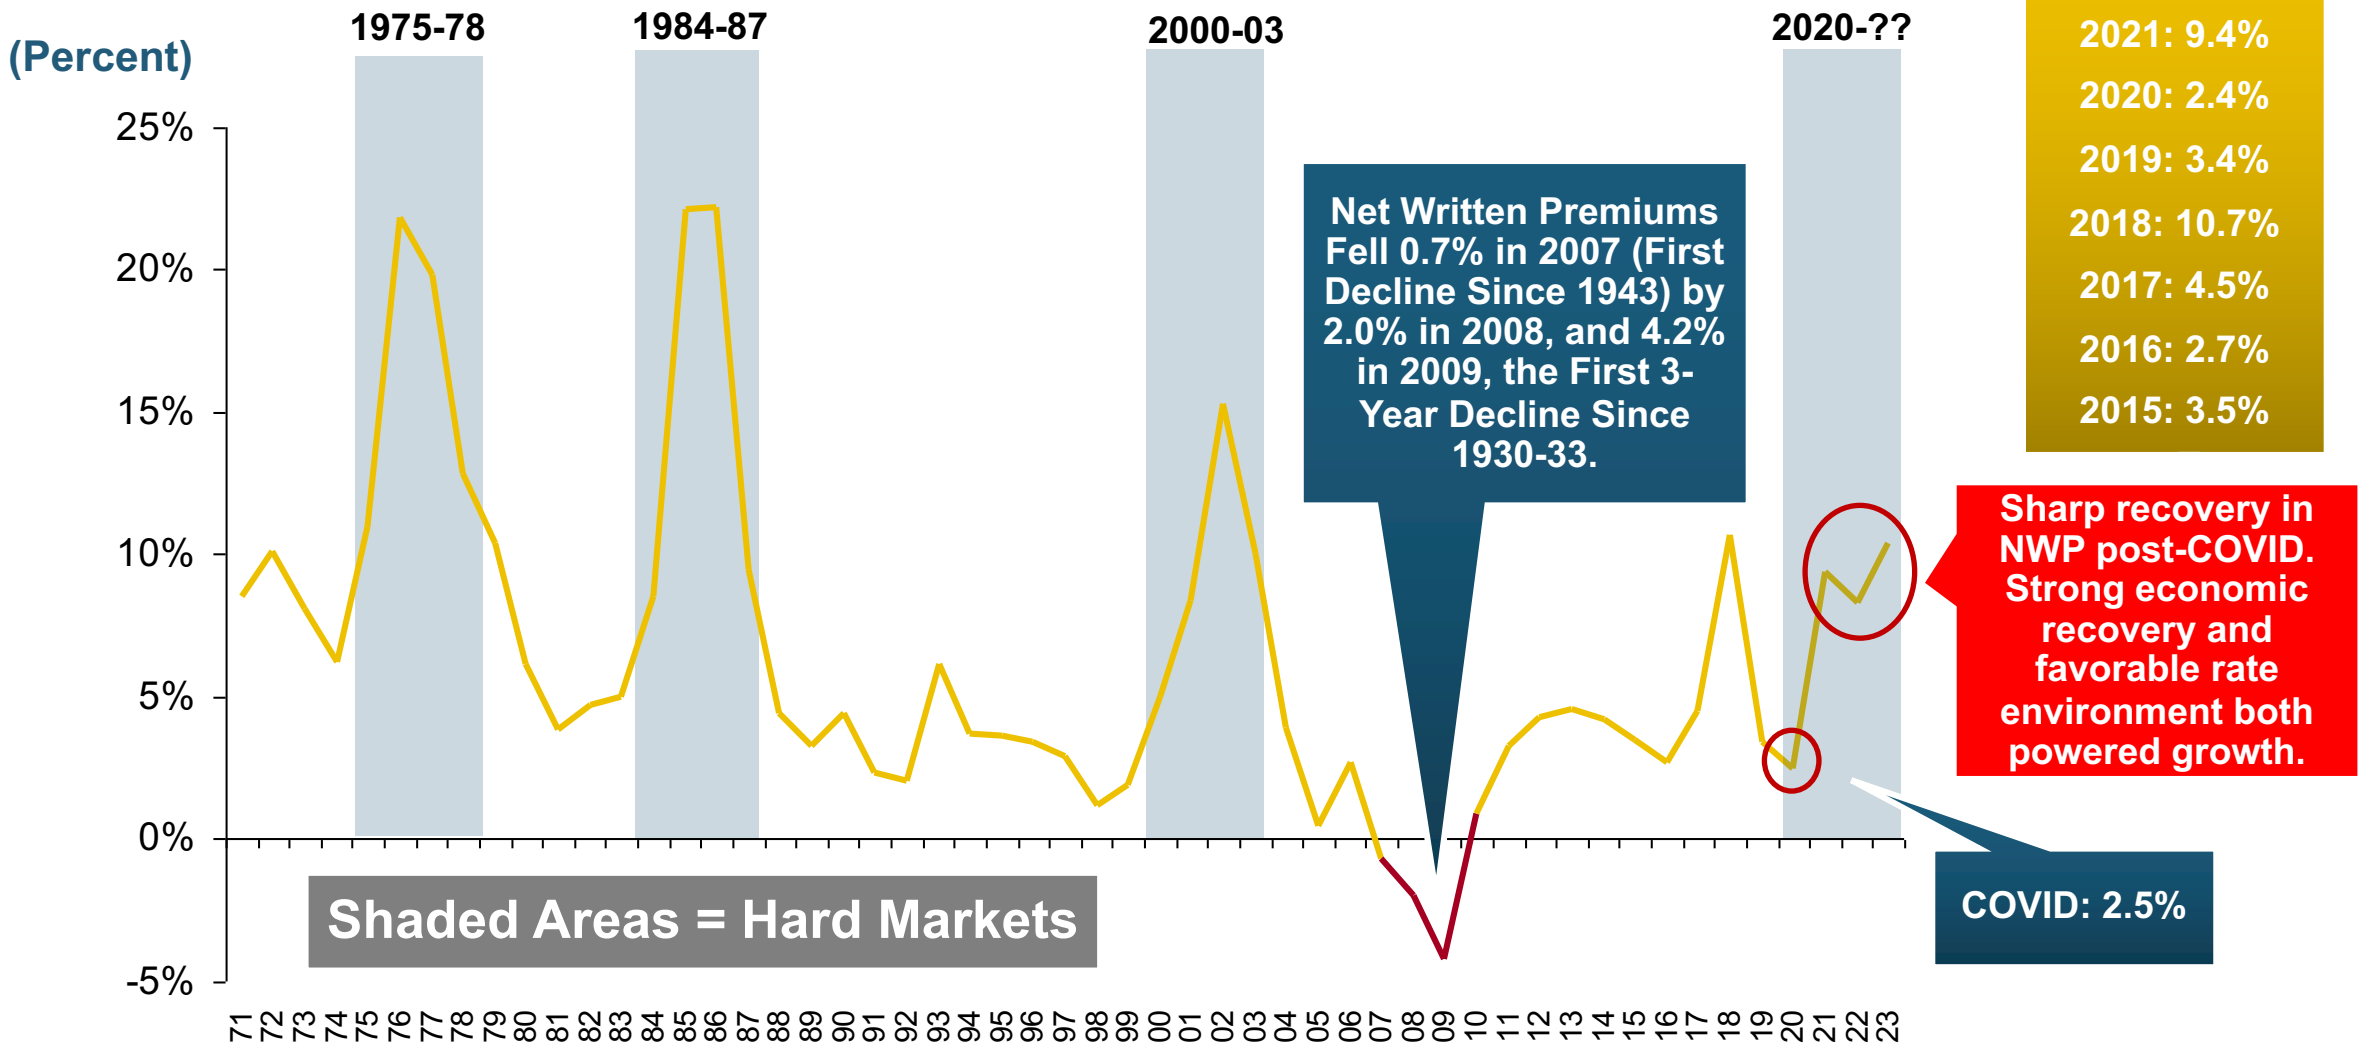
Sources: A.M. Best (2016-2024F); Best's Review & Preview (March 2024).

P/C Direct Premiums Written Volume and Growth, 2010–2025F



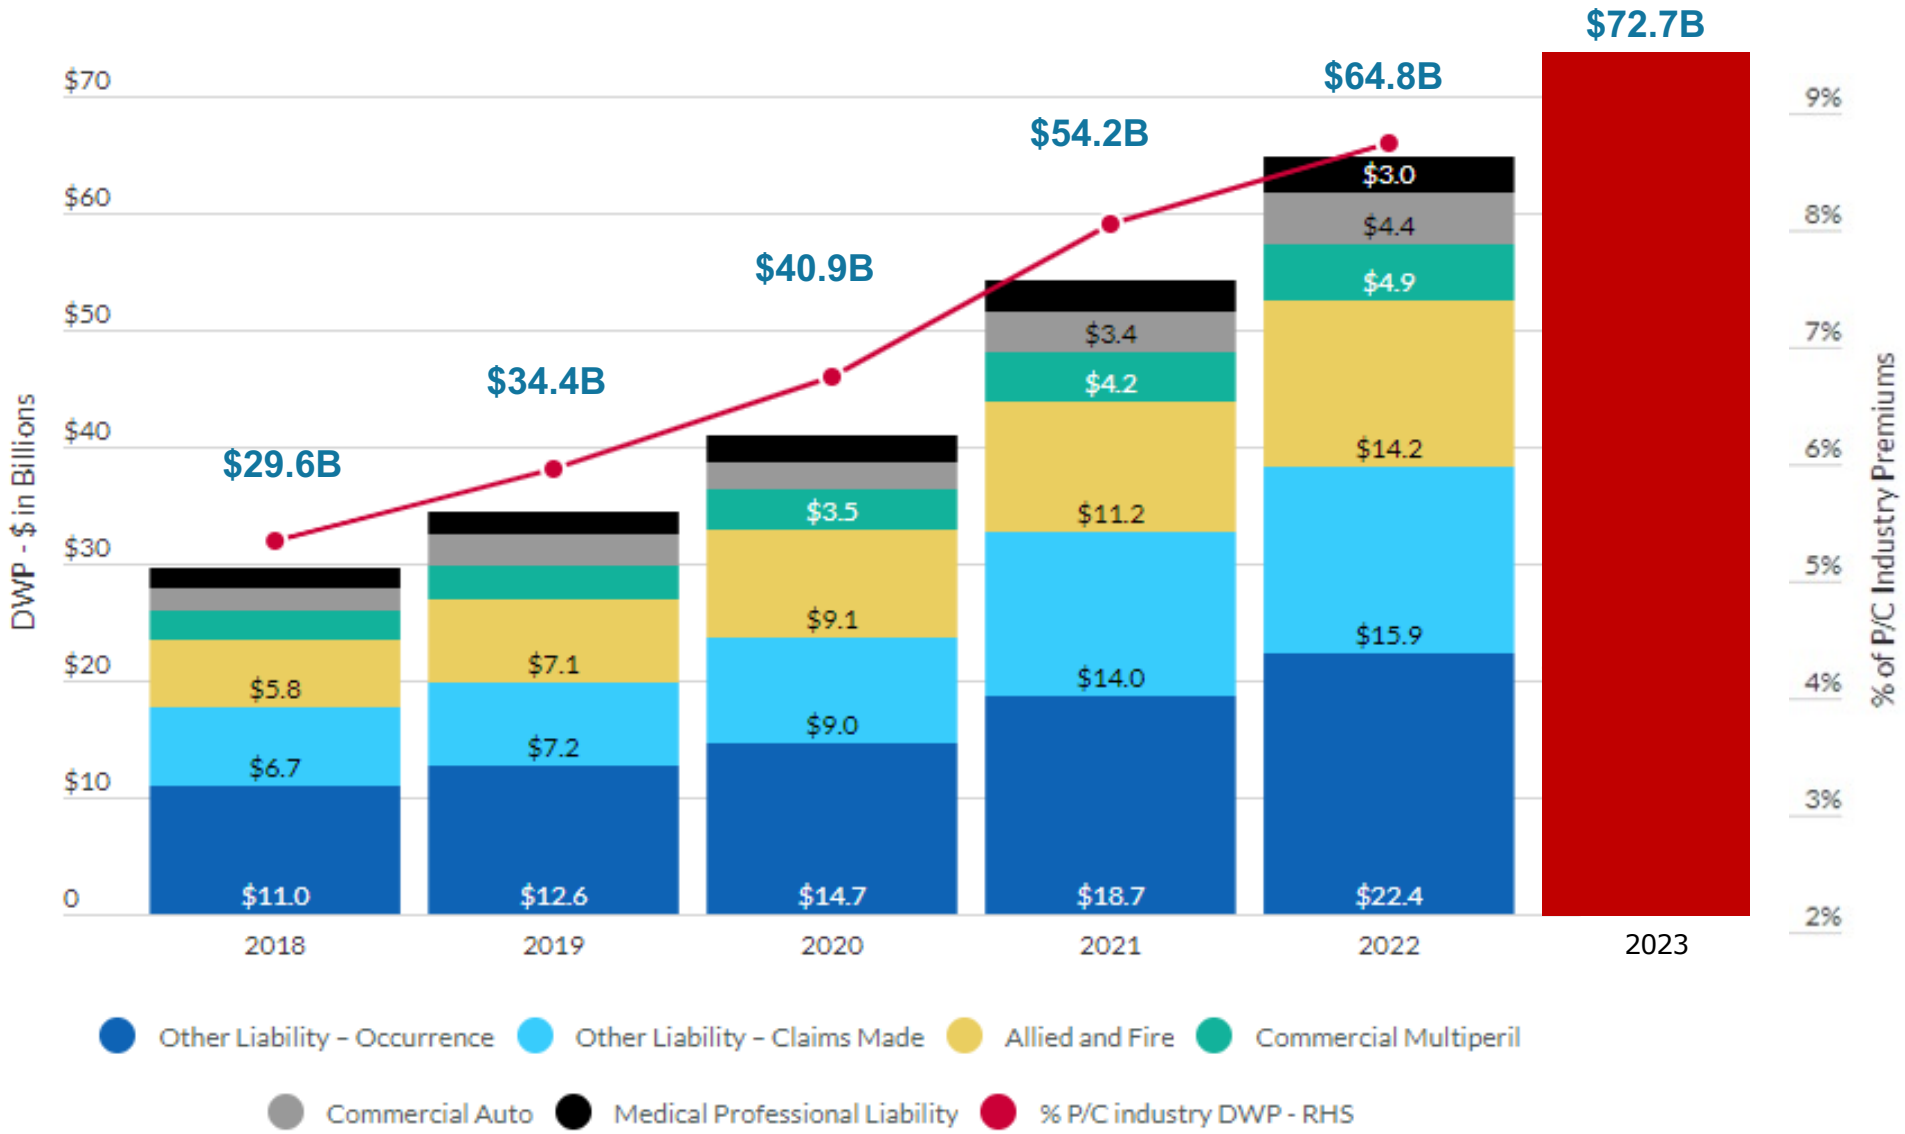
Sources: A.M. Best and NAIC (2010-2022); Forecast figures for 2024-25 from Swiss Re Institute (2024F-2025F) "*US Property & Casualty Outlook: Dog Days are Over,*" (June 2024), accessed at: https://www.swissre.com/dam/jcr:b2178beb-350f-406e-8714-63ea4b3fe2e1/swiss-re-institute-us-pc-dog-days-are-over.pdf.

Net Written Premium Growth (All P/C Lines): Annual Change, 1971–2023



NOTE: Shaded areas denote “hard market” periods.
Sources: A.M. Best (1971-2013), ISO (2014-21); NAIC (2022-2023); Risk & Uncertainty Management Center, Univ. of South Carolina

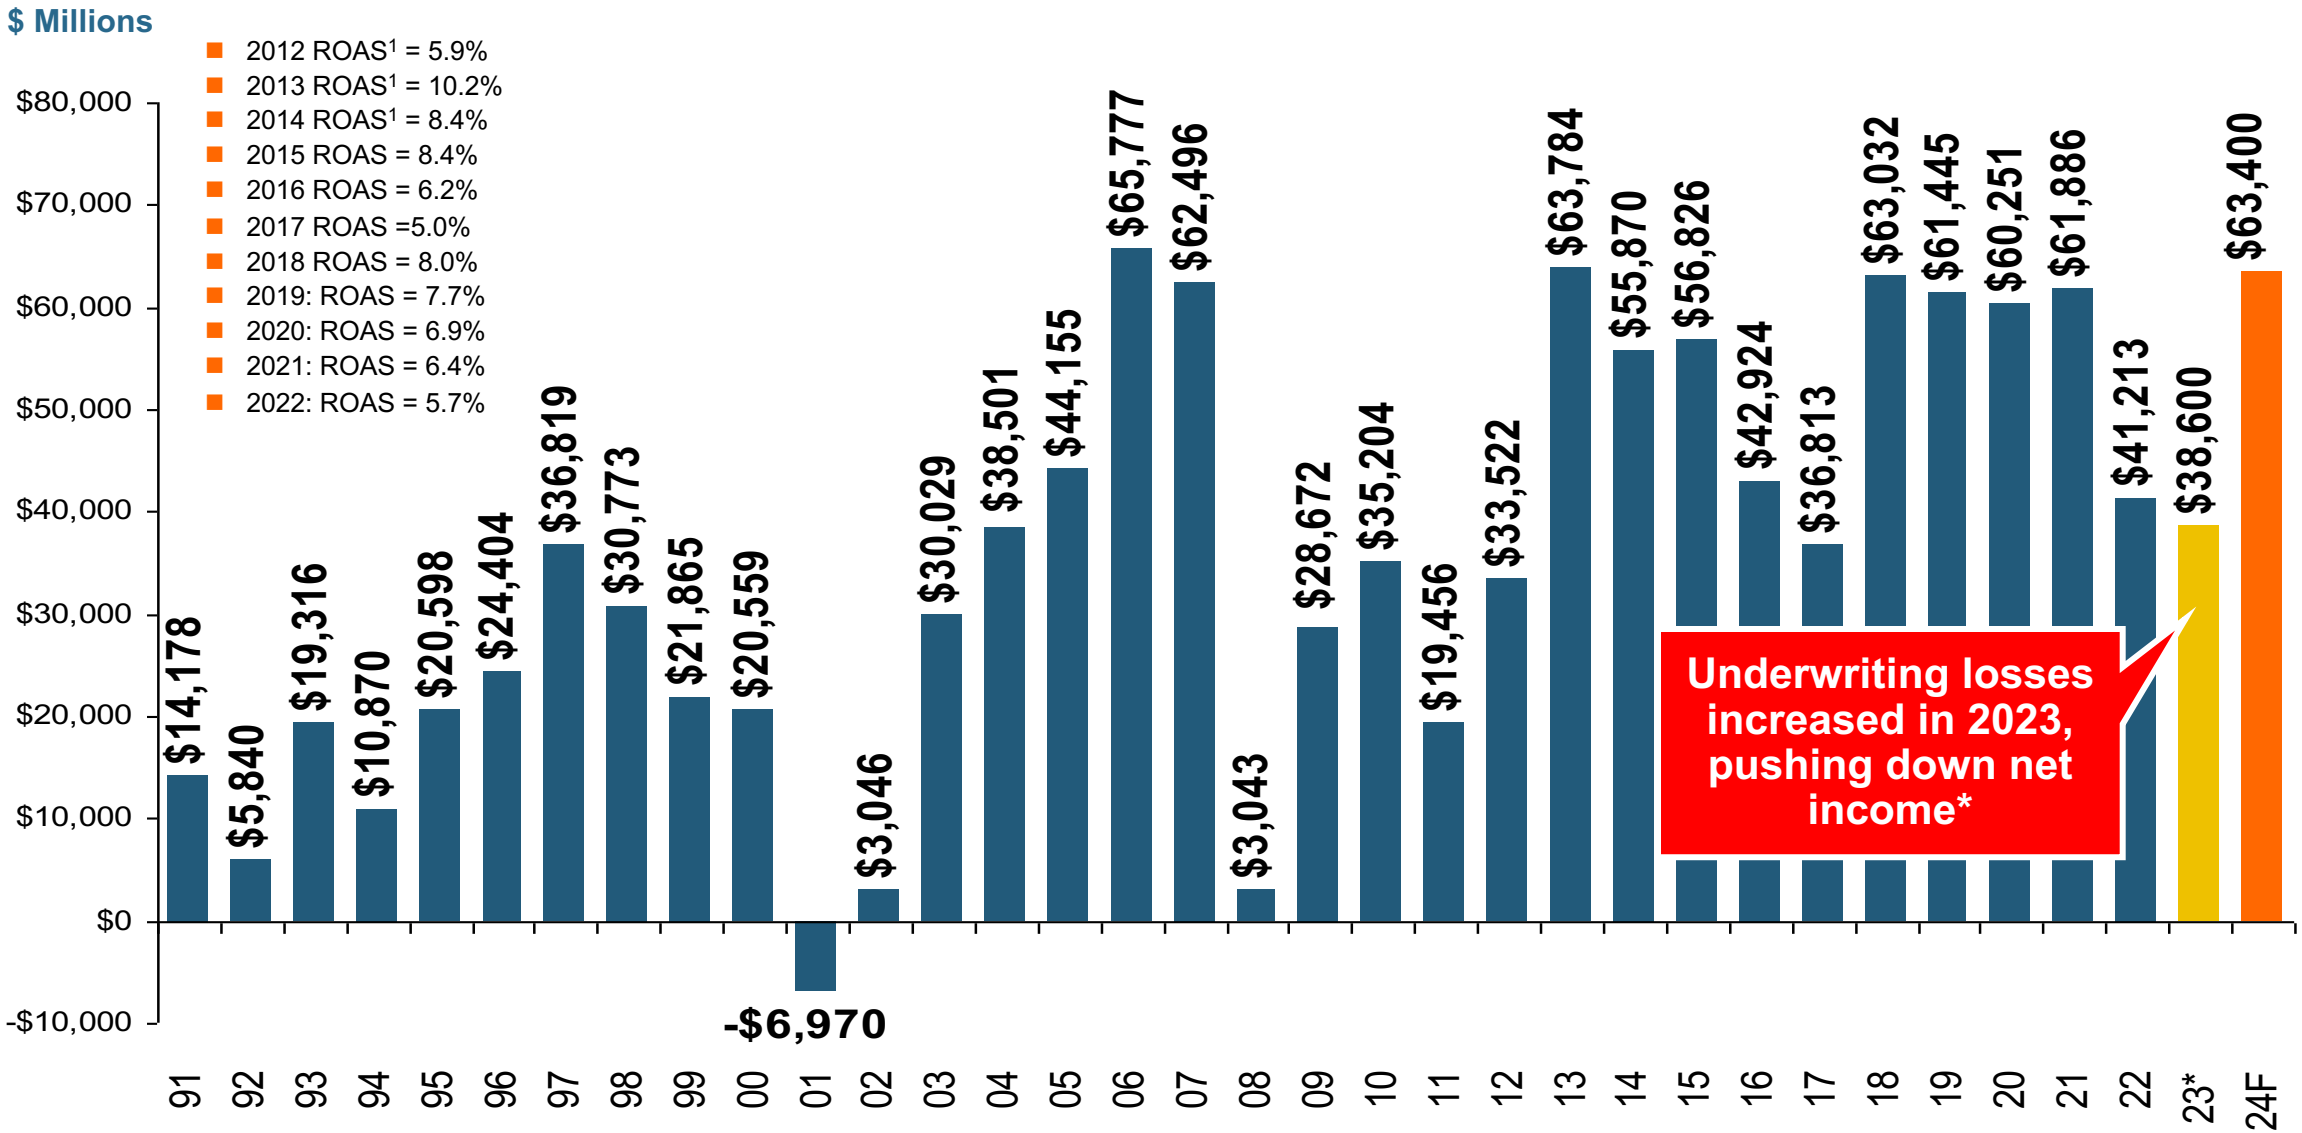
E&S Market Direct Written Premium Trends



E&S premium grew by ~14.6% in 2023, down from 20% in 2022 (up 146% since 2018), approaching 9% of the total P/C market (up from 5.5% in 2018)

Sources: Data for 2018 – 2022: Fitch Ratings (*Fitch Wire*, Oct. 4, 2023) accessed at: https://www.fitchratings.com/research/insurance/us-excess-surplus-insurance-market-outperformance-to-continue-04-10-2023; For 2023: Insurance Journal from WSIA, accessed at: https://www.insurancejournal.com/news/national/2024/02/14/760715.htm#; Risk and Uncertainty Management Center, University of South Carolina.

P/C Industry Net Income After Taxes, 1991–2024F*



*2023 figure is adjusted is adjusted to reflect $50B realized gain from a large reinsurer (National Indemnity). Including this gain, net income after tax is $86.6B.

Note: ROE figures are GAAP; [1]Return on avg. surplus. Excludes Mortgage & Financial Guaranty insurers for years (2009-2014).

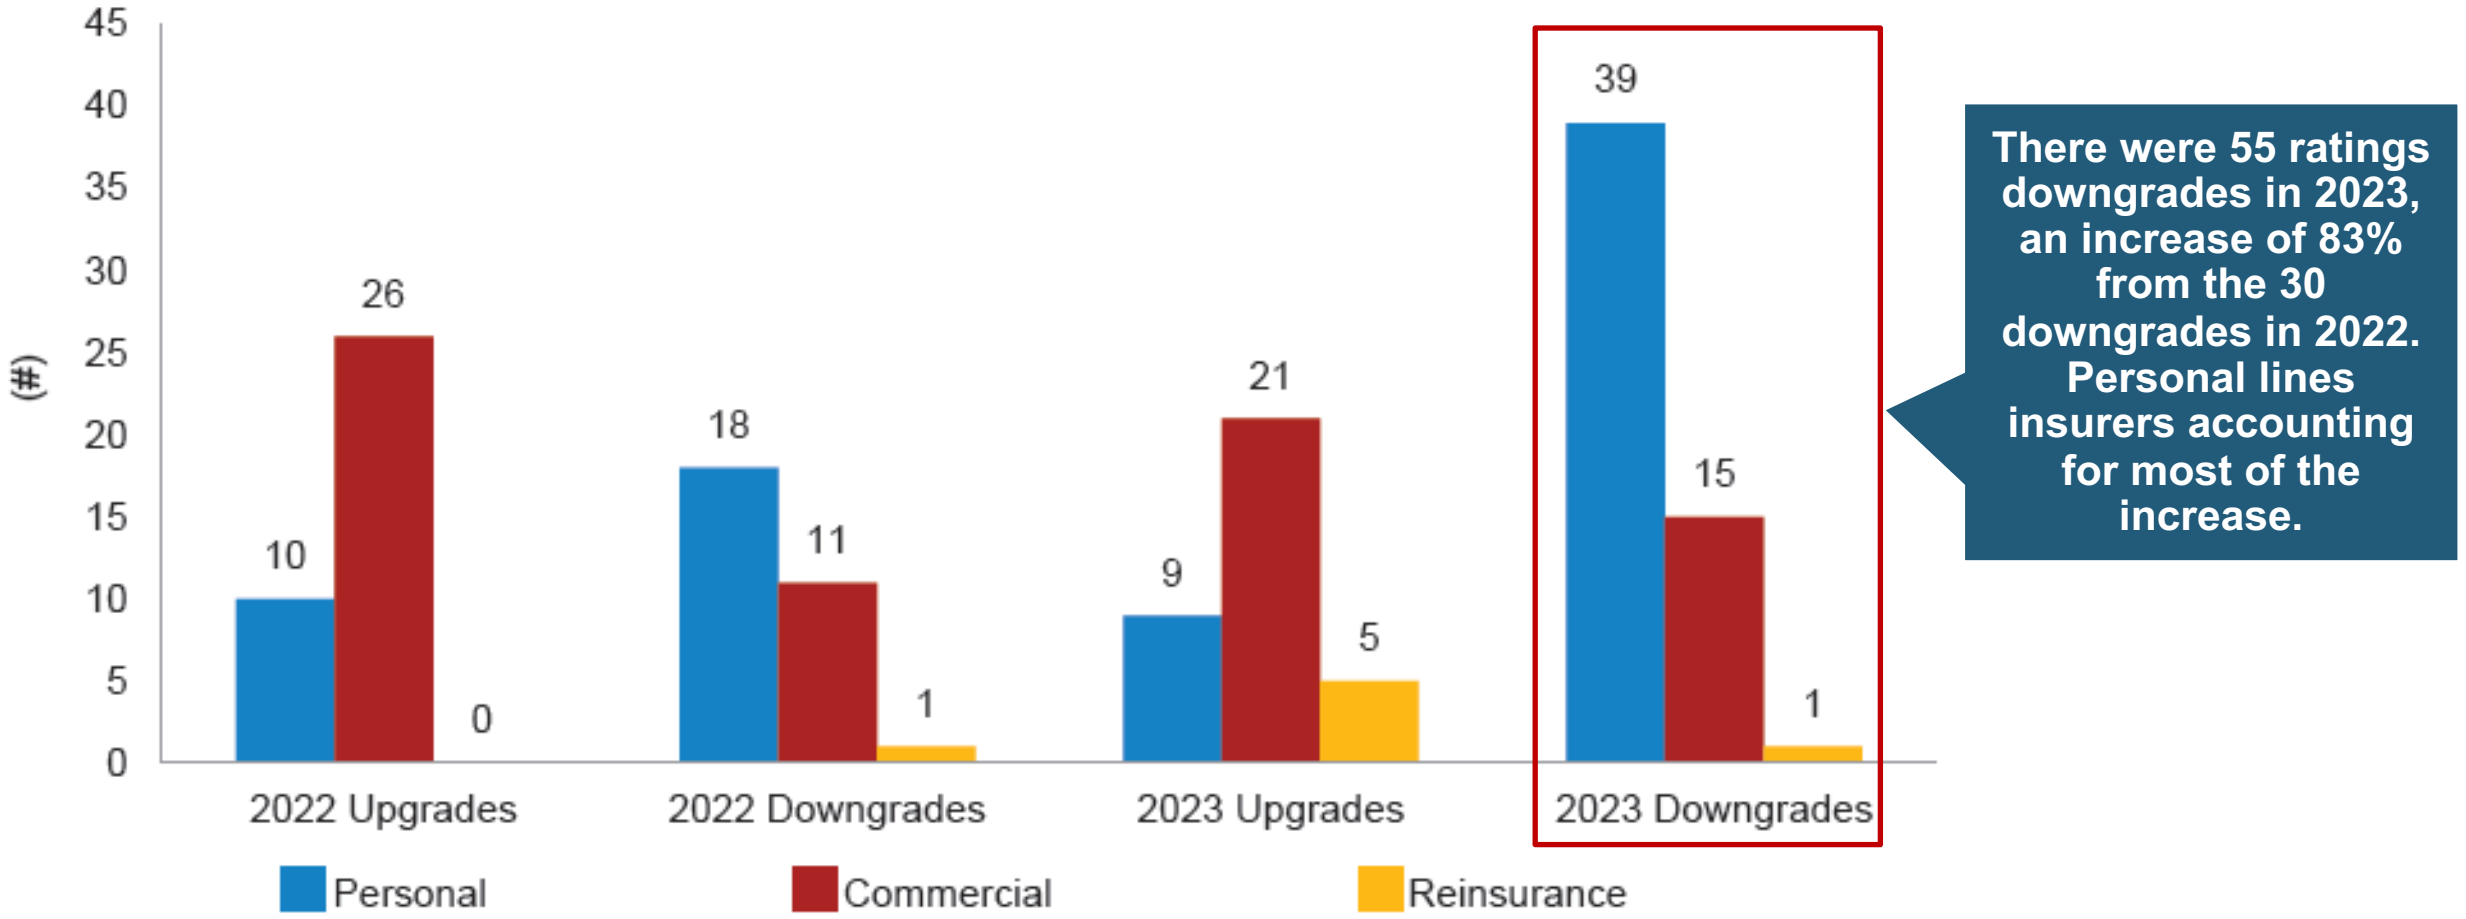
Upgrades, Downgrades and M&A Activity

Underwriting Performance, CATs and Capital Are Impacting Ratings and M&A Activity

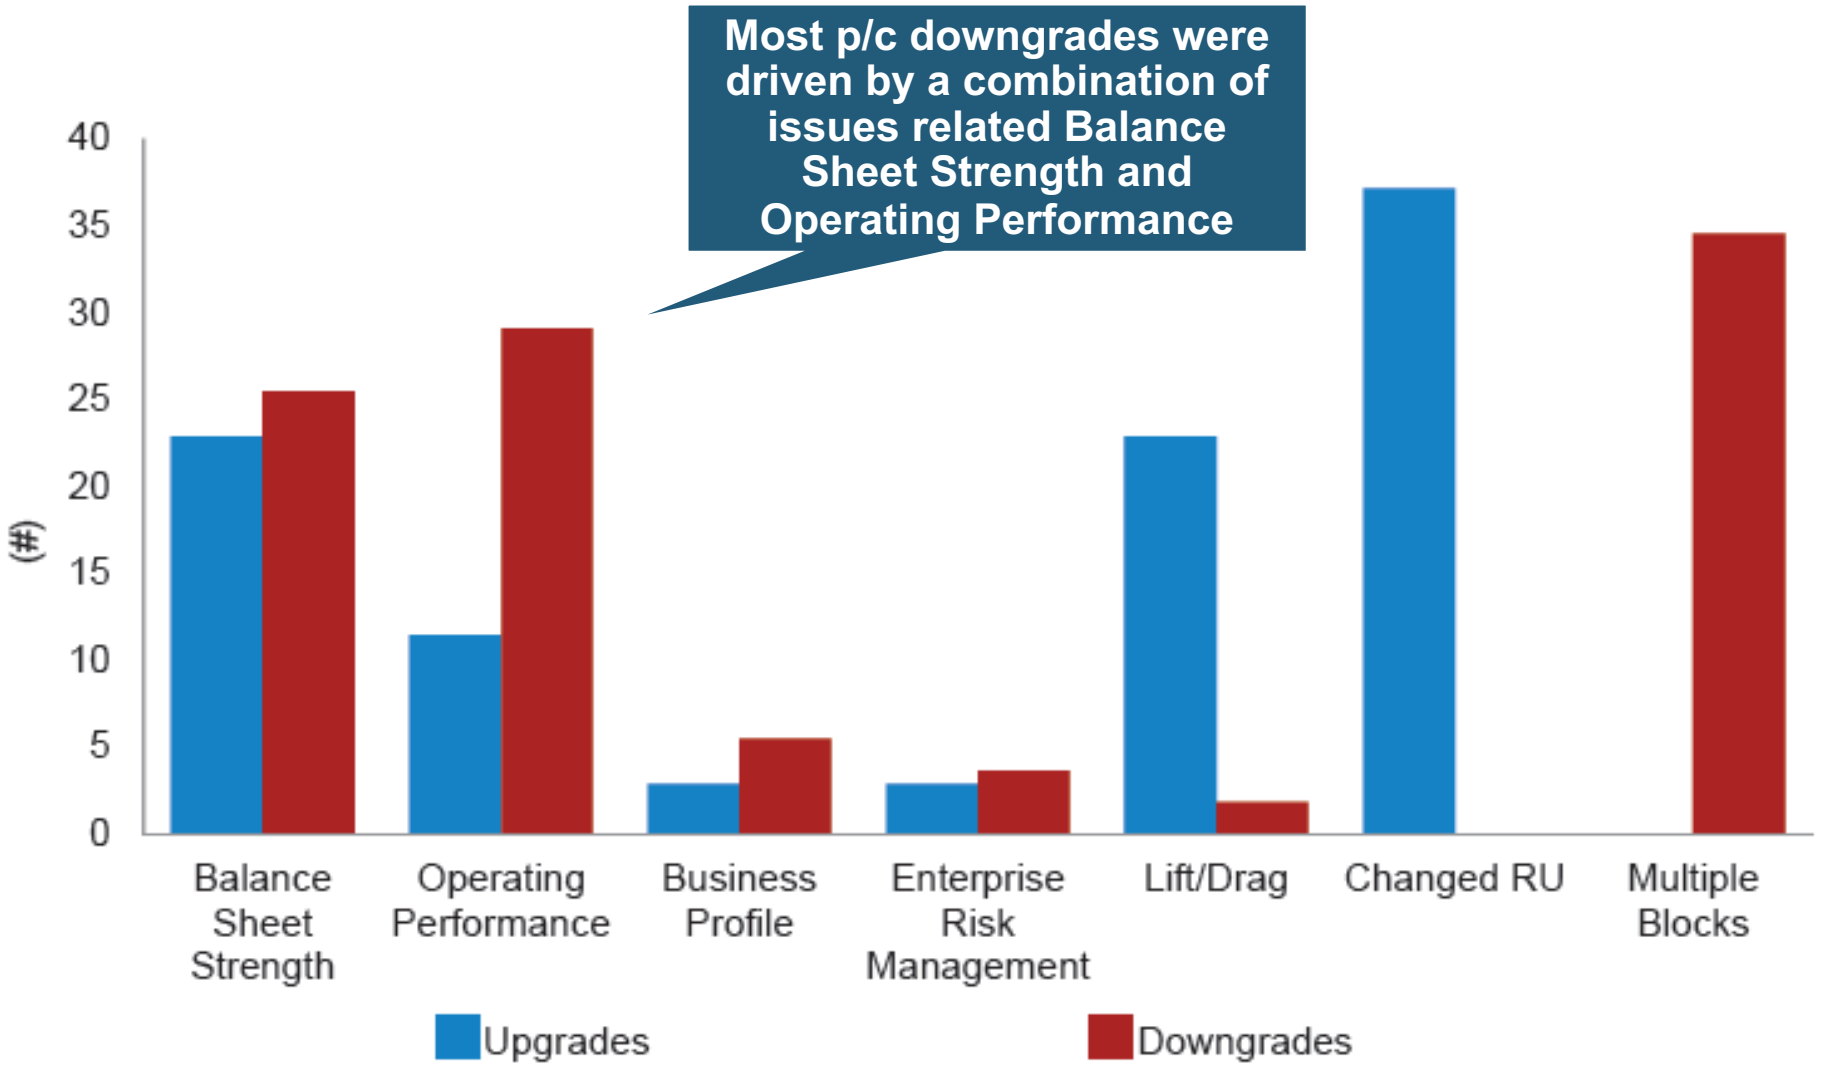
US P/C: Rating Upgrades & Downgrades, by Segment, 2023



There were 55 ratings downgrades in 2023, an increase of 83% from the 30 downgrades in 2022. Personal lines insurers accounting for most of the increase.

Source: A.M. Best Review & Preview (March 11, 2024), *US Property/Casualty Downgrades Outpace Upgrades in 2023.*

US P/C: Drivers of Rating Upgrades & Downgrades, 2023



Source: A.M. Best Review & Preview (March 11, 2024), *US Property/Casualty Downgrades Outpace Upgrades in 2023.*

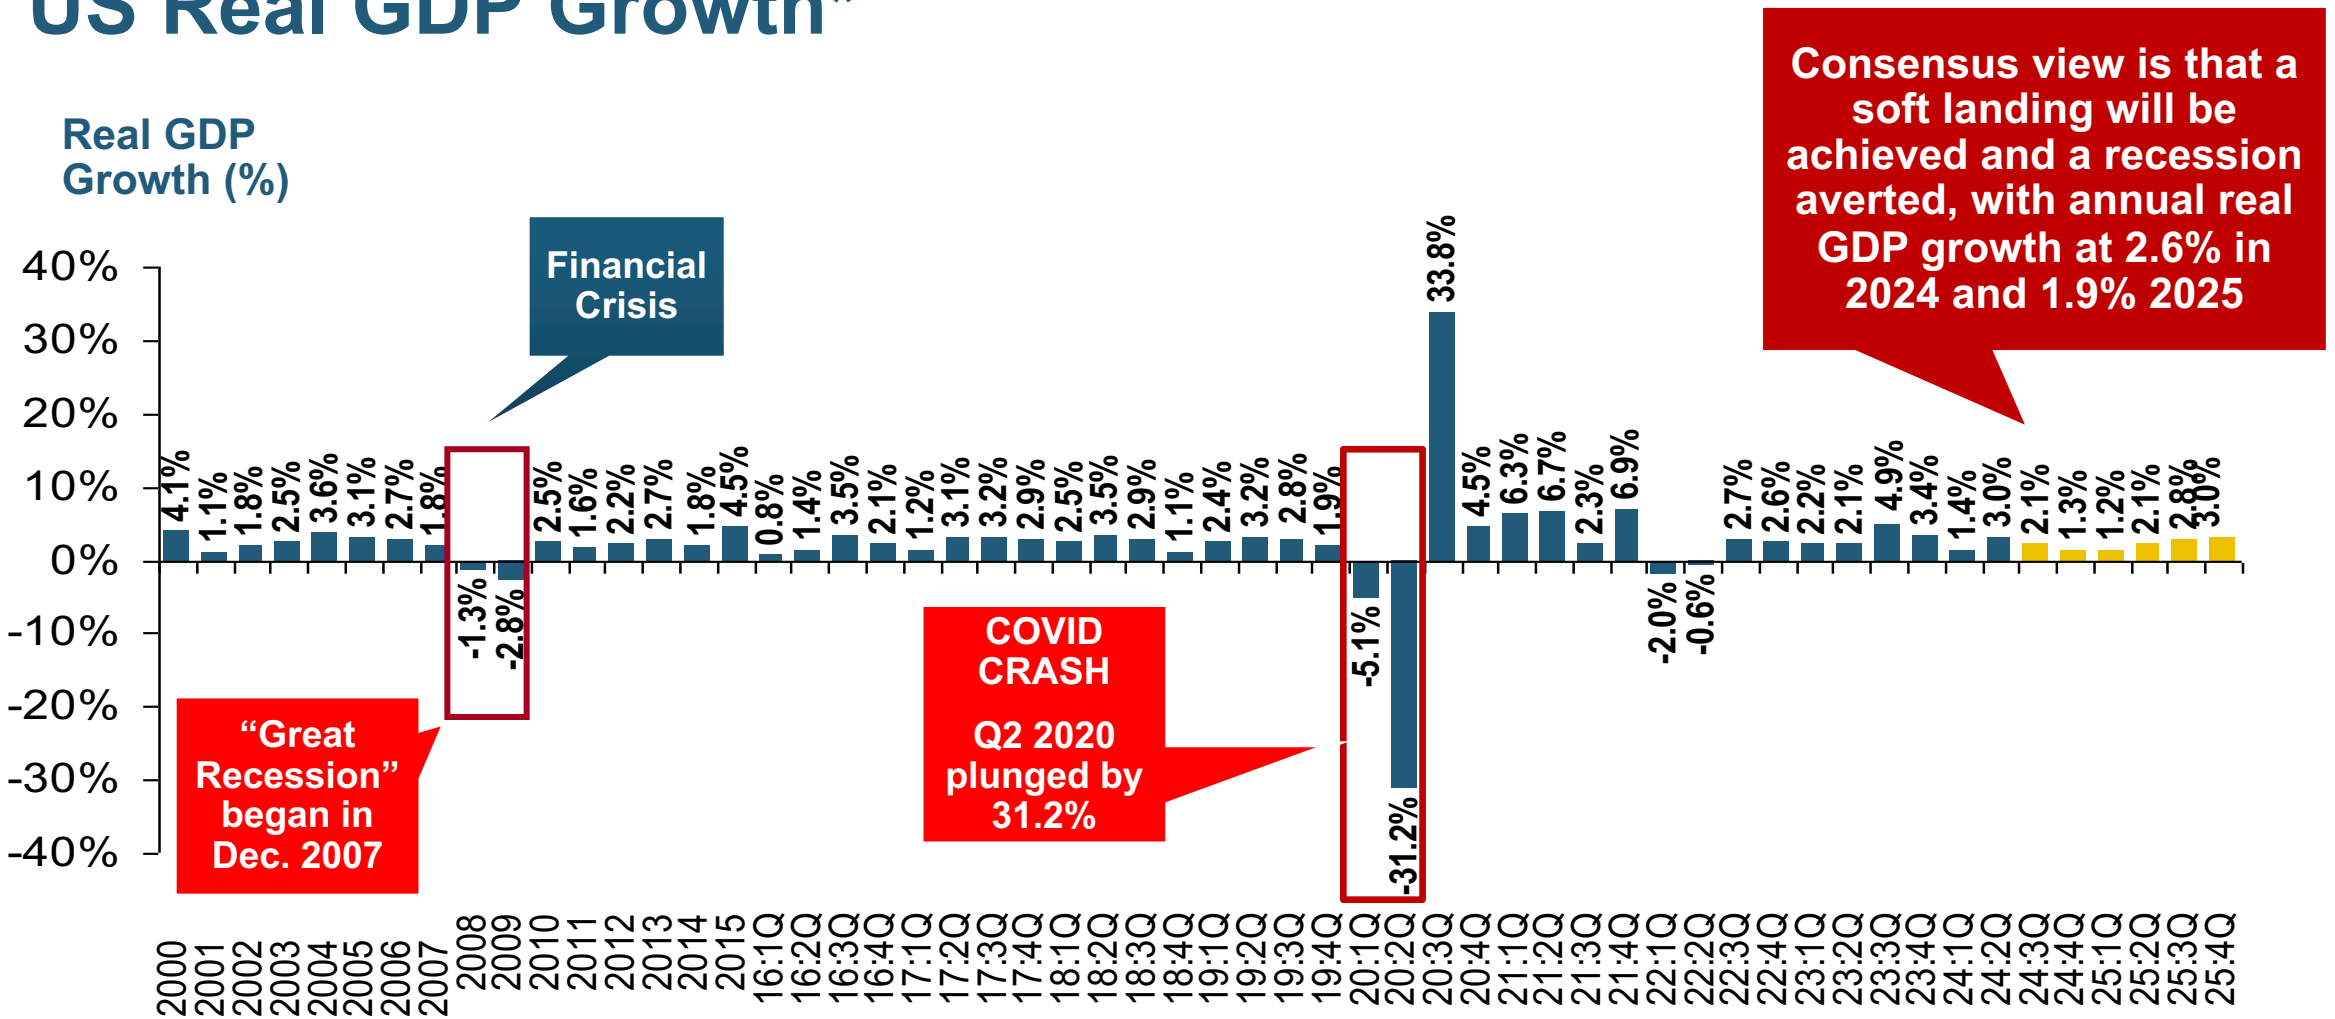
Economic Overview
The U.S. Economy Remain Resilient and Consumer Gloom is Lifting

Inflation, Geopolitical Conflicts and Still-High Interest Rates Have Weighed Heavily on Business and Consumer Sentiment

Is the Fed About to "Thread the Needle" and Achieve a "Soft Landing"?

22

US Real GDP Growth*

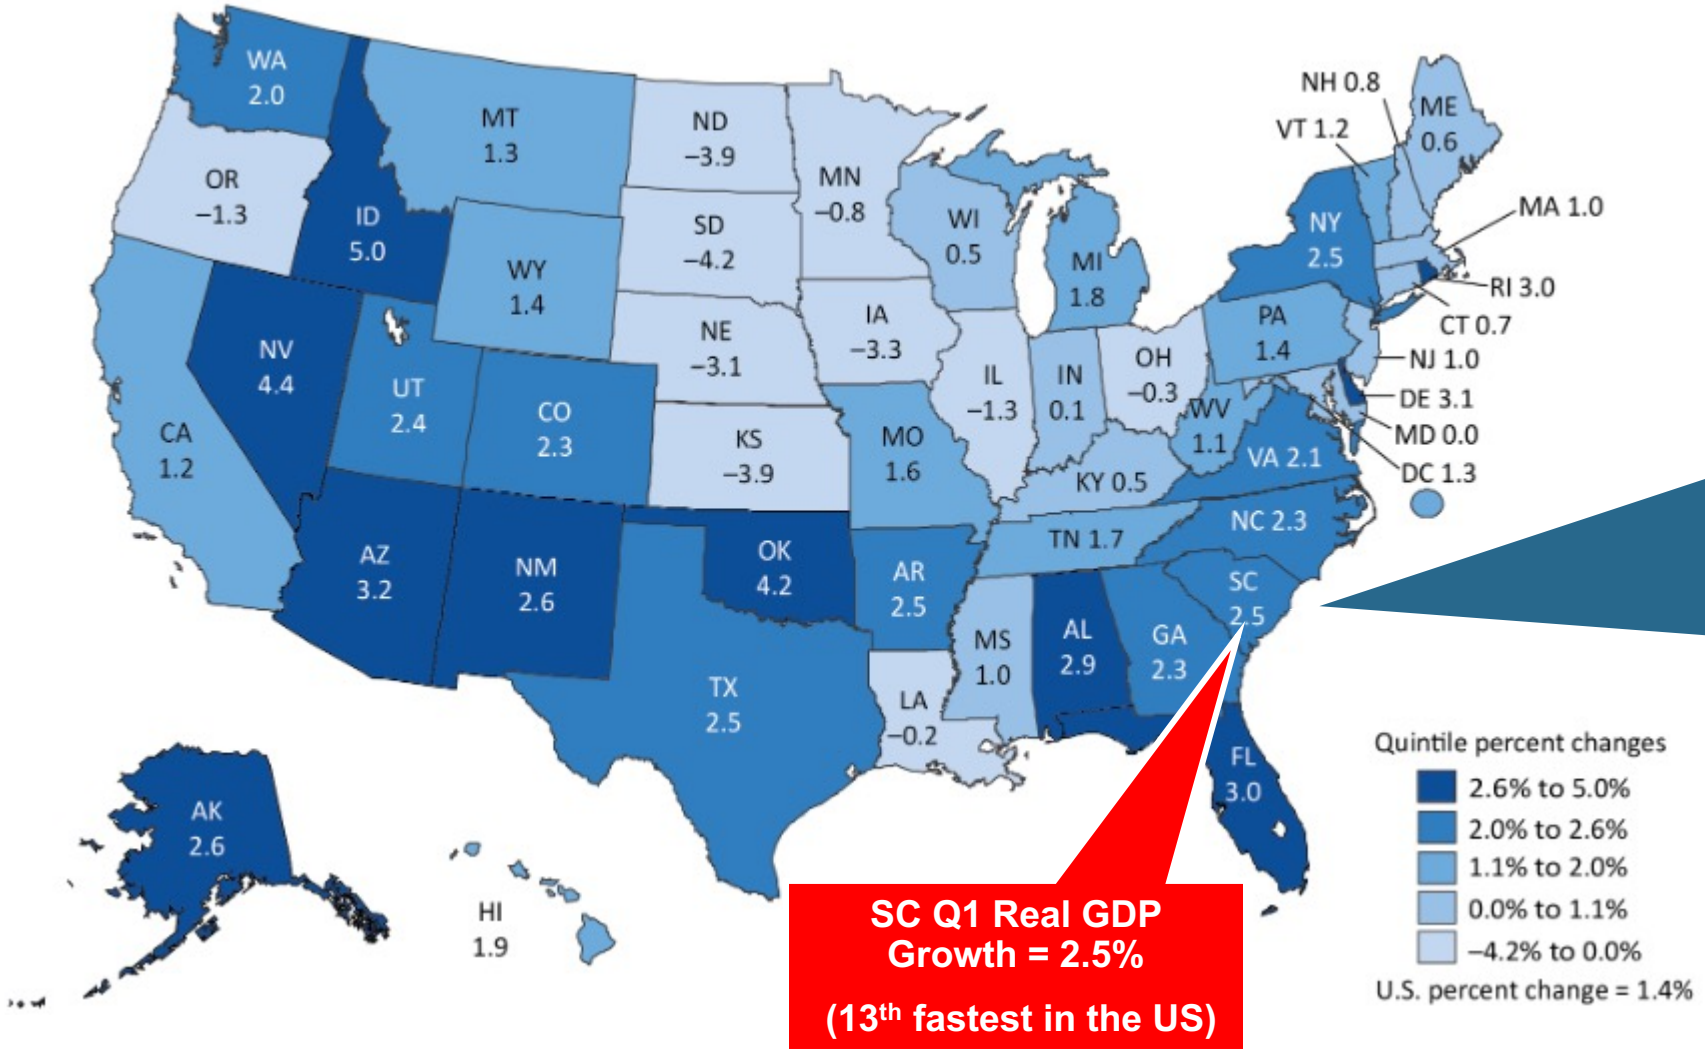


Demand for Insurance Increased Materially in 2021/22 During Recovery from the Pandemic—Particularly in Economically Sensitive Commercial Lines Such as WC. Premium growth will likely slow as Economy Slows.

* Estimates/Forecasts from Wells Fargo Securities.

Source: US Department of Commerce, Wells Fargo Securities (8/24); Center for Risk and Uncertainty Management, University of South Carolina.

Real GDP by State, 2023:Q4 – 2024:Q1



SC Q1 Real GDP Growth = 2.5%

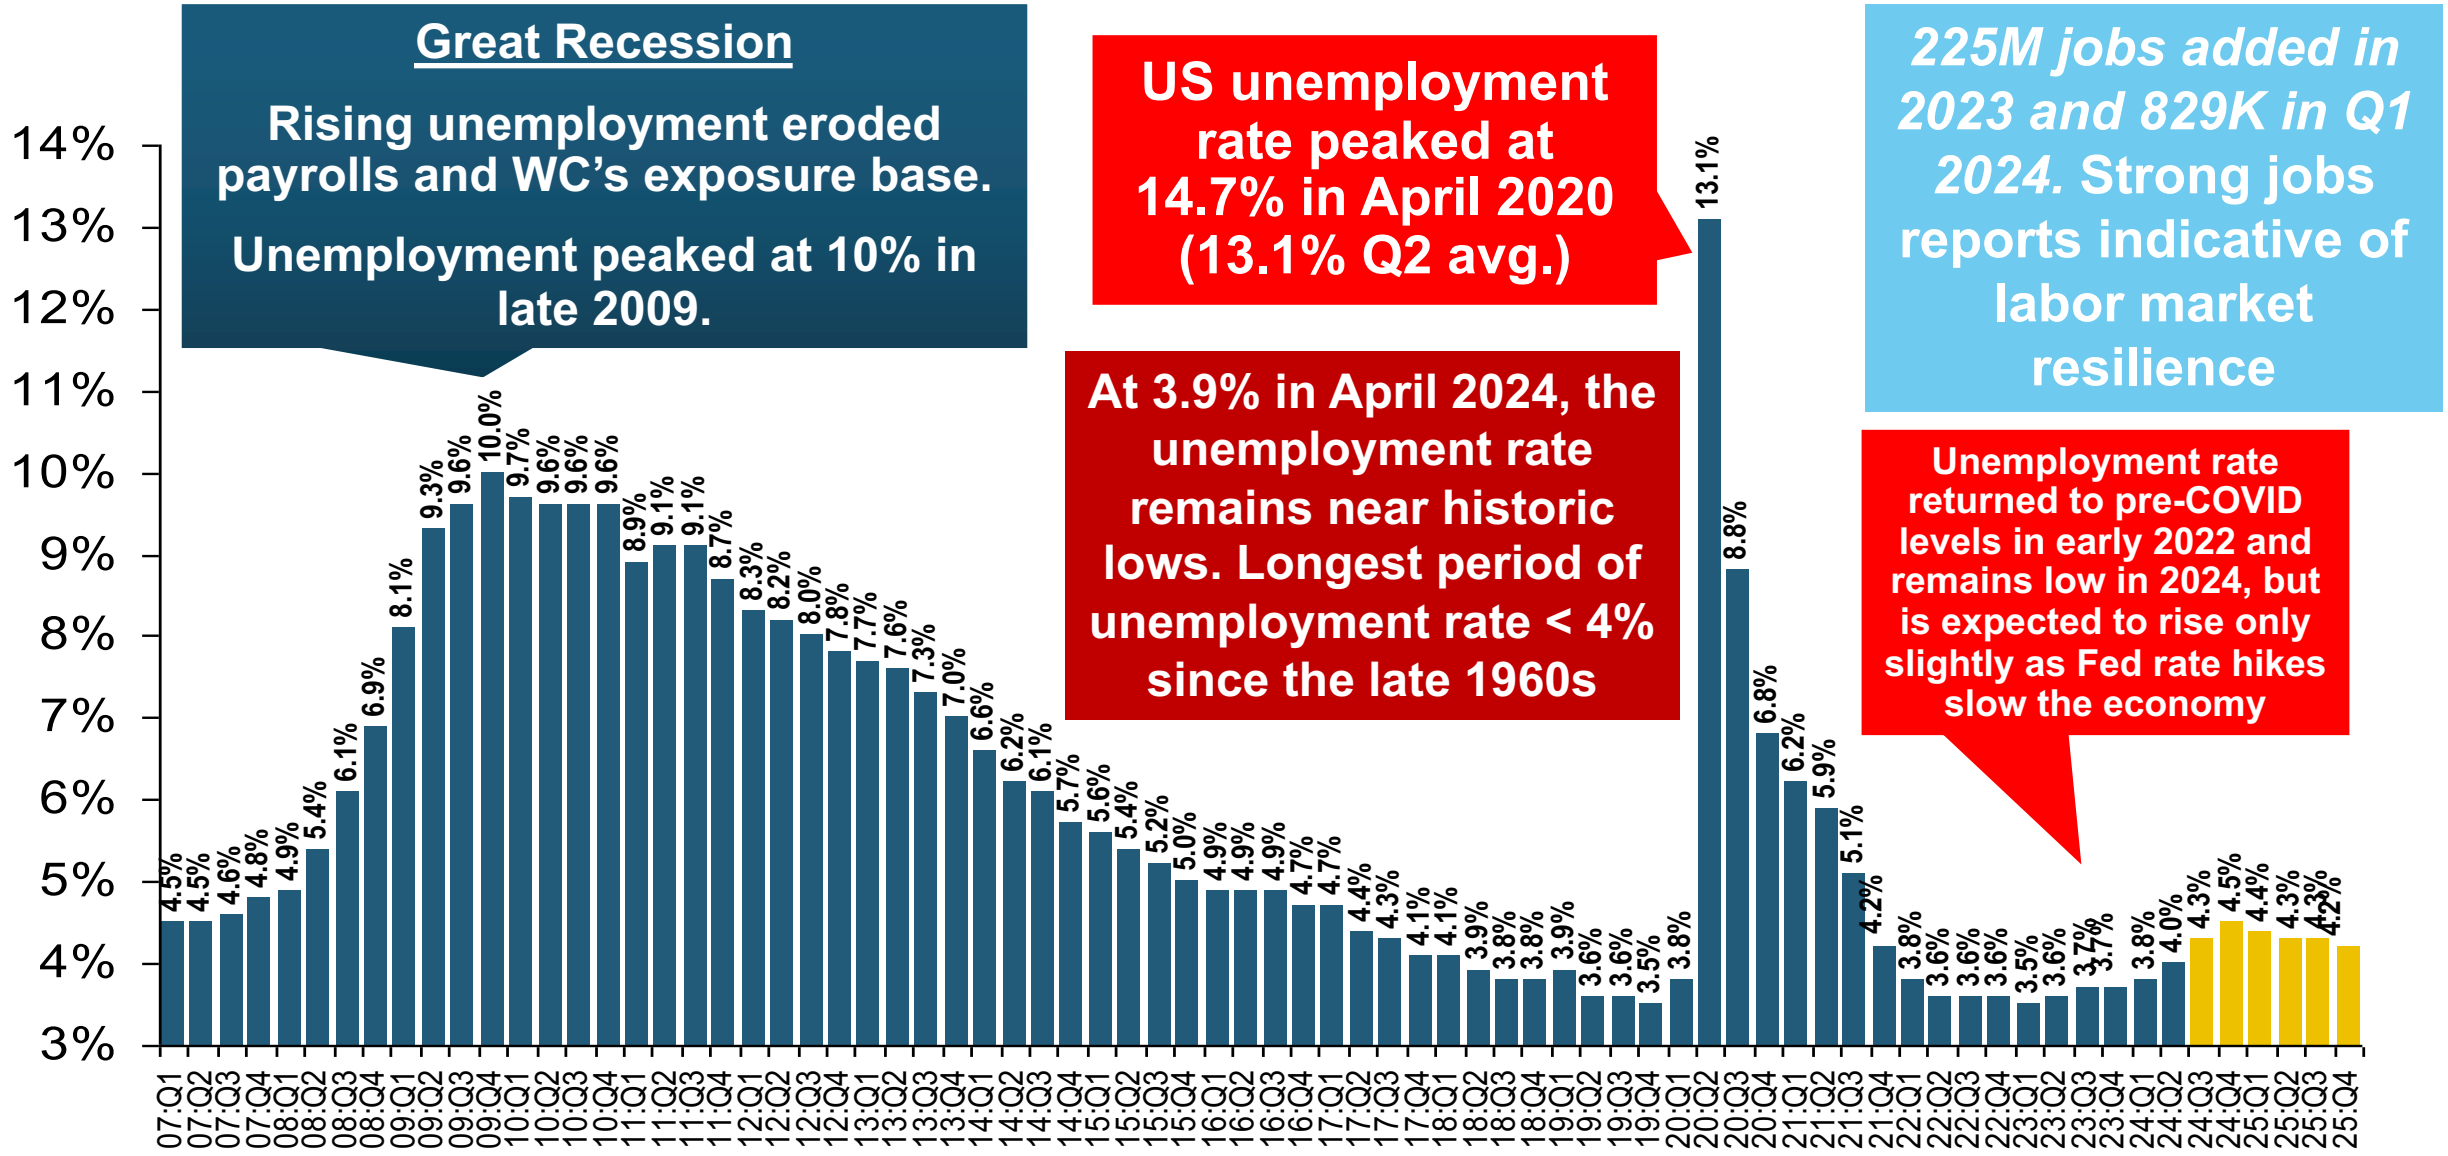
(13th fastest in the US)

Economic performance is strong overall, with slower growth in the Midwest and Plains states

Real GDP increased in 39 states in Q1

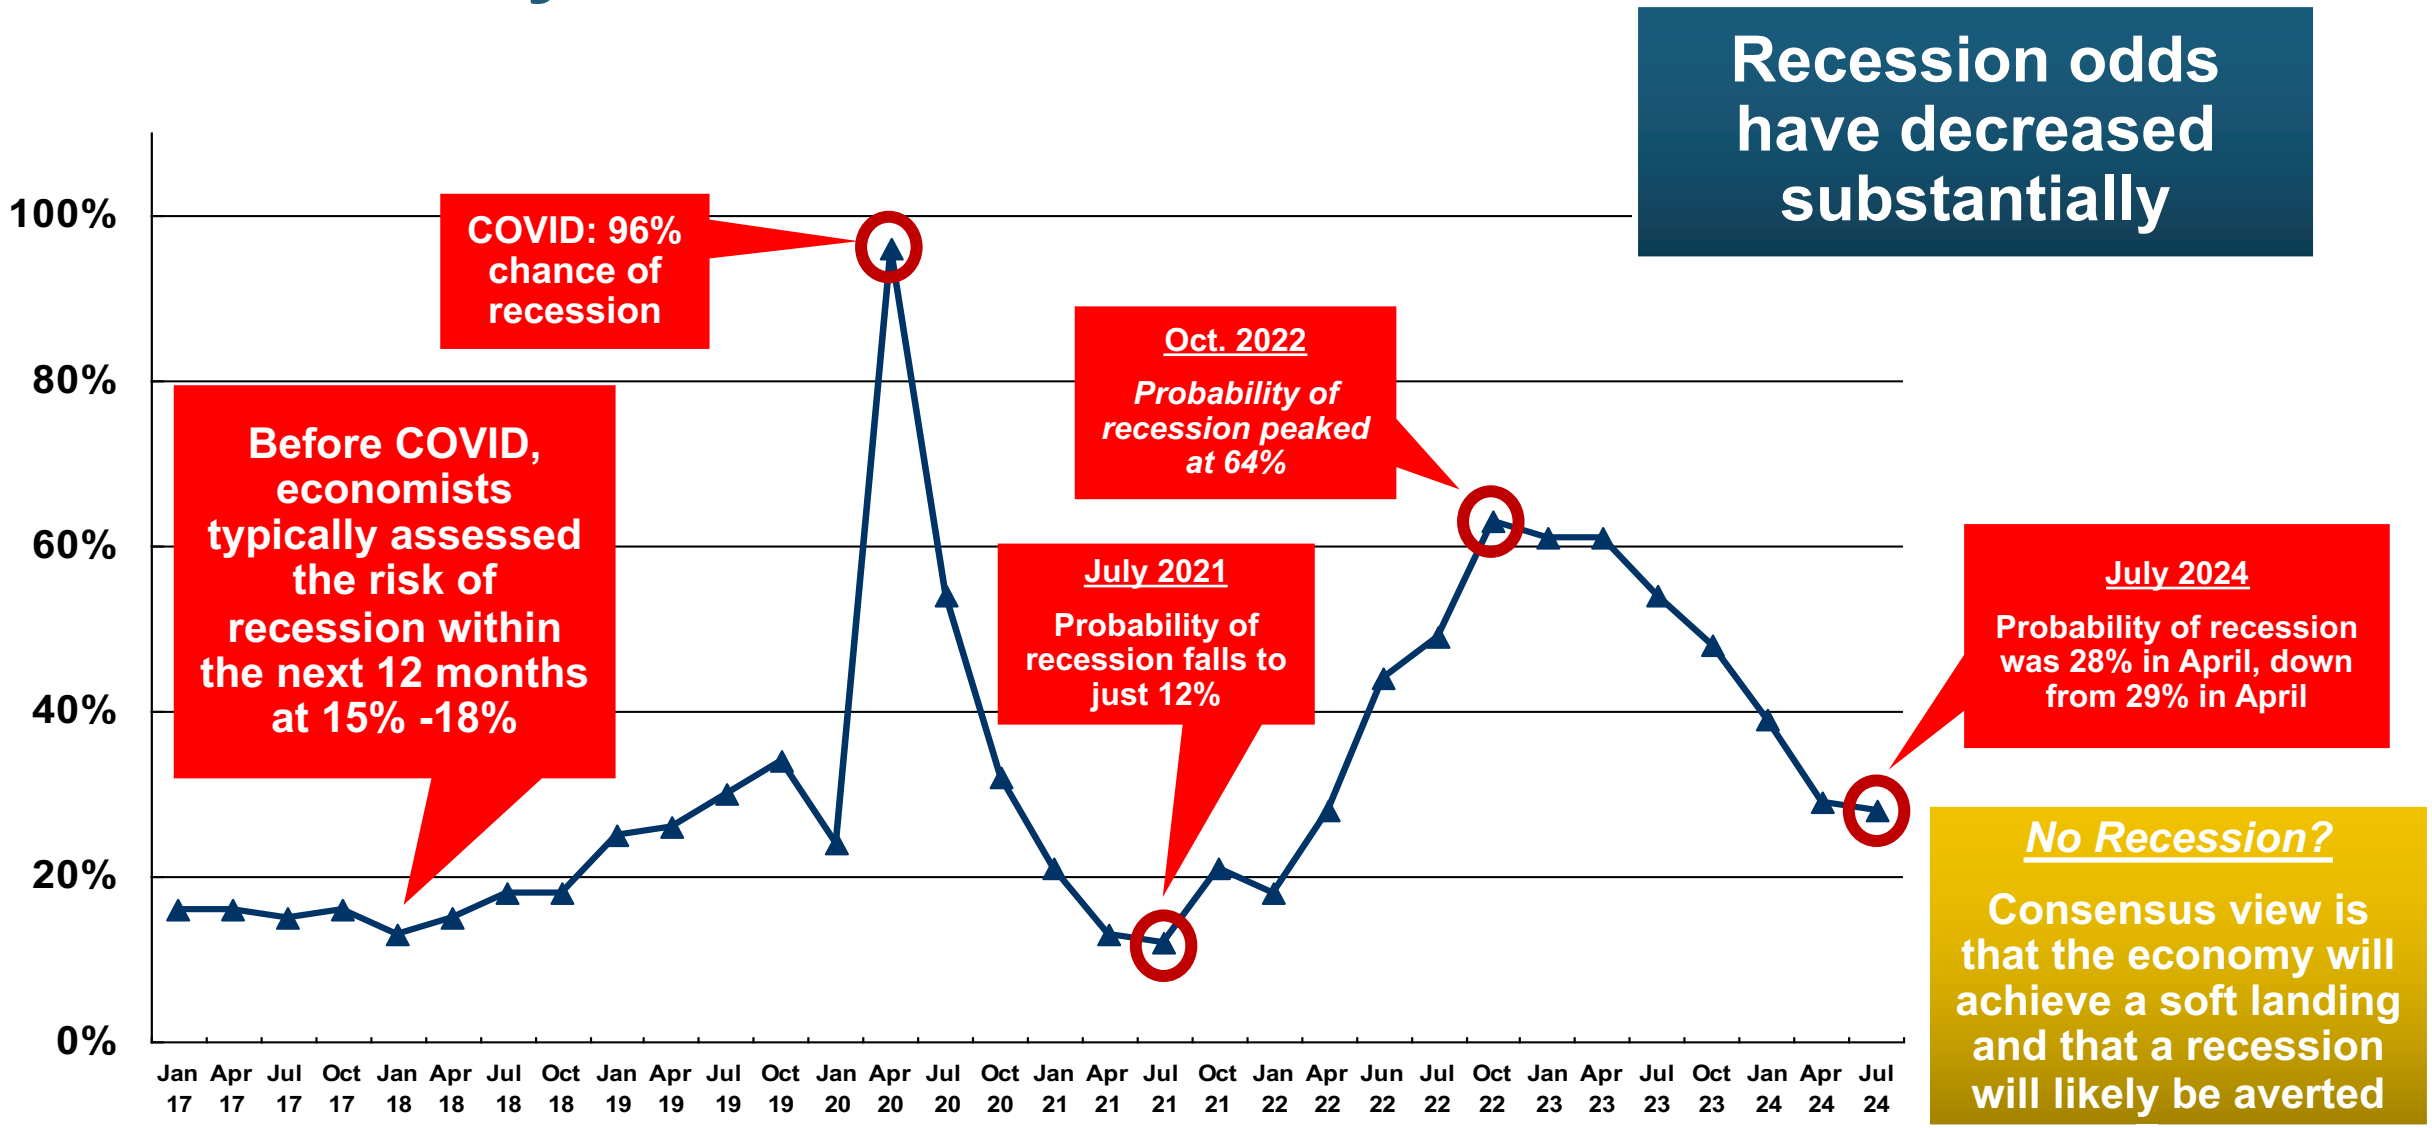
Sources: US Bureau of Economic Analysis at https://www.bea.gov/data/gdp/gdp-state; Risk and Uncertainty Management Center, University of South Carolina.

US Unemployment Rate Forecast: 2007:Q1–2025:Q4



Sources: US Bureau of Labor Statistics; Wells Fargo Securities (8/24 edition); Risk and Uncertainty Management Center, University of South Carolina.

Probability the U.S. Is in a Recession Within Next 12 Months: Jan. 2017 – July 2024*



*April 2024 survey included the responses of 75 economists.

Source: Wall Street Journal surveys of economists: https://www.wsj.com/economy/central-banking/where-do-economists-think-were-headed-these-are-their-predictions-b3db91ea?mod=hp_listb_pos1; Risk and Uncertainty Management Center, University of South Carolina.

Not All Recessions Are Created the Same – What Are the Possibilities Over the Next 12 Months?

A soft landing occurs when an economy sustains a mild slowdown whereby consumer and investment spending softens, but continues to register positive growth.

Soft Landing

A hard landing describes a recession with a sharp contraction in spending, resulting in many workers losing their jobs and companies significantly reducing their capital investments.

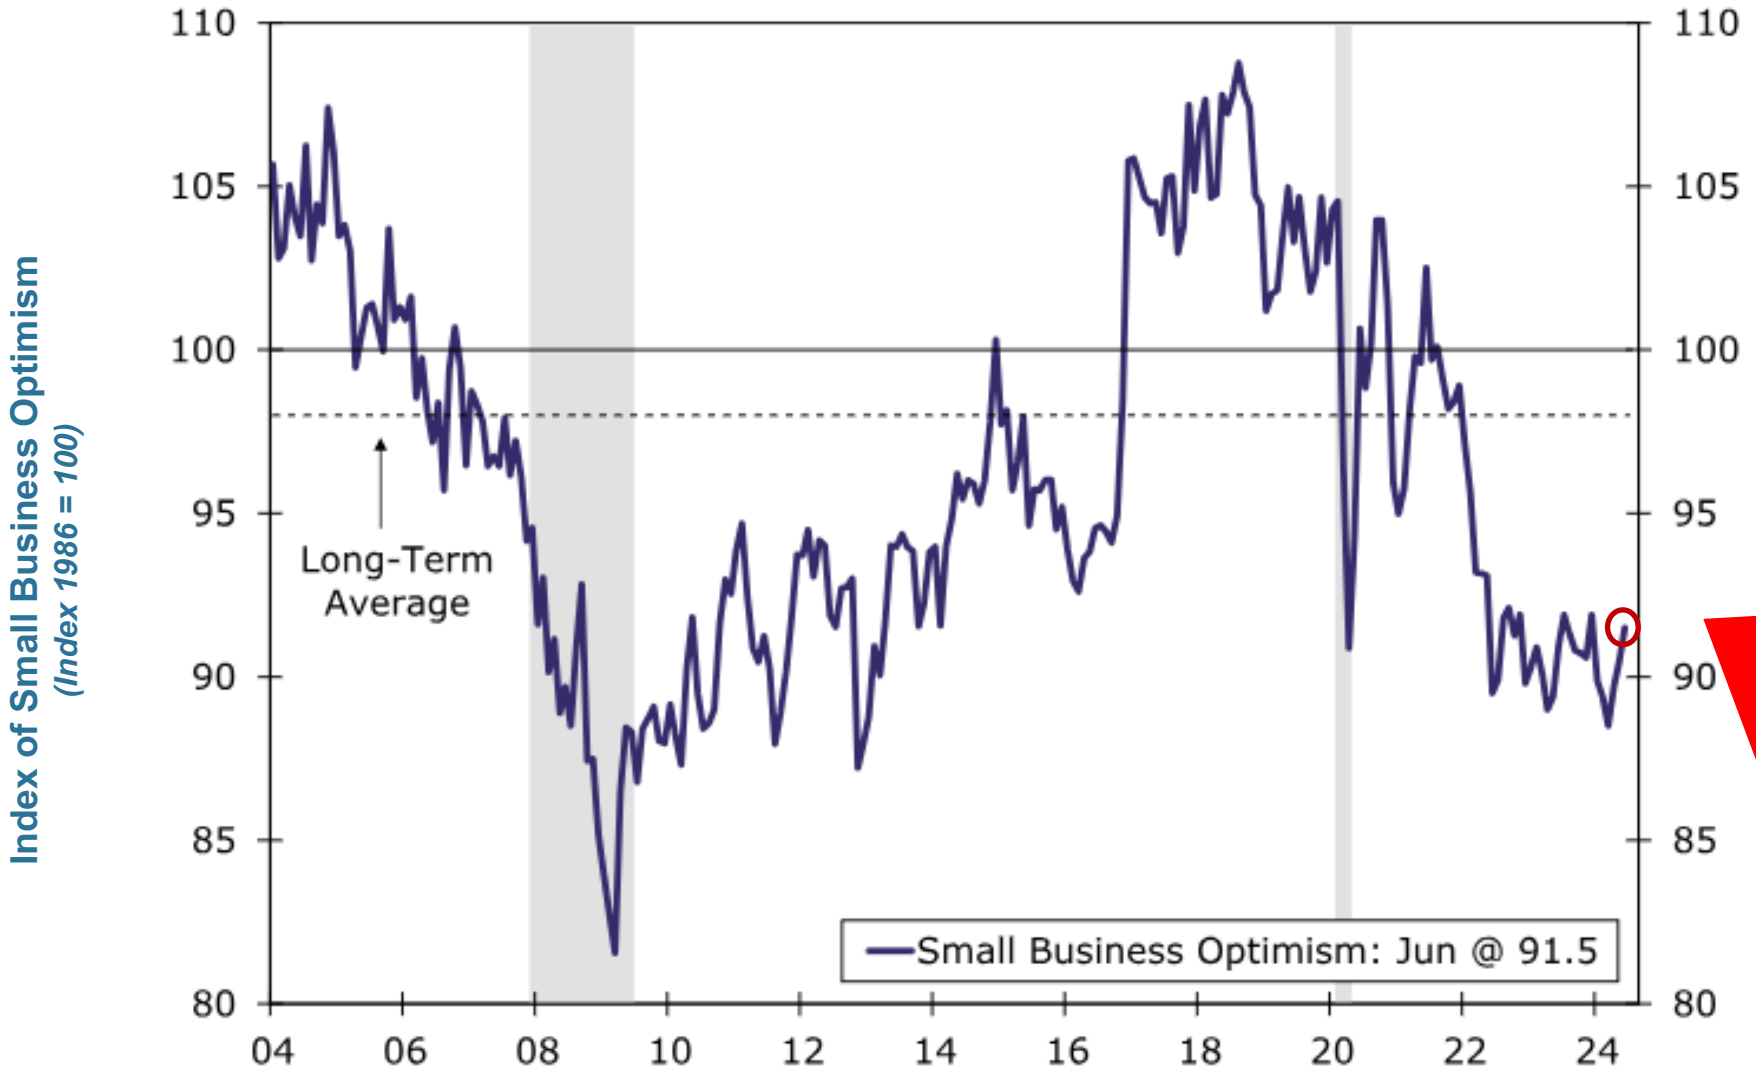
Hard Landing

In a "no landing" scenario, the economy averts a recession altogether.

No Landing

Source: Public Mutual; Univ. of South Carolina, Risk and Uncertainty Management Center.

Small Business Sentiment: Optimism Remains Low

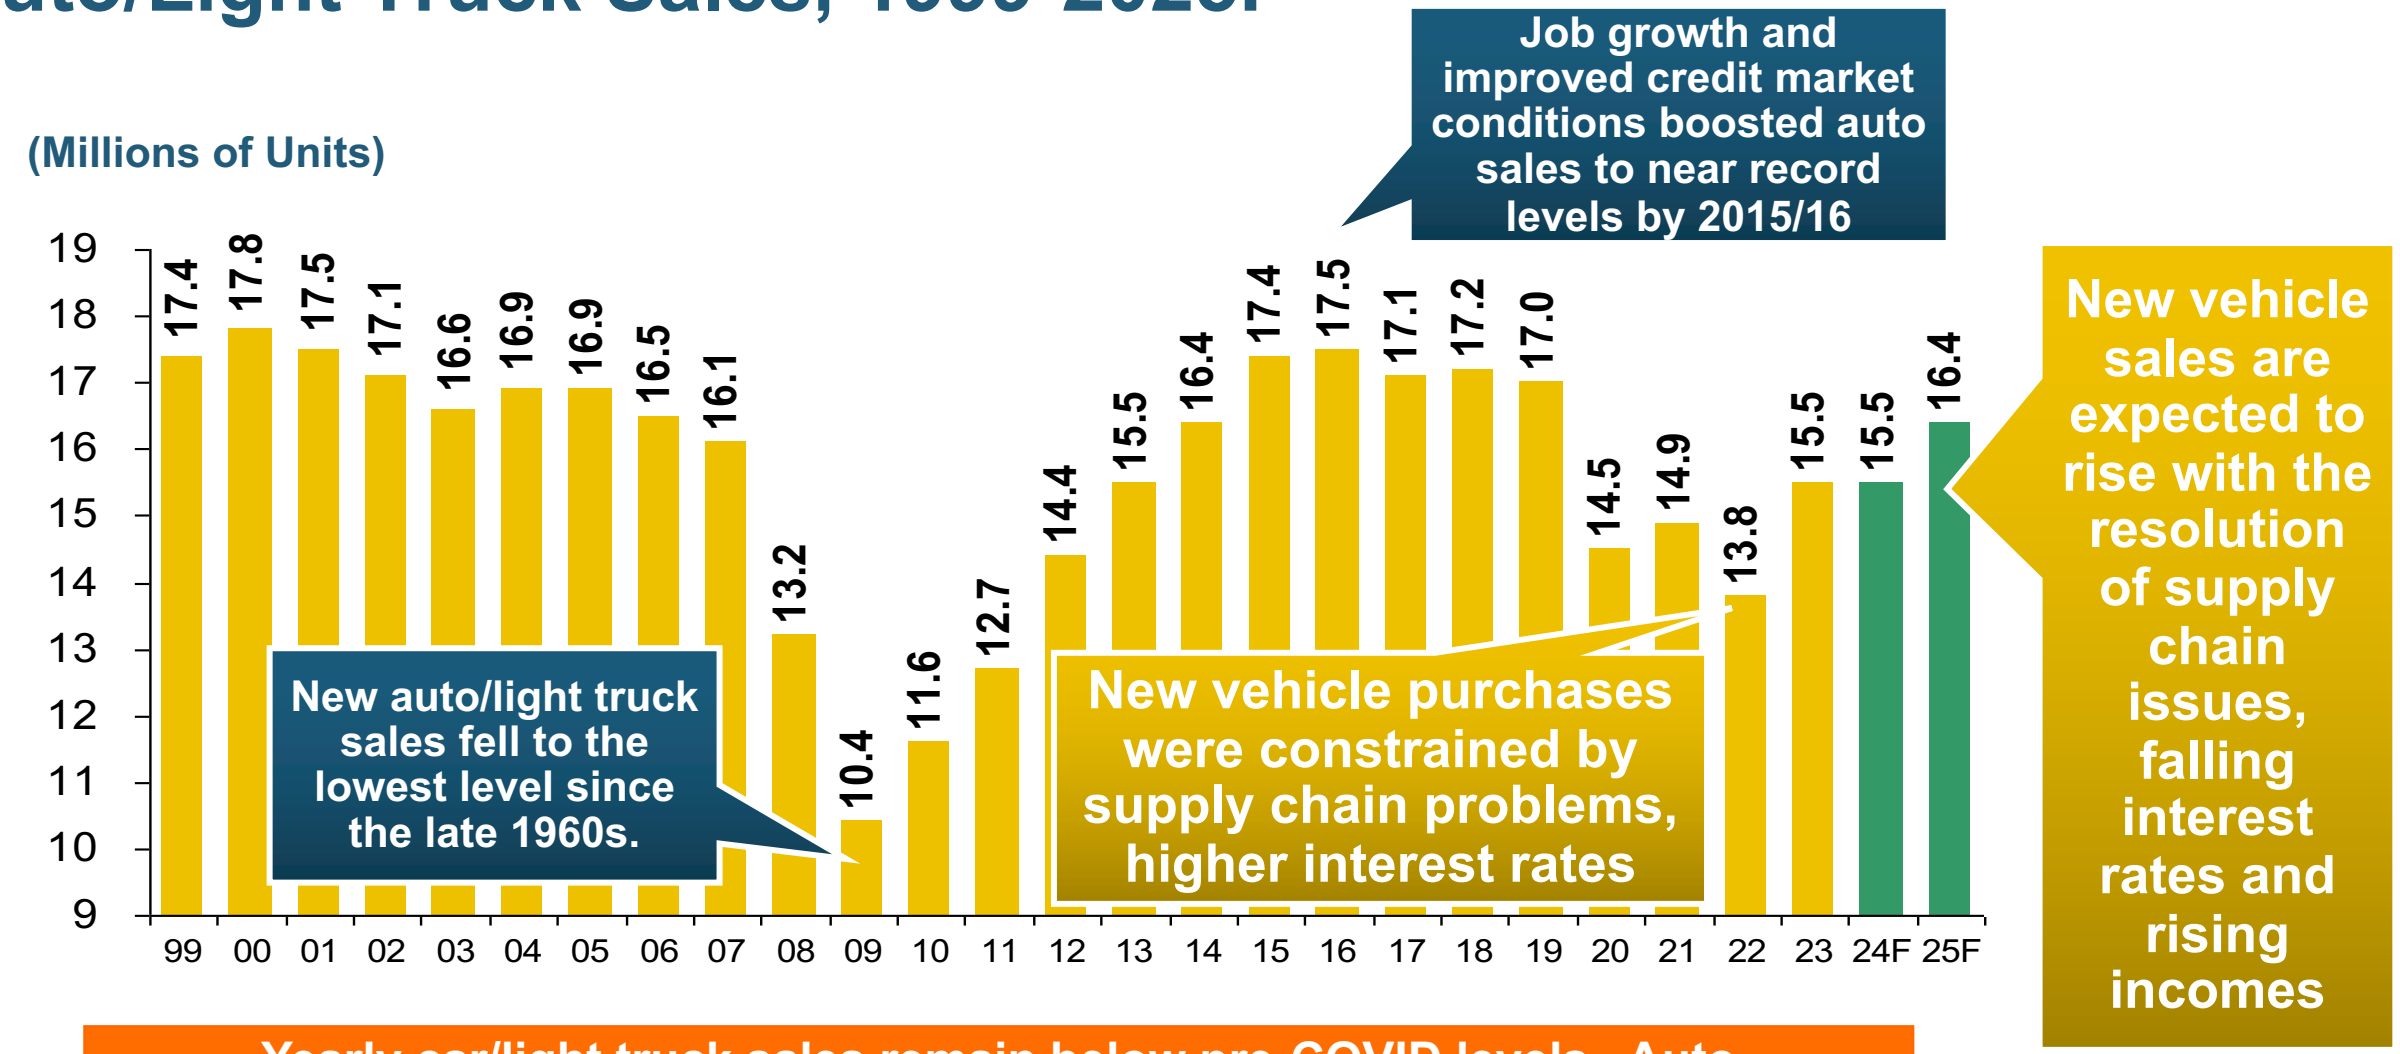


Small businesses today are even *more* pessimistic than they were during the depths of pandemic, despite strong spending by consumers, easing labor market issues, lower inflation and receding odds of a recession.

Business owner concerns include inflation, labor quality and cost, taxes and regulation

Source: NFIB and Wells Fargo Economics.

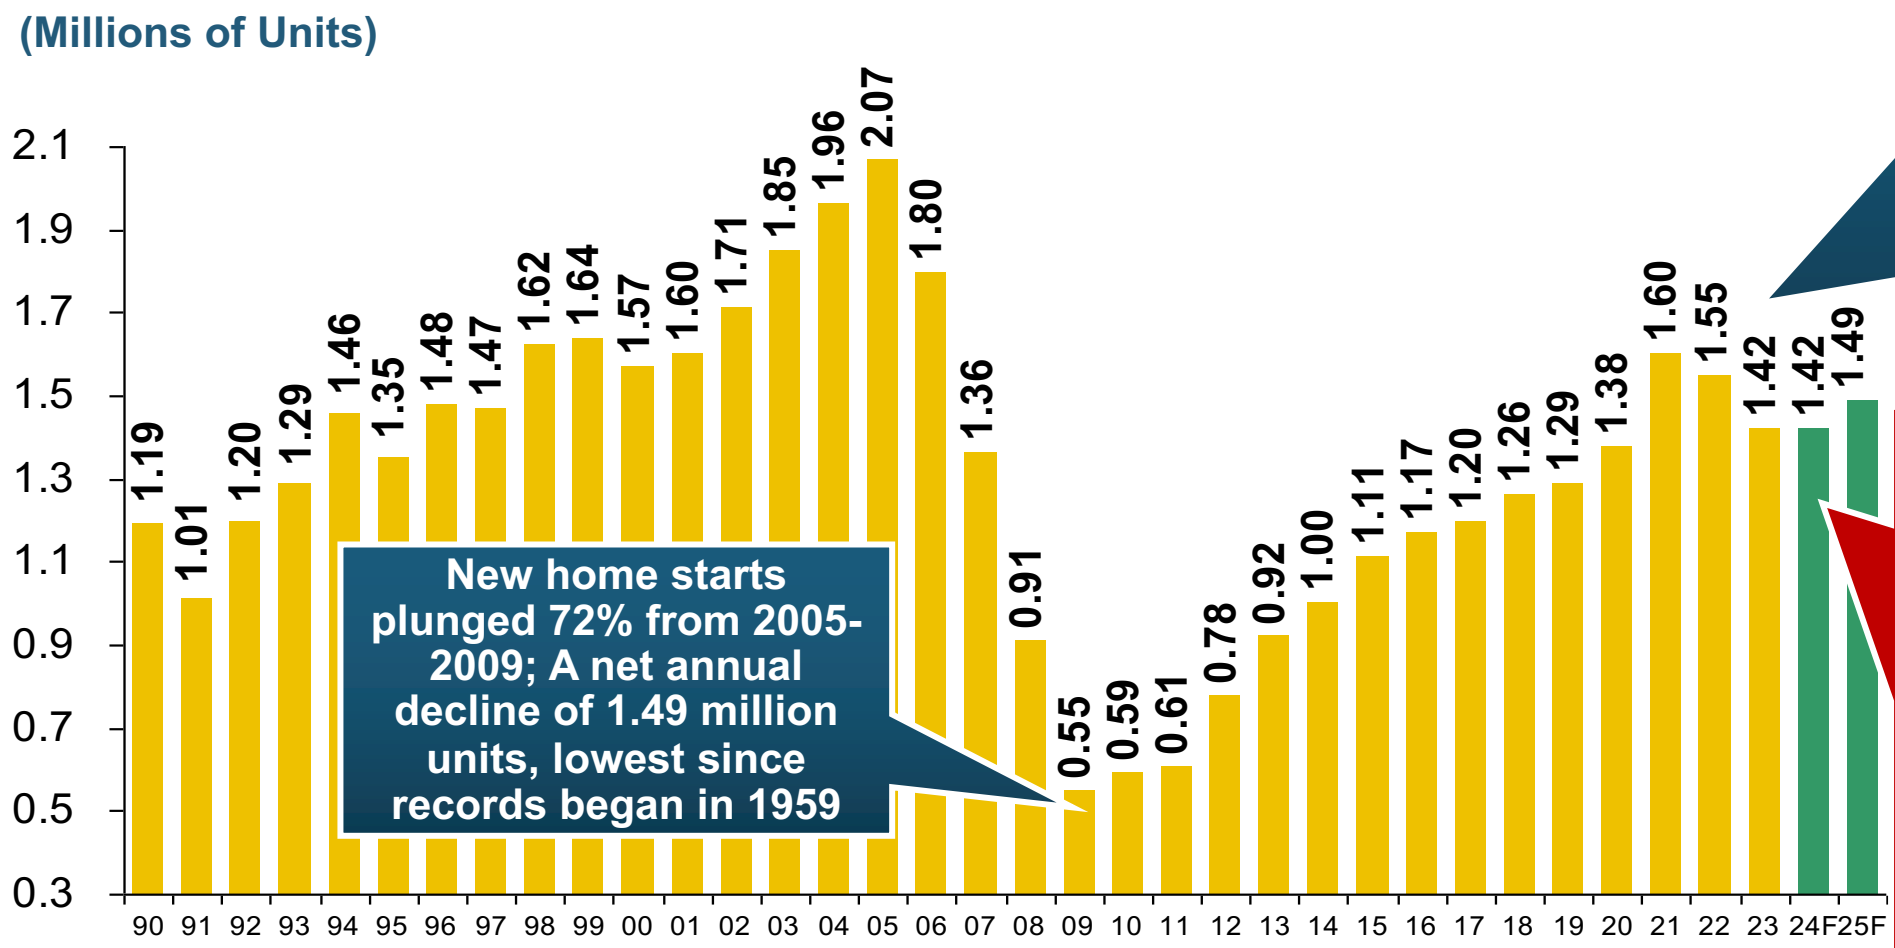
Auto/Light Truck Sales, 1999-2025F



Yearly car/light truck sales remain below pre-COVID levels. Auto manufacturer supply chain issues are largely resolved and both supply and demand for vehicles are projected to increase in 2024-25

Source: U.S. Department of Commerce; Wells Fargo Securities (8/24 for 2023F-25F); Univ. of South Carolina, Center for Risk and Uncertainty Management..

New Private Housing Starts, 1990-2025F



Job growth, low inventories of existing homes, low mortgage interest rates and demographics propelled new home construction into 2022, though materials prices, supply chain problems, lack of labor were headwinds

High prices, rising mortgage rates, tempered new home construction activity through 2023, though low inventory of existing homes is propping up demand. Falling mortgage rates should prop up demand by late 2024 and into 2025

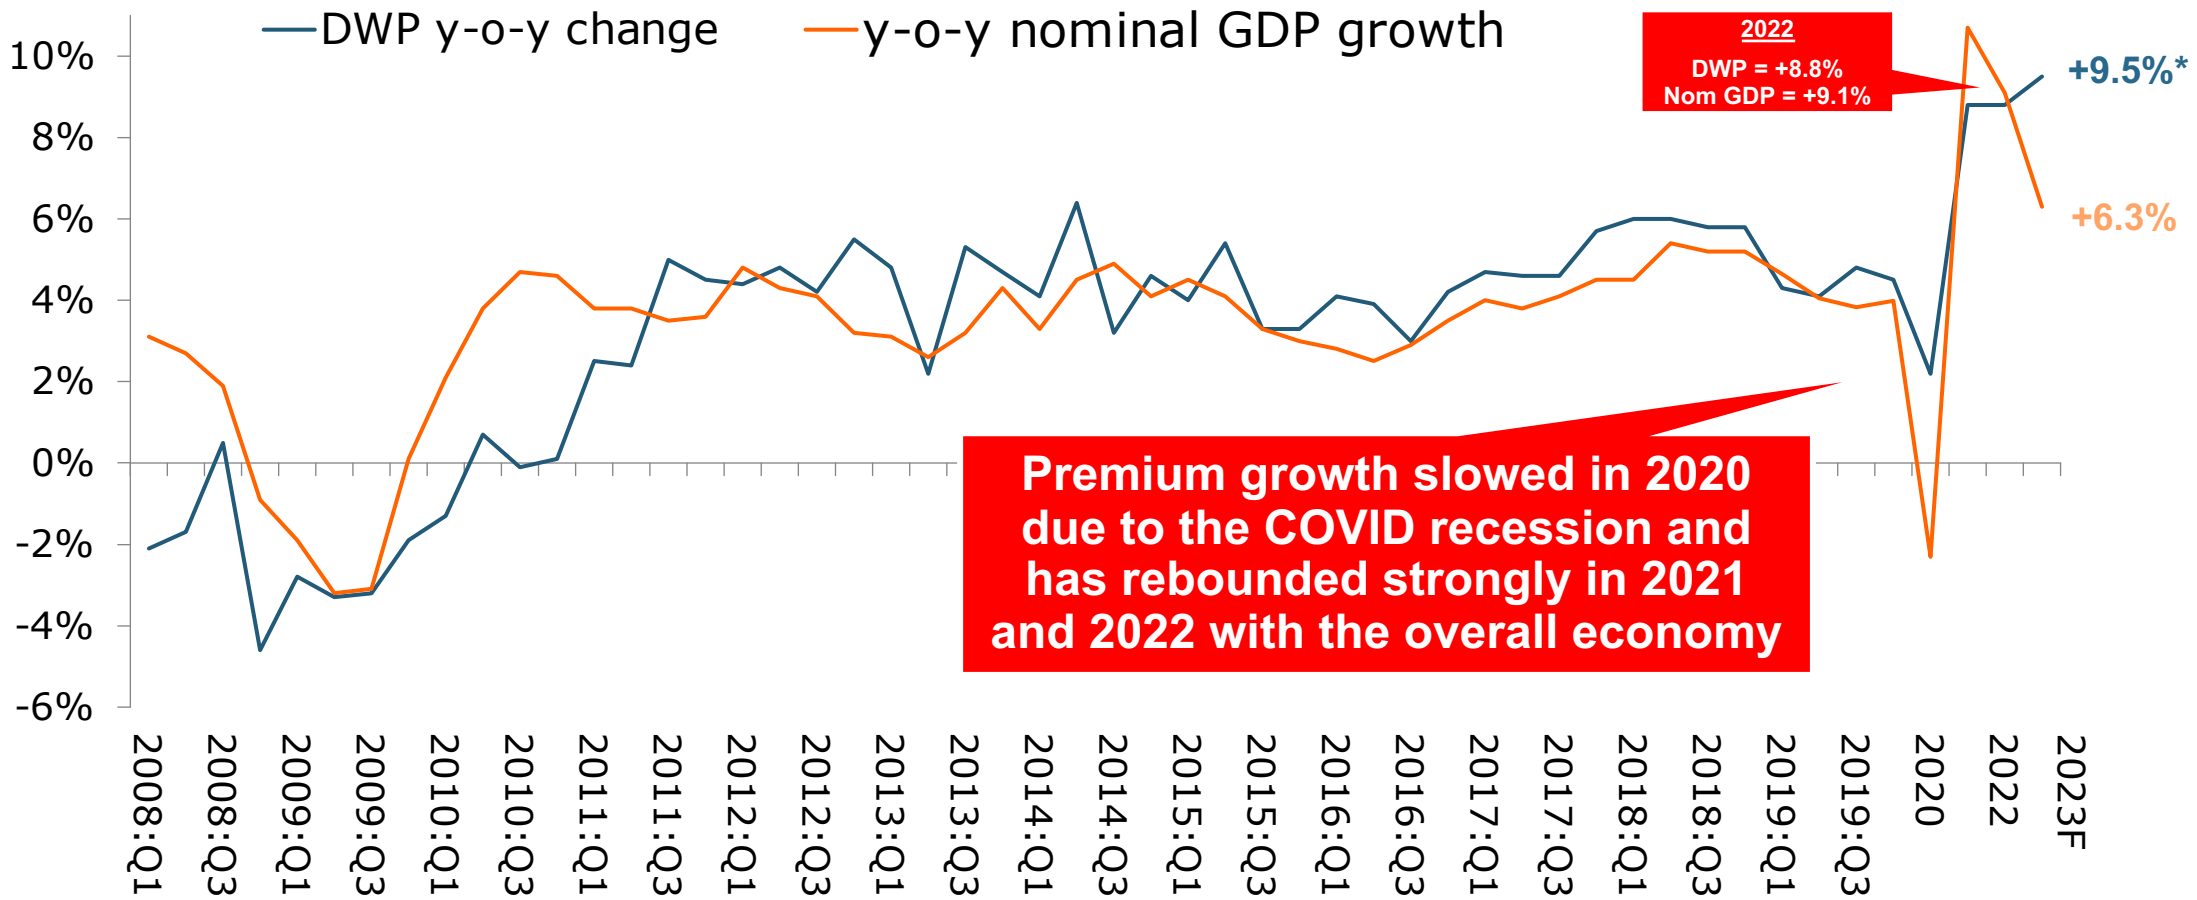
No Repeat of the Housing Collapse that Began in 2007

Insurers Are Continue to See Meaningful Exposure Growth in the Homeowners Line as well as Lines Associated with Home Construction: Construction Risk Exposure, Surety, Commercial Auto; Potent Driver of Workers Comp Exposure

Source: U.S. Department of Commerce; Wells Fargo Securities (8/24 for 2023F-25F); Univ. of South Carolina, Center for Risk and Uncertainty Management..

The Economy Drives P/C Insurance Industry Premiums: 2006:Q1–2023F*

Direct Premium Growth (All P/C Lines) vs. Nominal GDP: Quarterly Y-o-Y Pct. Change



Premium growth slowed in 2020 due to the COVID recession and has rebounded strongly in 2021 and 2022 with the overall economy

Direct written premiums track nominal GDP fairly tightly over time, suggesting the P/C insurance industry's growth prospects inextricably linked to economic performance.

*2020-23F figures are annual.

The Inflation Threat

Inflation Has Been the #1 Concern of U.S. Consumers and Corporations…

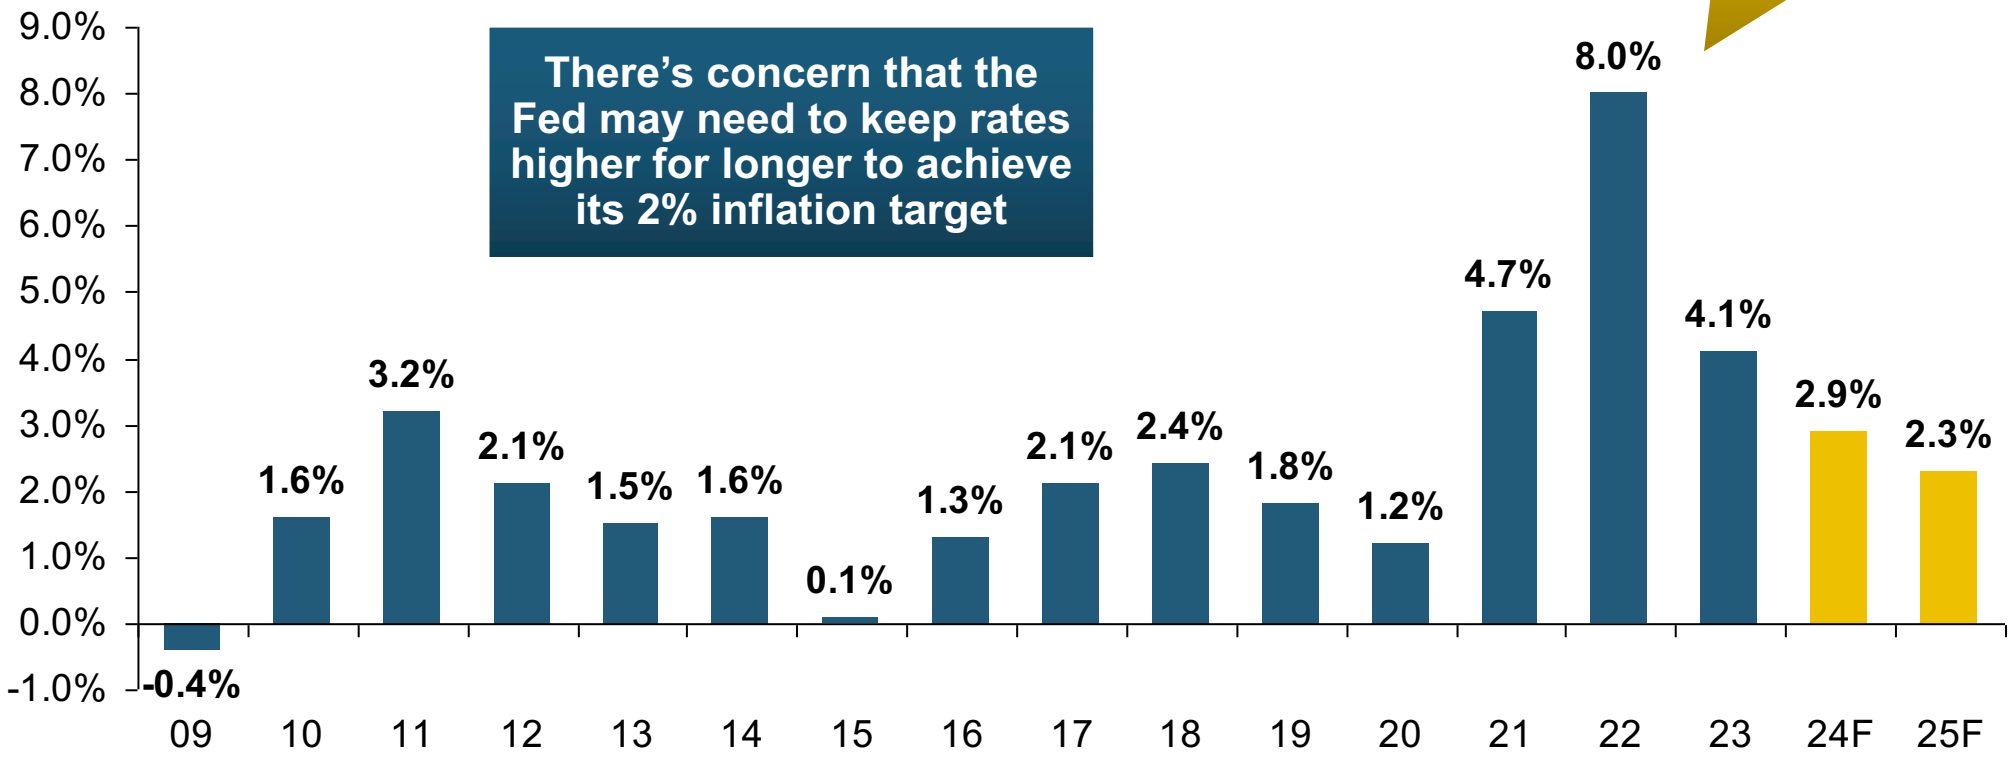
And a Major Concern of Insurers

Is the Threat Finally Subsiding?

U.S. Inflation Rate: 2009-2025F*

Inflation accelerated sharply in 2021 before peaking at 9.1% in June 2022. Inflation was nearly halved in 2023 and should continue to moderate through 2024/25

Percentage Change (%)



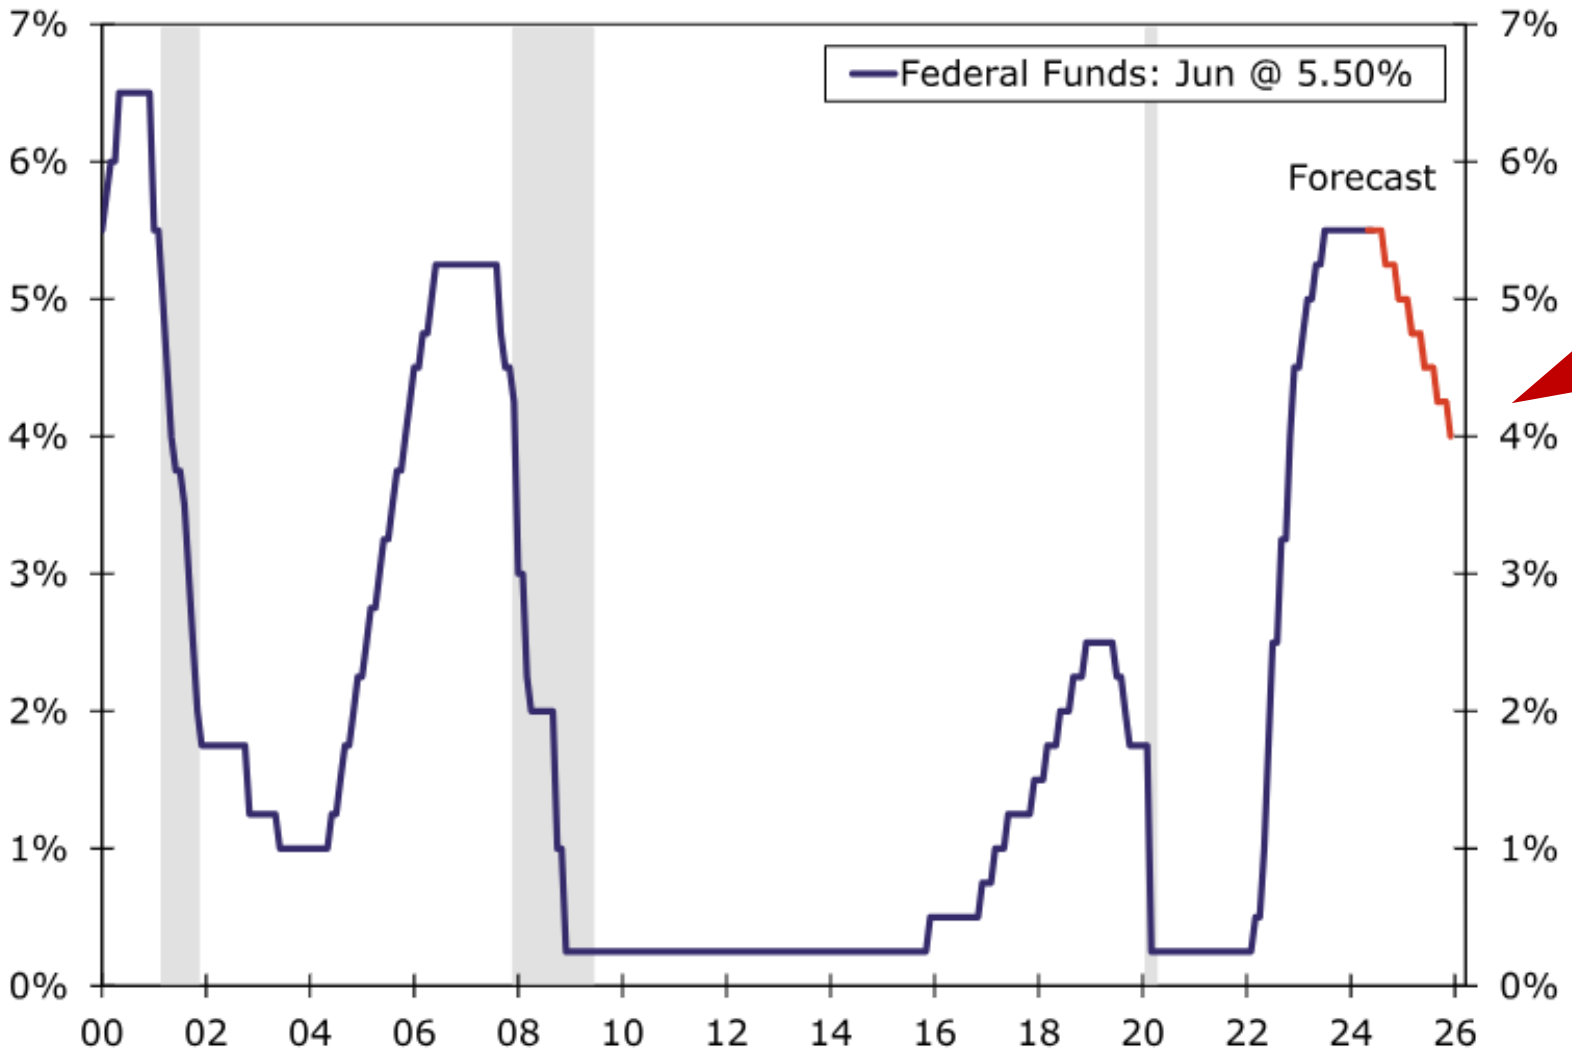
Insurer Concerns About Inflation

- Rate Inadequacy
- Reserve Inadequacy
- Insurance-to-Value

*Annual change in Consumer Price Index for All Urban Consumers (CPI-U).

Source: U.S. Bureau of Labor Statistics; Wells Fargo Securities (8/24); USC Center for Risk and Uncertainty Management.

Federal Funds Target Rate, 2000 – 2025F



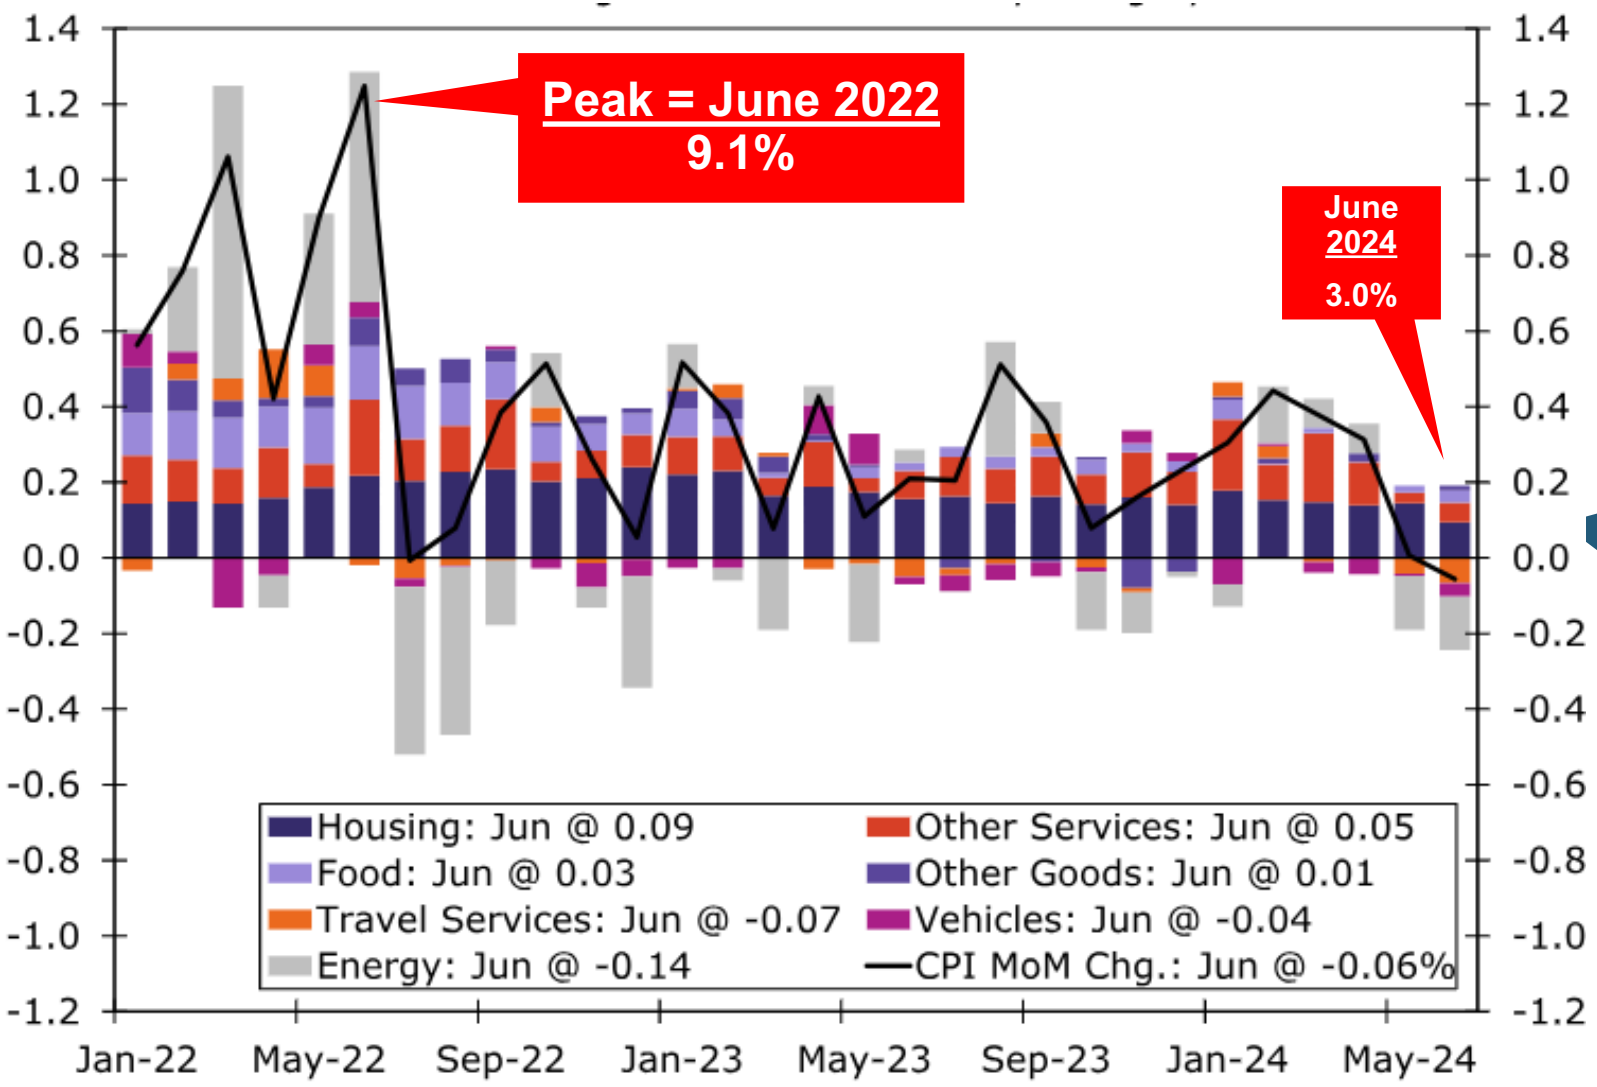
Consensus view is that the Fed will begin to cut rates at its September 18 meeting…

2024: 50bps

2025: 100bps

Source: Federal Reserve Board and Wells Fargo Securities.

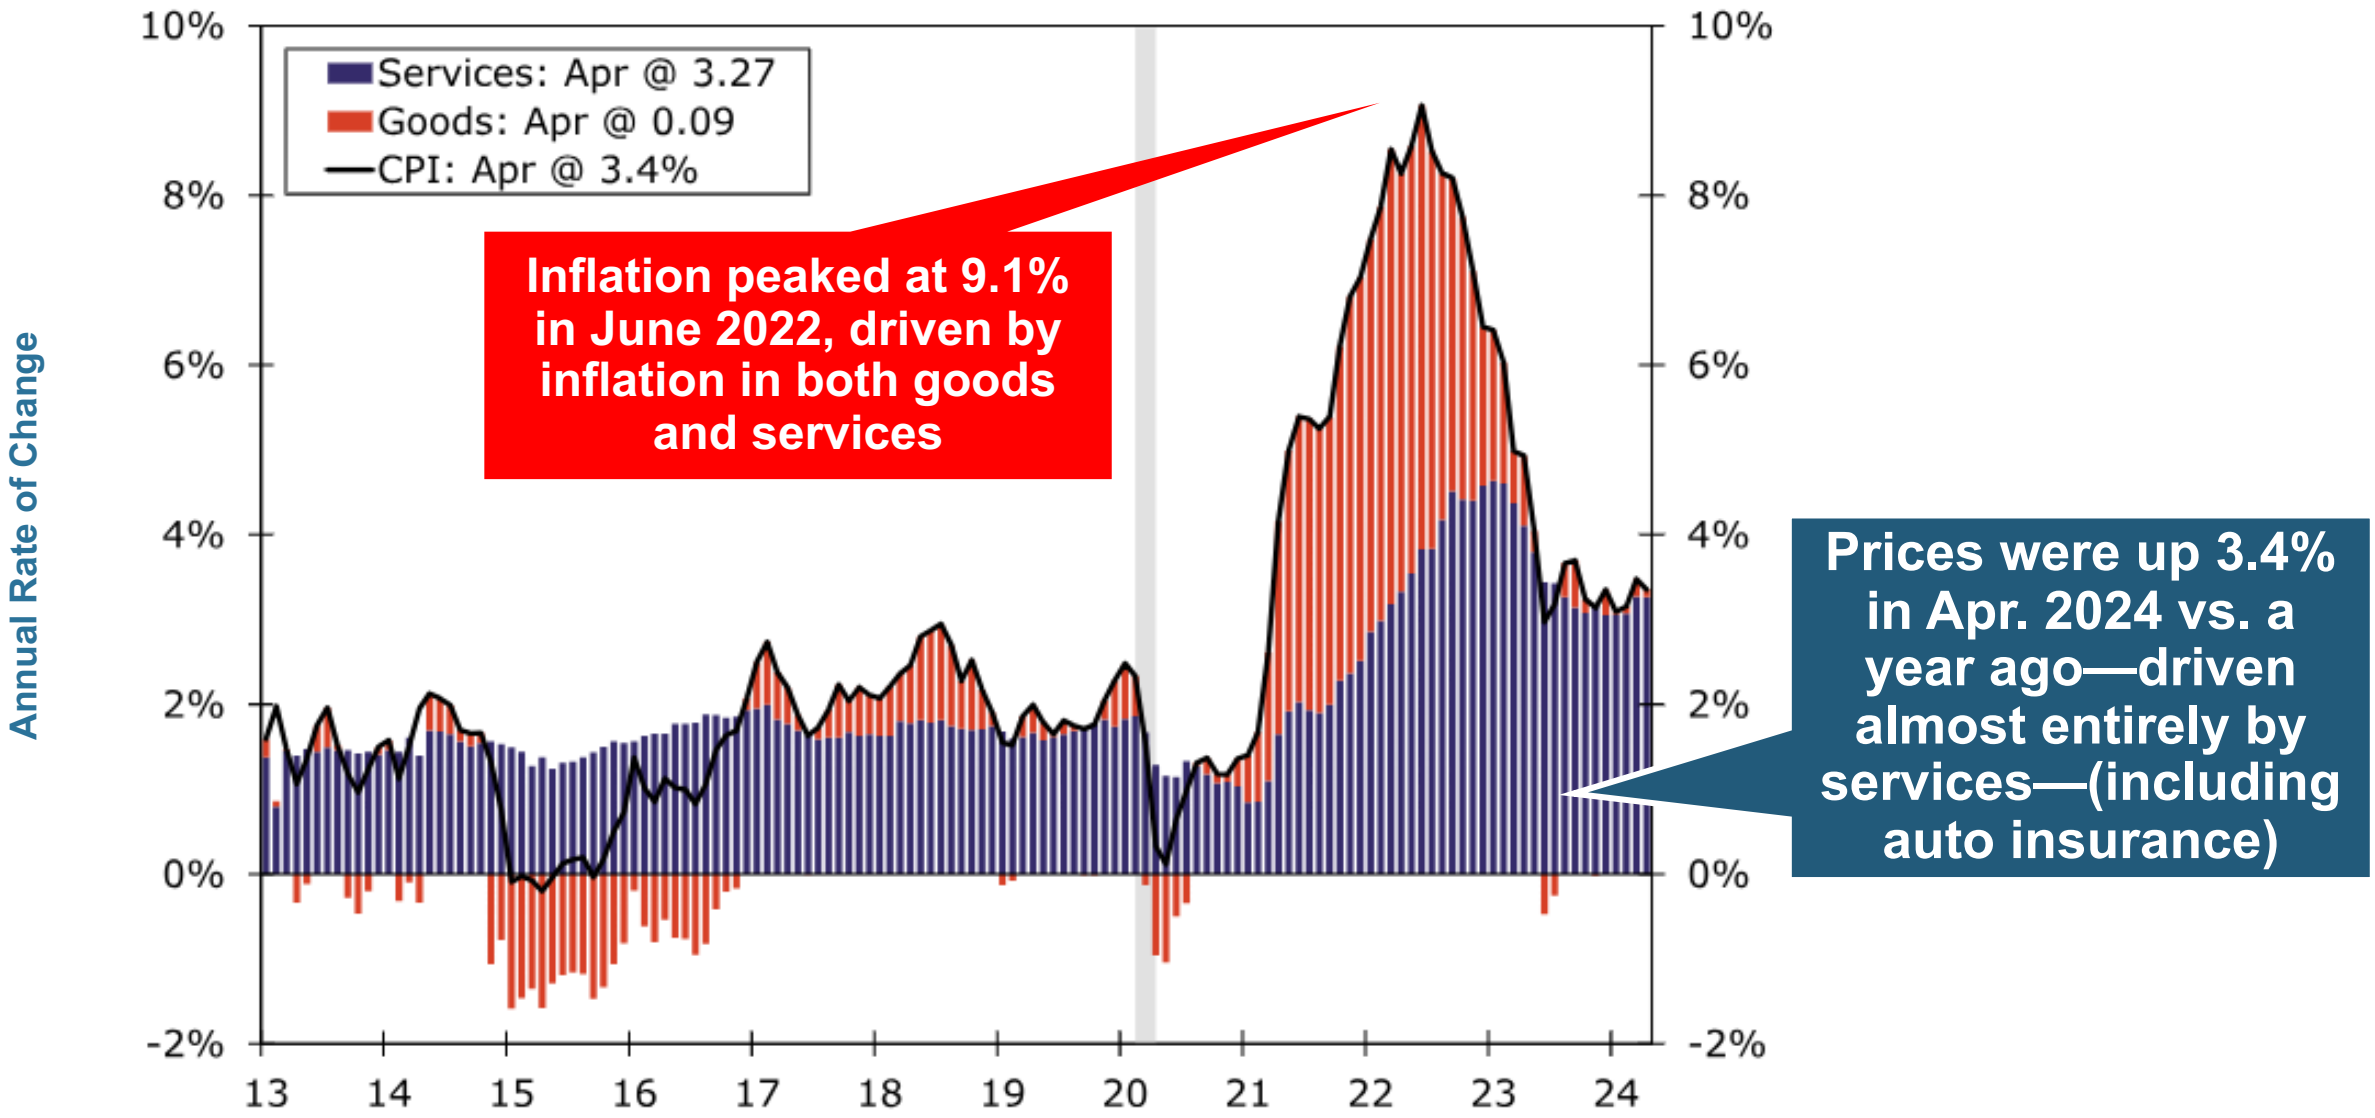
Contribution to CPI by Category: Jan. 2020 – June 2024



Prices were up 3.0% in June 2024 vs. a year ago—the smallest increase since Jan. 2021—and down from the June 2022 peak of 9.1%. Increases in Shelter (Housing), Food and Other Services (which includes auto insurance) are the most significant obstacles to bringing inflation down to the Fed's 2% goal

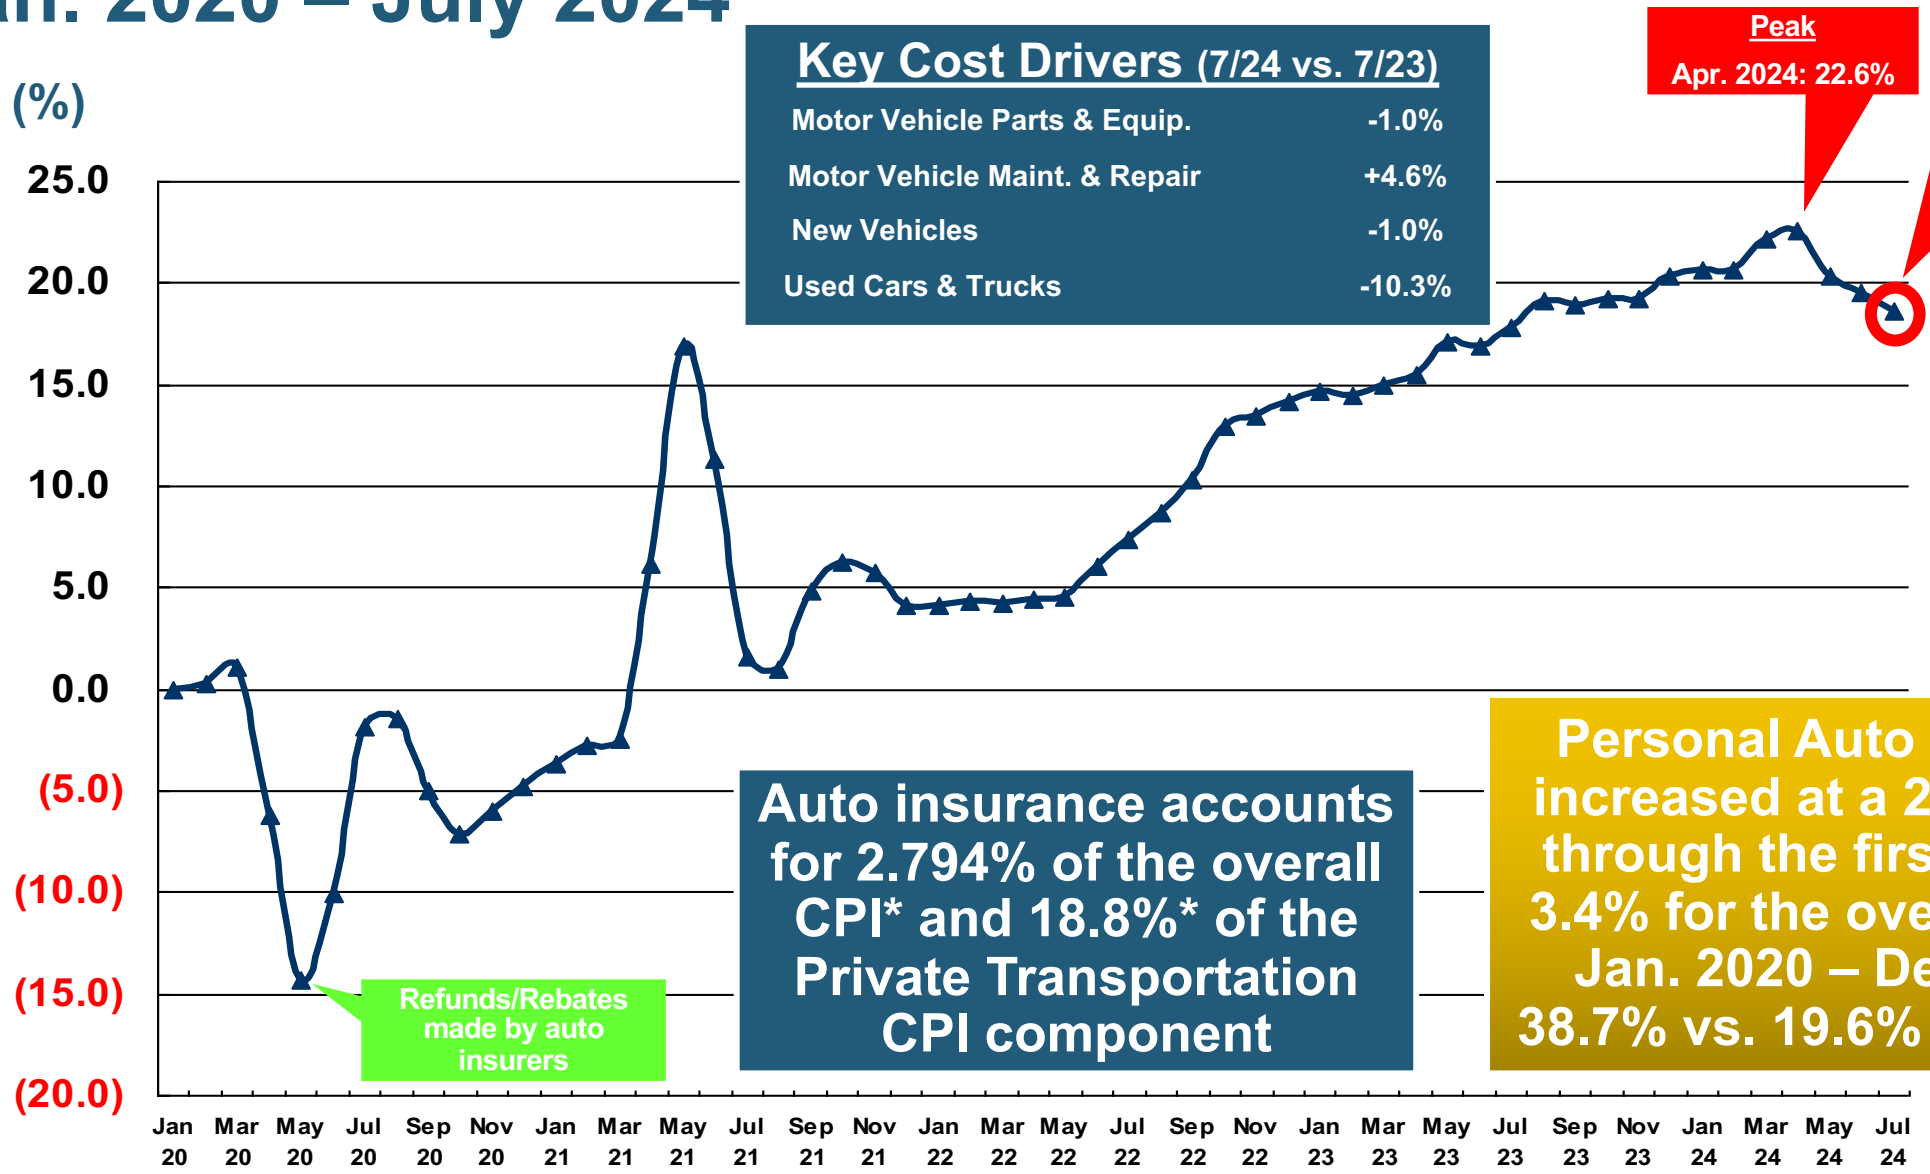
Source: U.S. Department of Commerce and Wells Fargo Economics.

Contribution to CPI, Goods vs. Services, Apr. 2024



Source: U.S. Department of Commerce and Wells Fargo Economics.

CPI for Motor Vehicle Insurance, 12-Month Change: Jan. 2020 – July 2024



Key Cost Drivers (7/24 vs. 7/23)

Motor Vehicle Parts & Equip.	-1.0%
Motor Vehicle Maint. & Repair	+4.6%
New Vehicles	-1.0%
Used Cars & Trucks	-10.3%

- The auto insurance component of the Consumer Price Index in July was up 18.6%
- While still high, the increase is the smallest since July 2023 and well below the 22.6% peak in April 2024
- The July reading reaffirms that a sustained deceleration in auto insurance price increases is underway
- Moderation in key auto insurance cost drivers bodes well for continued deceleration in auto insurance costs

Auto insurance accounts for 2.794% of the overall CPI* and 18.8%* of the Private Transportation CPI component

Personal Auto Insurance prices increased at a 21.0% annual pace through the first half of 2024 (vs. 3.4% for the overall CPI) and from Jan. 2020 – Dec. 2023 were up 38.7% vs. 19.6% for the overall CPI

*Weighting as of Dec. 2023: https://www.bls.gov/cpi/factsheets/motor-vehicle-insurance.htm

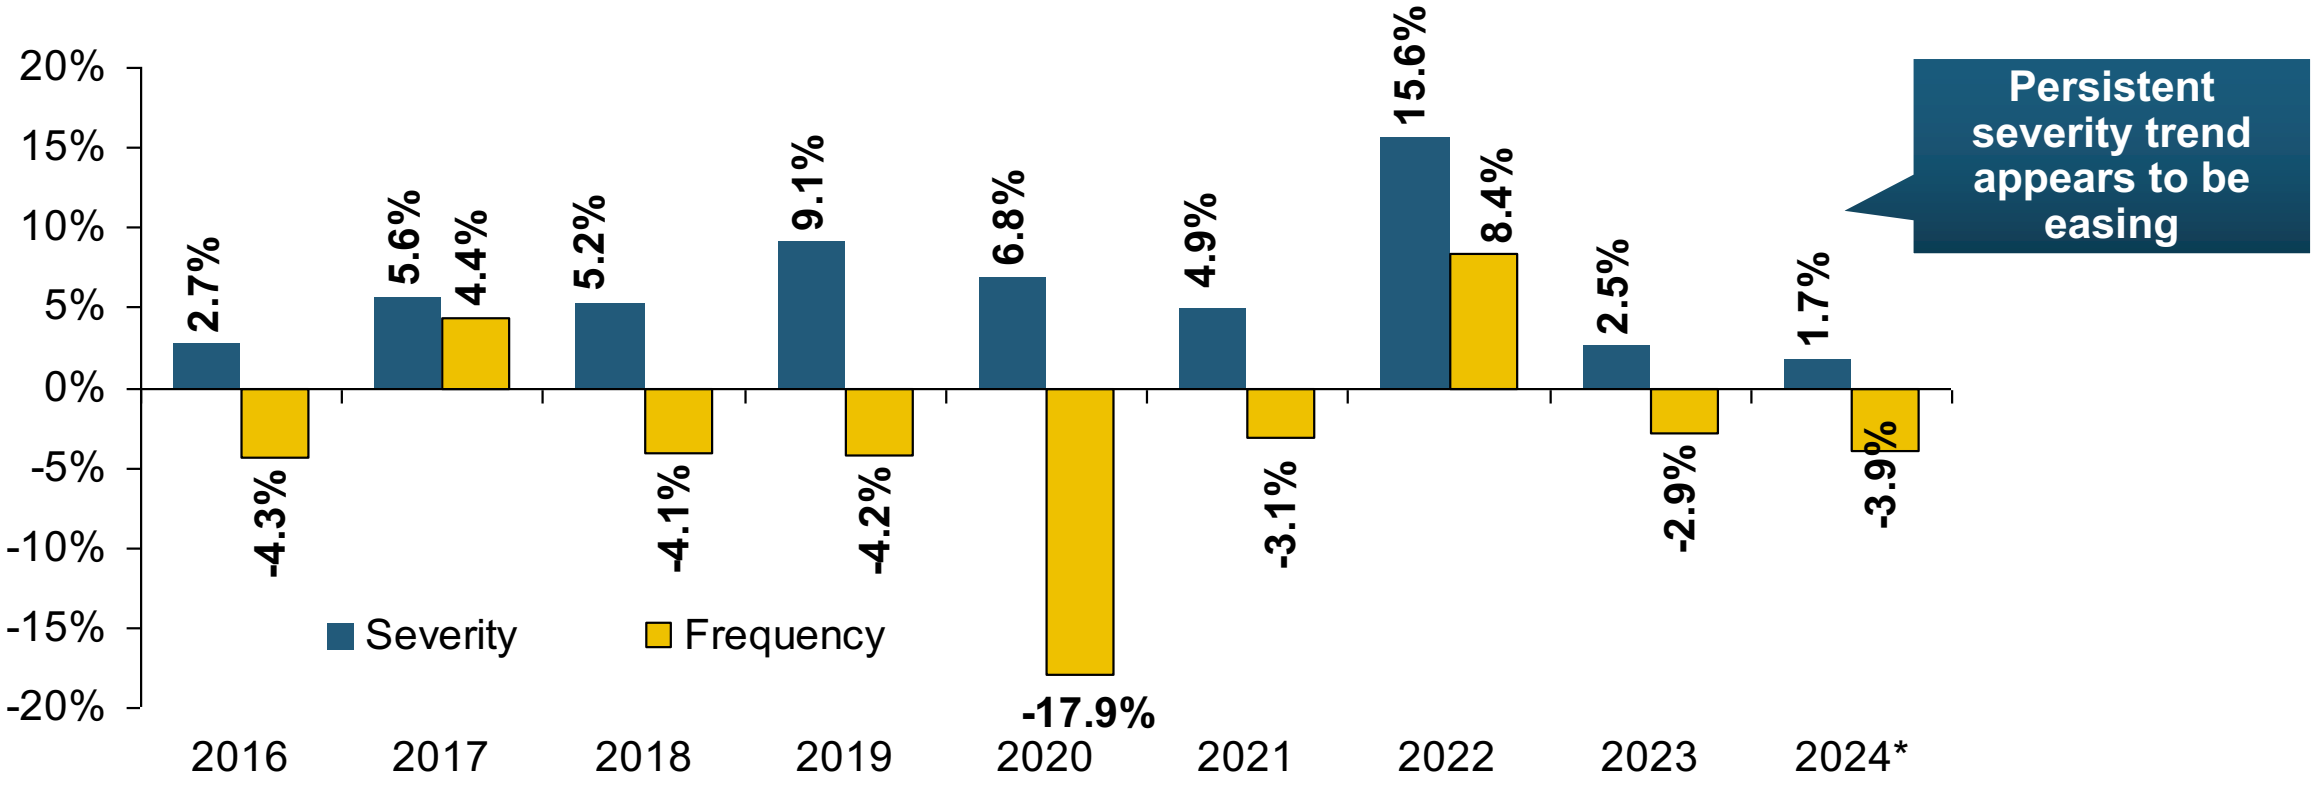
U.S. Private Passenger Auto Frequency & Severity Trends

Frequency, Severity and Loss Ratio Trends Are Adverse

Inflation is a Major Driver

South Carolina Personal Auto: BI Severity Up, Frequency Recovering As State Emerges from the Pandemic*

Annual Change, 2016 through 2024*

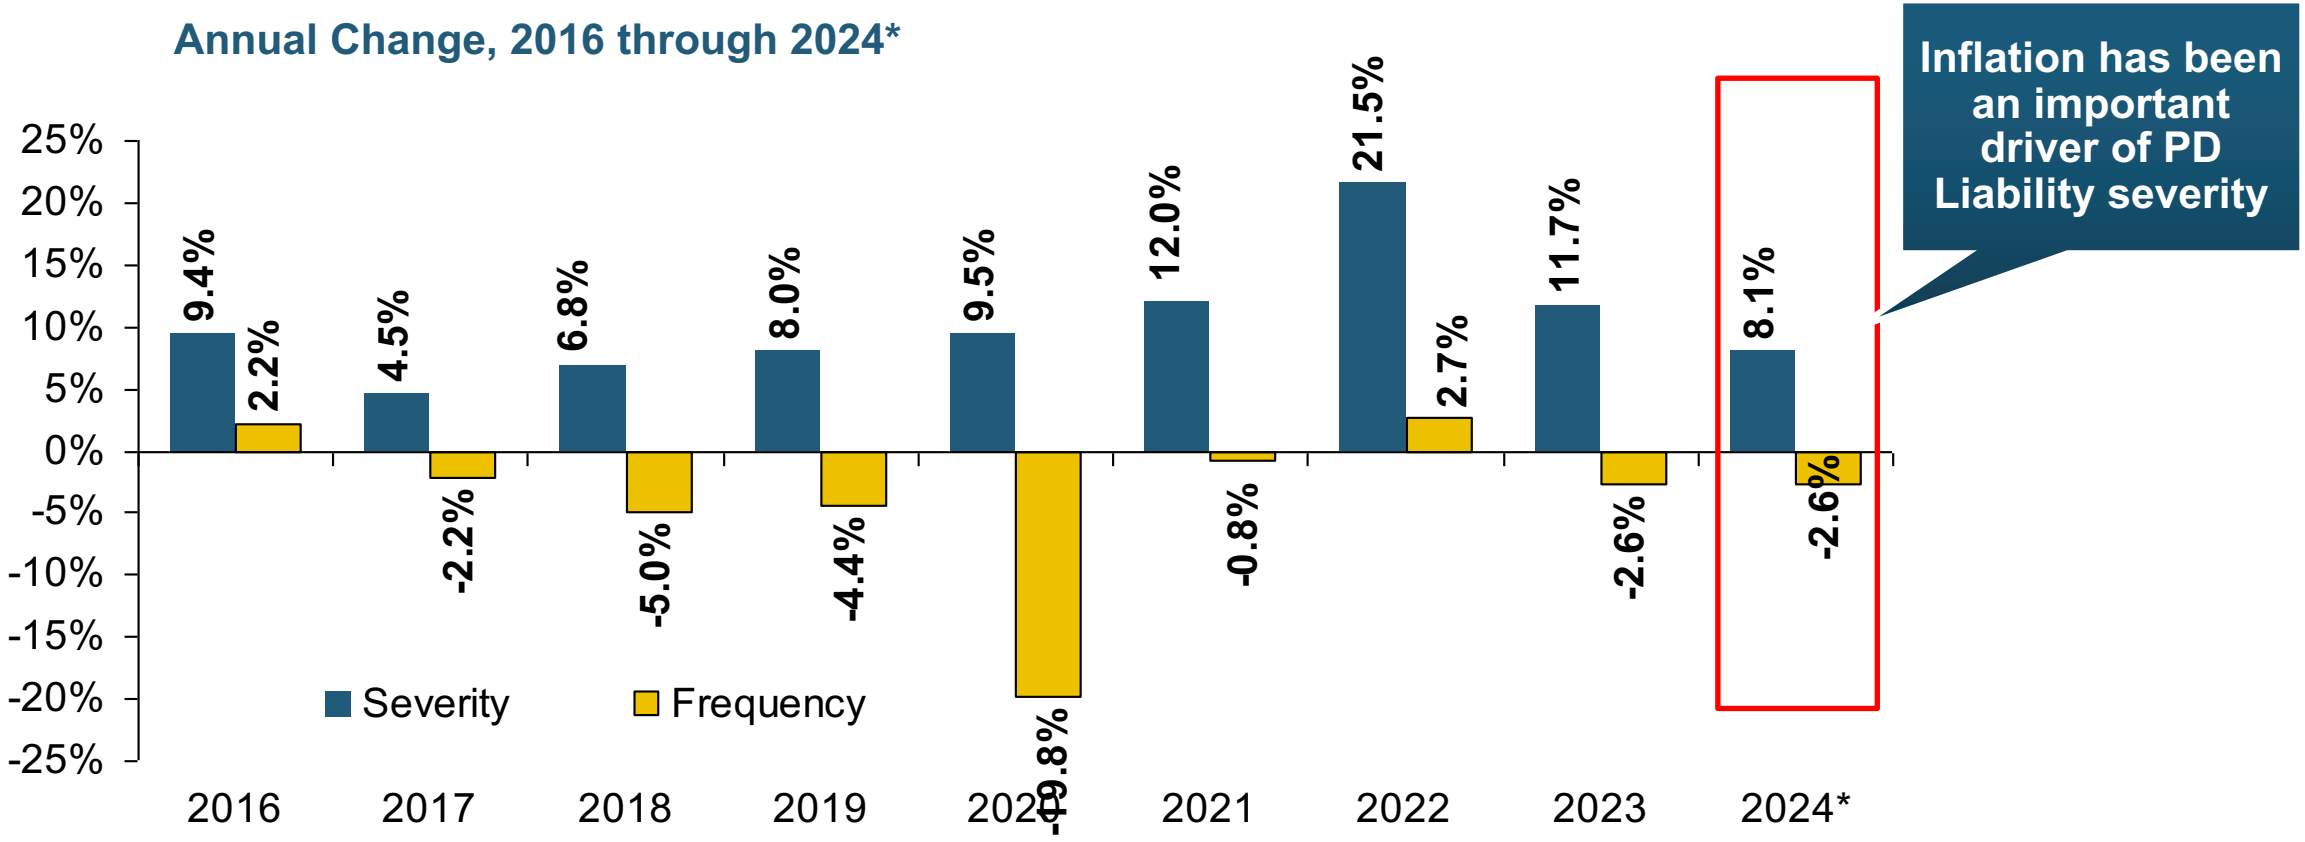


BI Severity Is Rising. Frequency will Likely Rise and Return to Pre-COVID Levels

*2024 data are for the 4 quarters ending March 31, 2024.

Source: ISO/PCI *Fast Track* data; Risk and Uncertainty Management Center, University of South Carolina.

South Carolina Personal Auto: Prop. Damage Liability Frequency Flat As Severity Trends Upward*



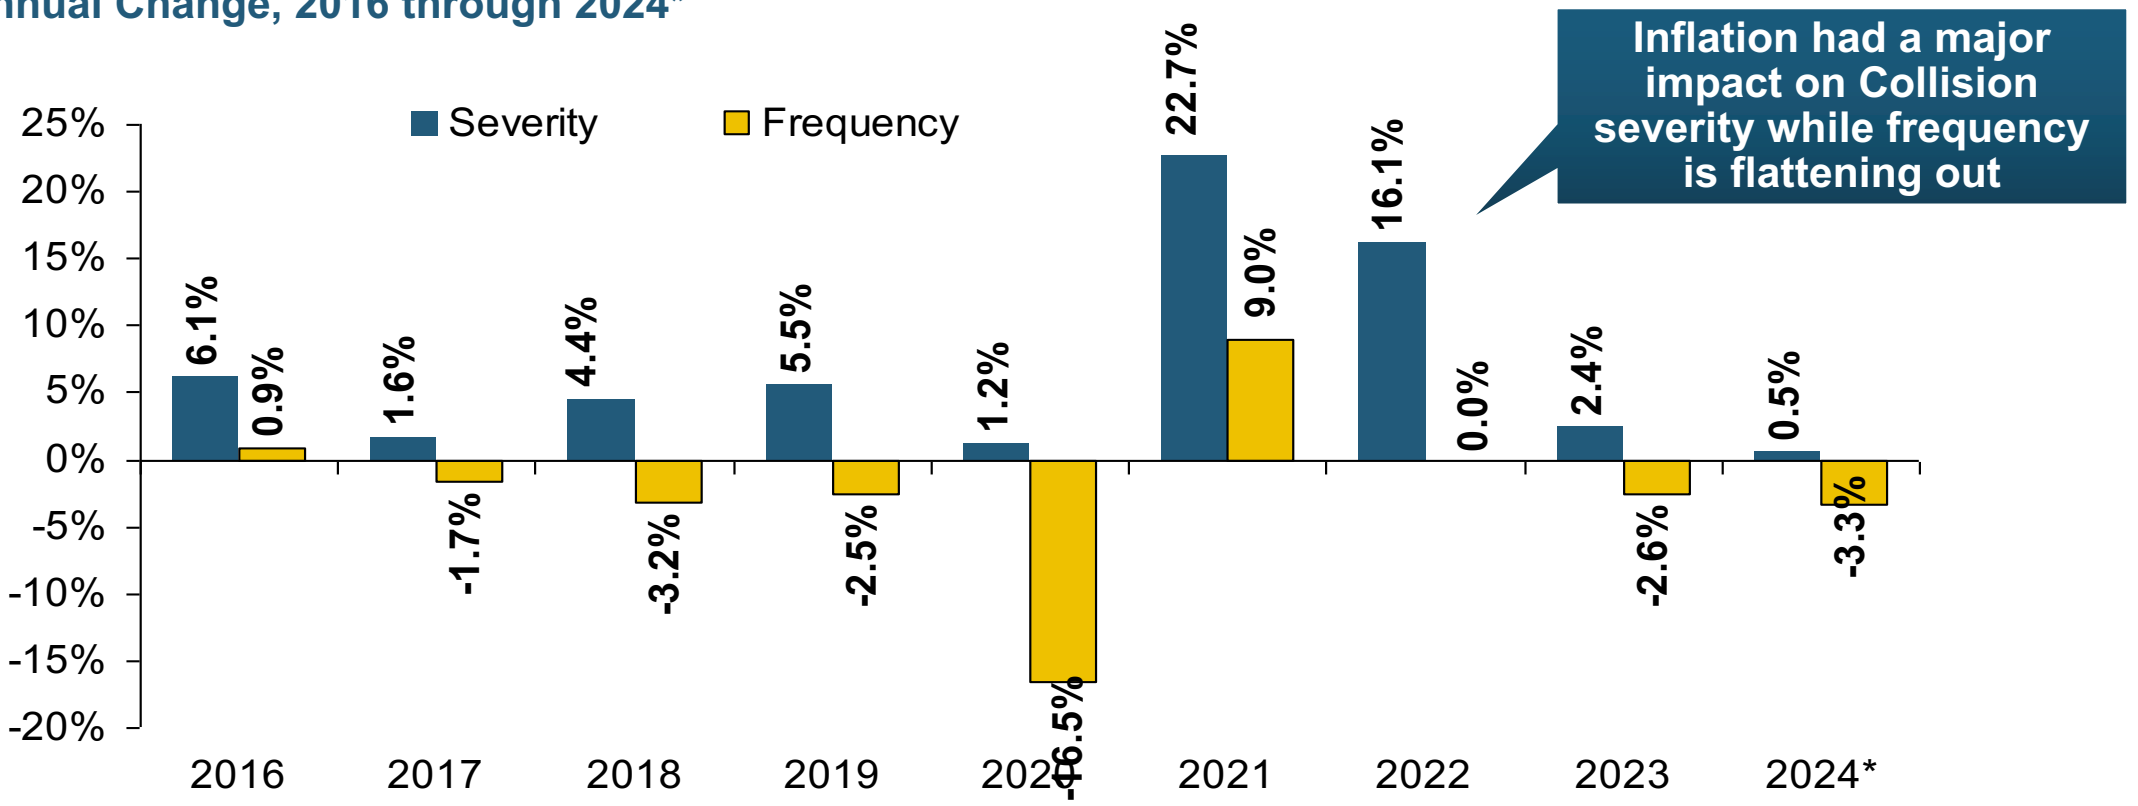
PD Severity Continued to Rise Throughout and After the Pandemic. Frequency Is Flat

*2024 data are for the 4 quarters ending March 31, 2024.

Source: ISO/PCI *Fast Track* data; Risk and Uncertainty Management Center, University of South Carolina.

South Carolina Personal Auto: Severity Trended Sharply Upward but Is Now Flattening Out*

Annual Change, 2016 through 2024*



Inflation had a major impact on Collision severity while frequency is flattening out

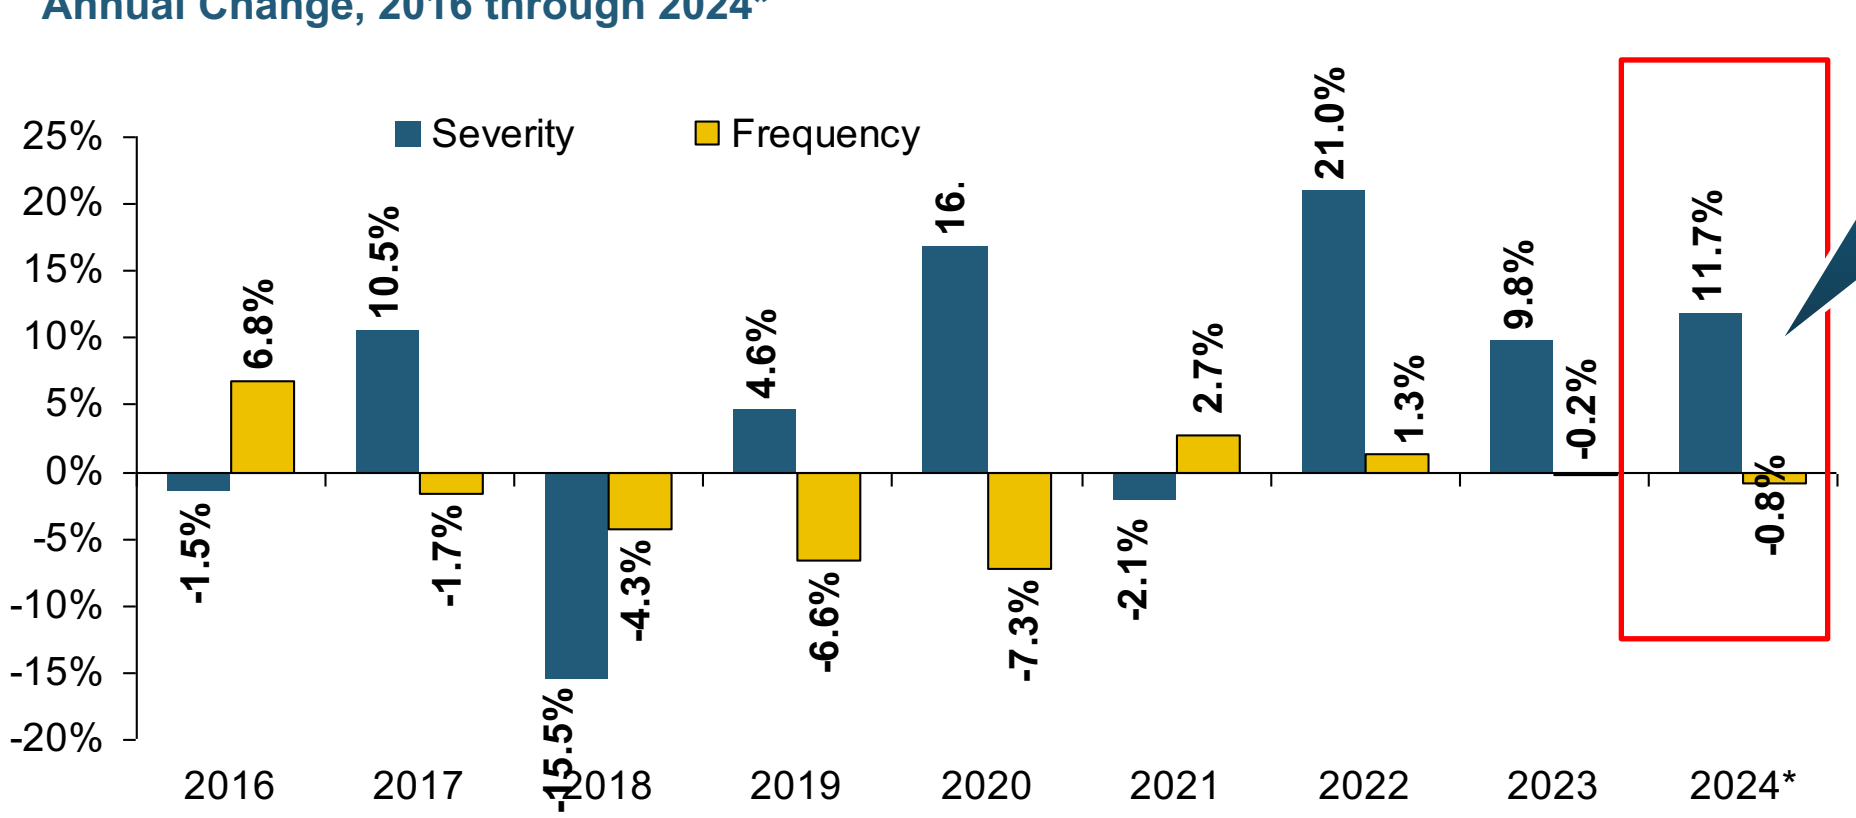
Adverse Frequency and Severity Trends Are Pushing SC's Personal Auto Loss Ratio Up Sharply

*2024 data are for the 4 quarters ending March 31, 2024.

Source: ISO/PCI *Fast Track* data; Risk and Uncertainty Management Center, University of South Carolina.

South Carolina: Comprehensive Claim Severity Trend Remains Strong*

Annual Change, 2016 through 2024*



Comprehensive severities are up sharply (party due to inflation) while frequency has stabilized

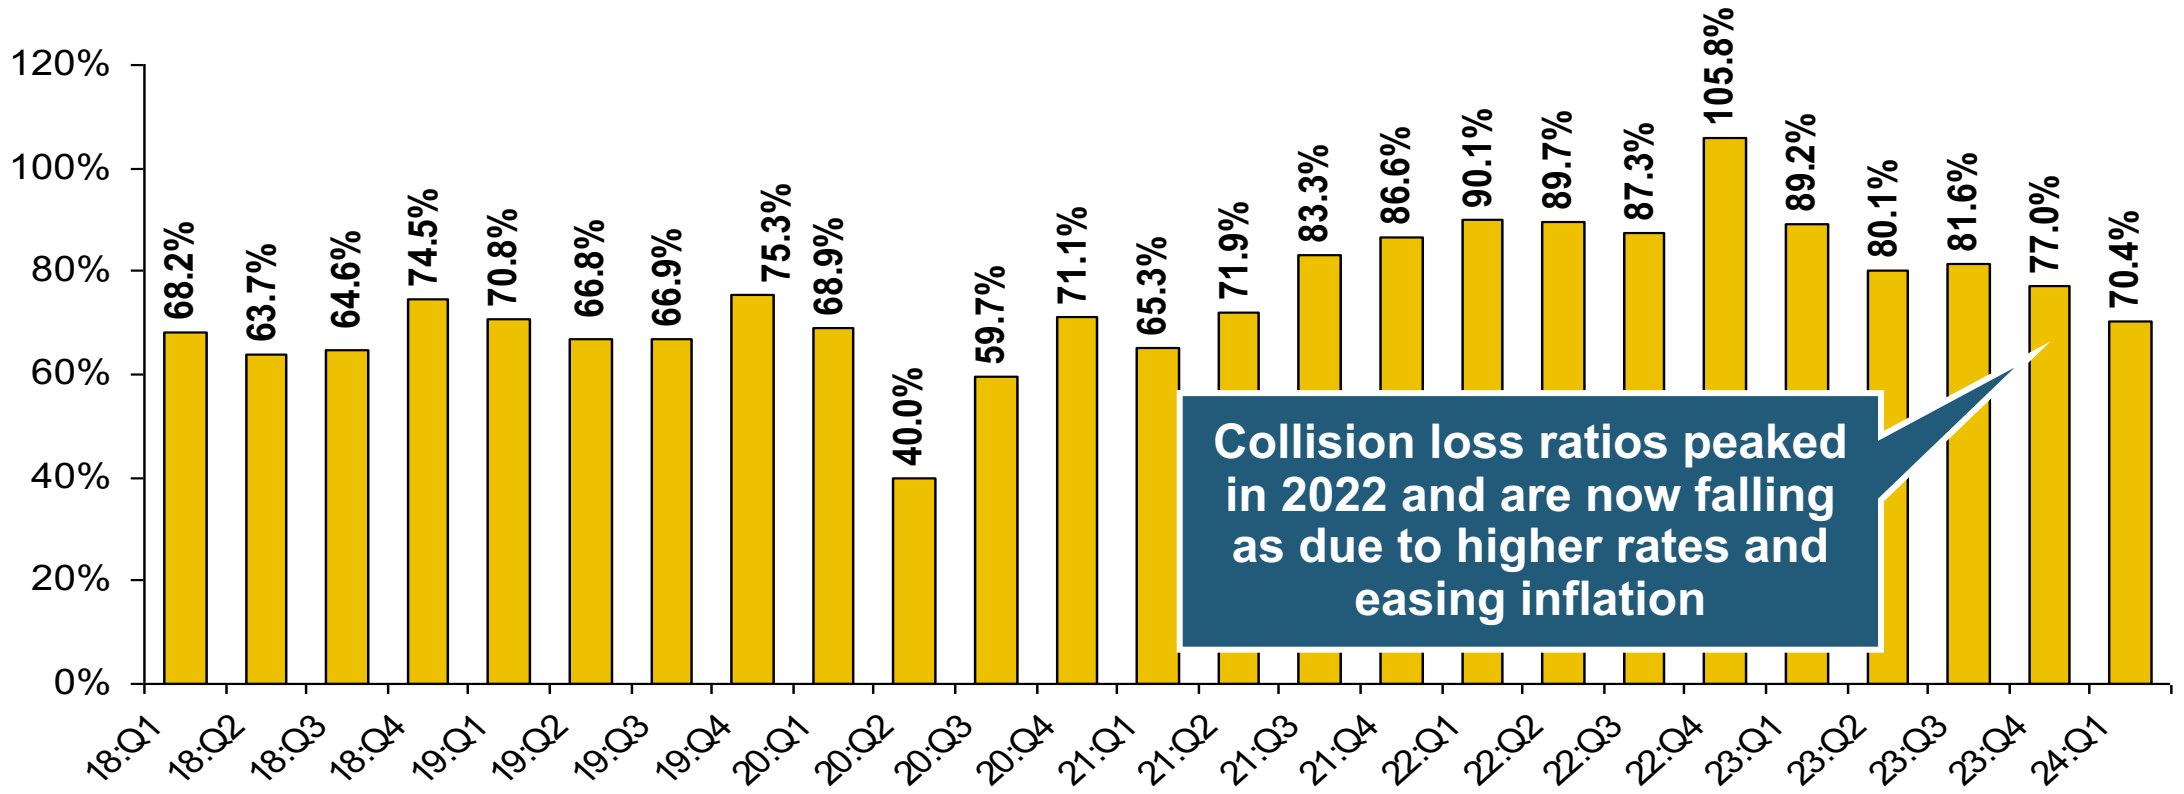
Collision Claim Frequency Is Volatile and Usually Most Impacted by Weather Impacts

*2024 data are for the 4 quarters ending March 31, 2024.

Source: ISO/PCI *Fast Track* data; Risk and Uncertainty Management Center, University of South Carolina.

SC Collision Loss Ratio: Up Sharply but Now Easing, 2018:Q1 – 2024:Q1

Paid Claim Frequency, 2018:Q1 through 2024:Q1



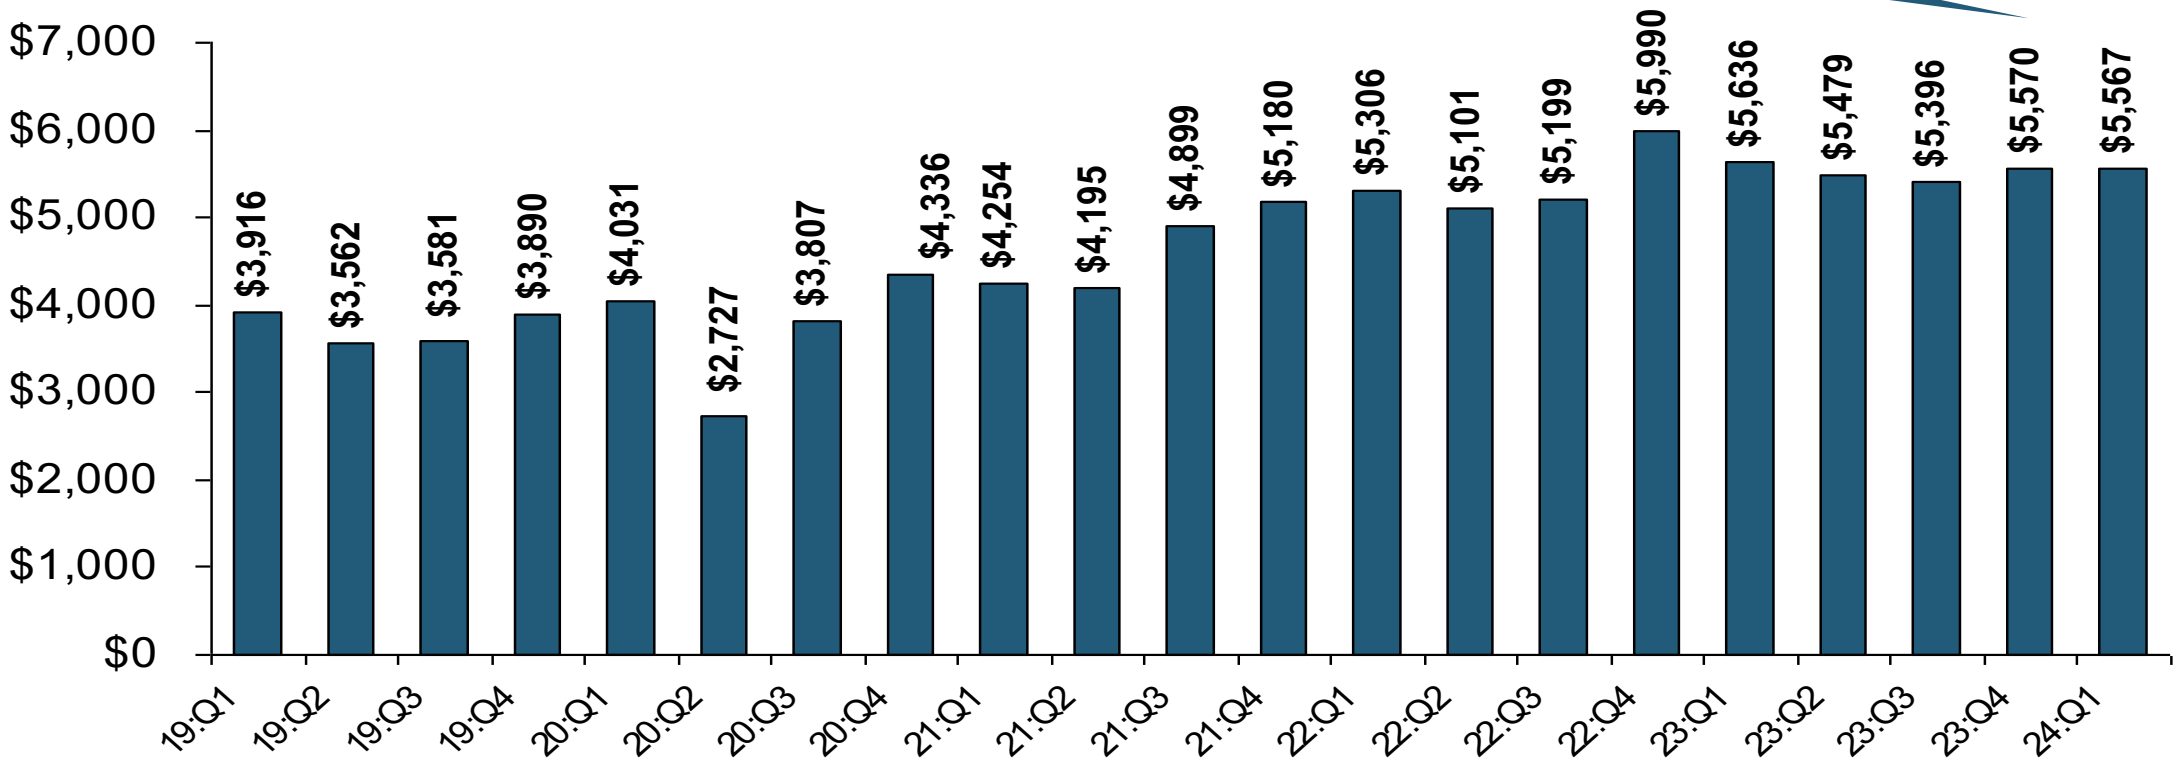
Collision Loss Ratios Peaked in Late 2022

Source: ISO/PCI *Fast Track* data; Center for Risk and Uncertainty Management, Univ. of South Carolina.

SC Collision Claim Severity: Rising to New Highs

Average Loss, 2019:Q1 through 2024:Q1

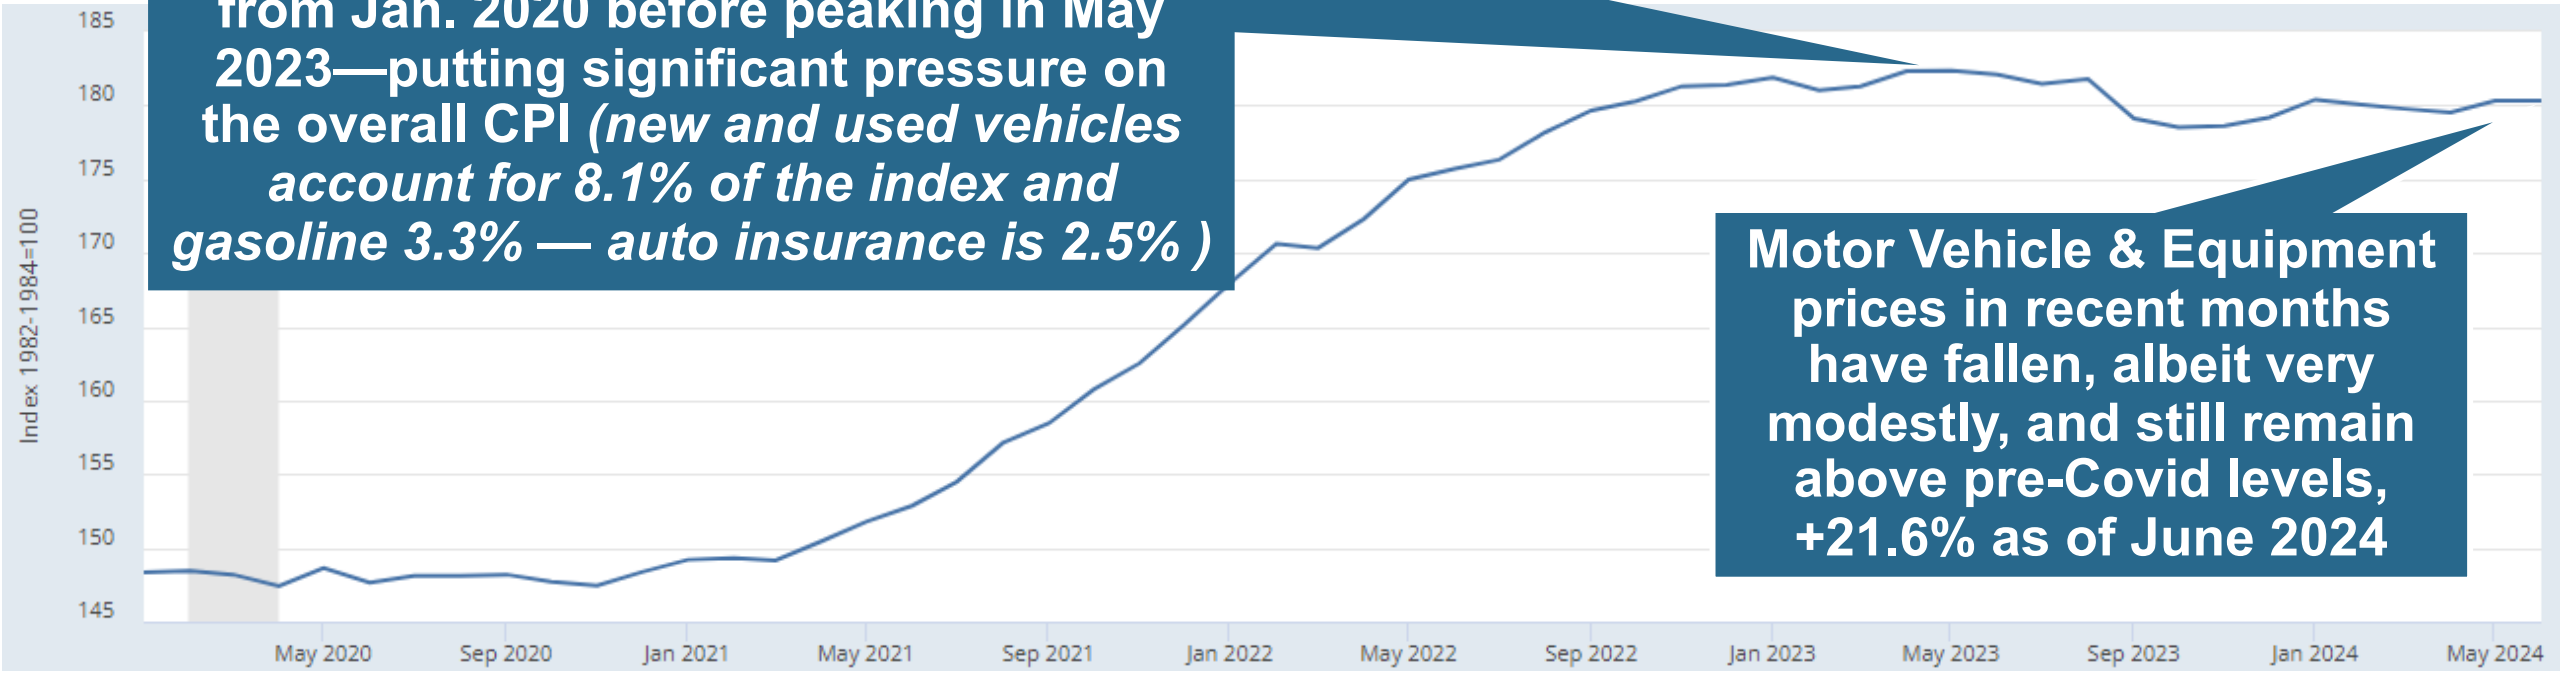
Collision claim severity remains near record highs, up 47% from full-year 2019



Severities Are Up Sharply—Inflation Is a Major Factor

Source: ISO/PCI *Fast Track* data; Center for Risk and Uncertainty Management, Univ. of South Carolina.

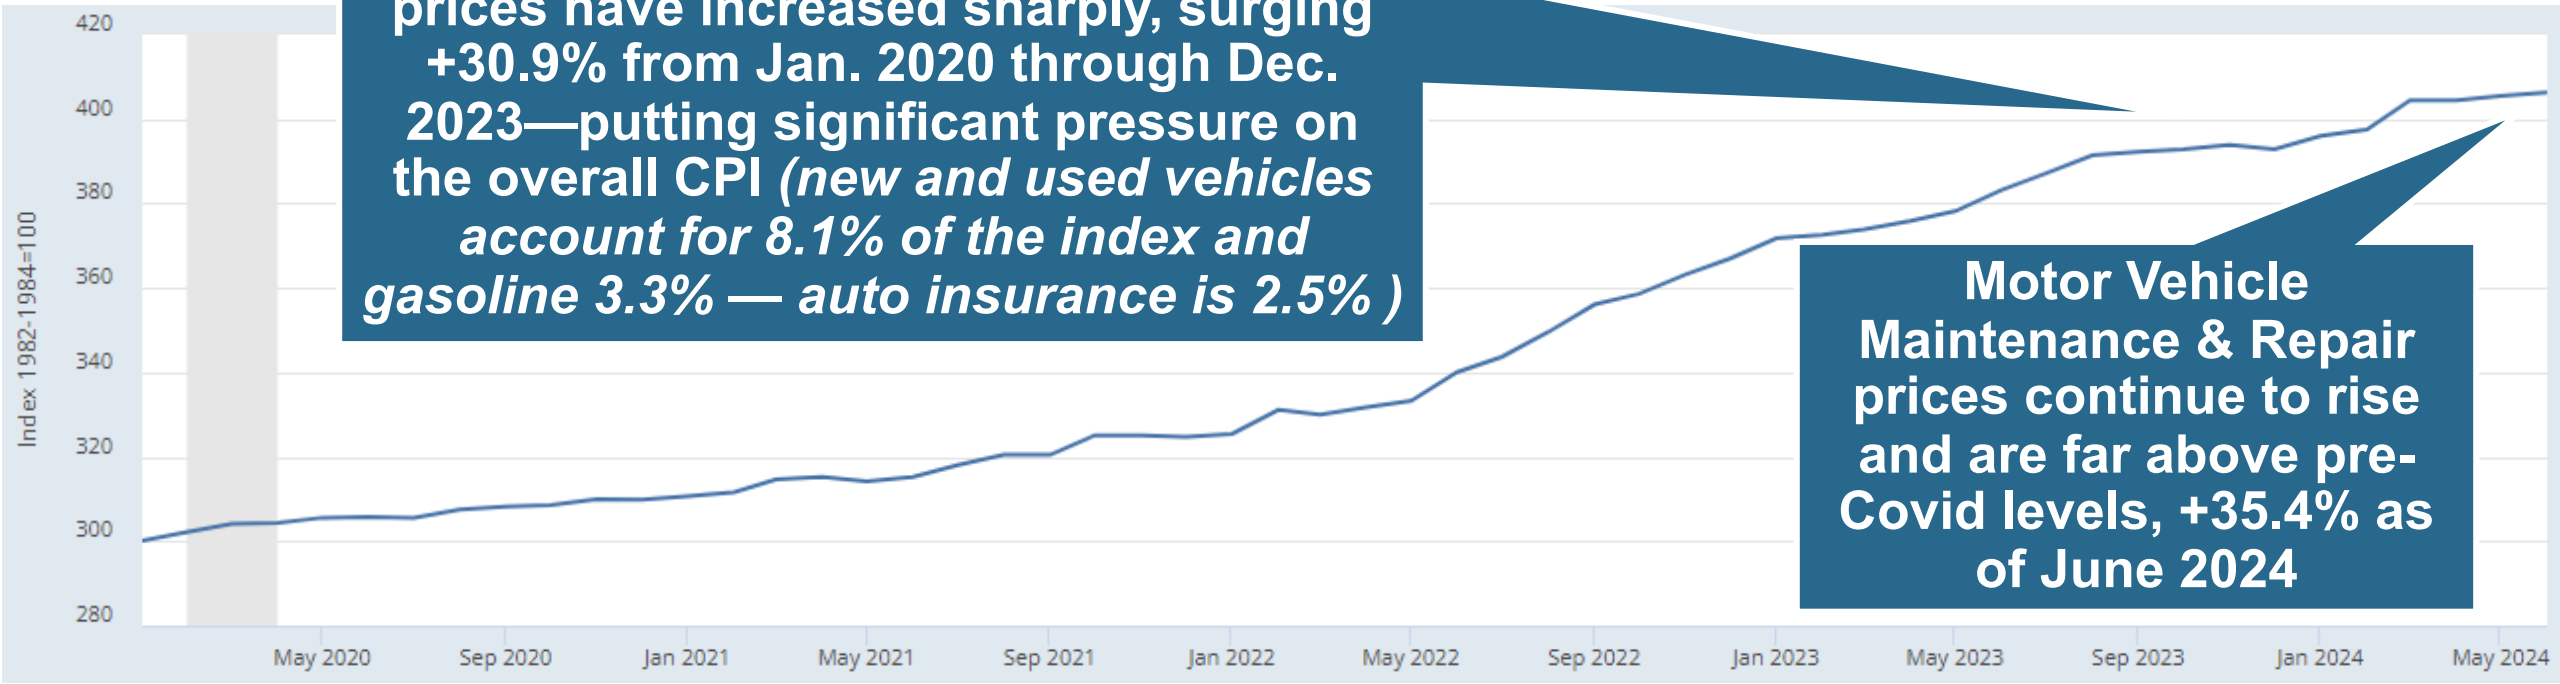
Price Index Changes for Motor Vehicle Parts & Equipment, Jan. 2020 – June 2024



Sources: US Bureau of Labor Statistics: https://fred.stlouisfed.org/series/CUUR0000SETC; Risk and Uncertainty Management Center, University of South Carolina.

Price Index Changes for Motor Vehicle Maintenance & Repair, Jan. 2020 – June 2024

Motor Vehicle Maintenance & Repair prices have increased sharply, surging +30.9% from Jan. 2020 through Dec. 2023—putting significant pressure on the overall CPI *(new and used vehicles account for 8.1% of the index and gasoline 3.3% — auto insurance is 2.5%)*



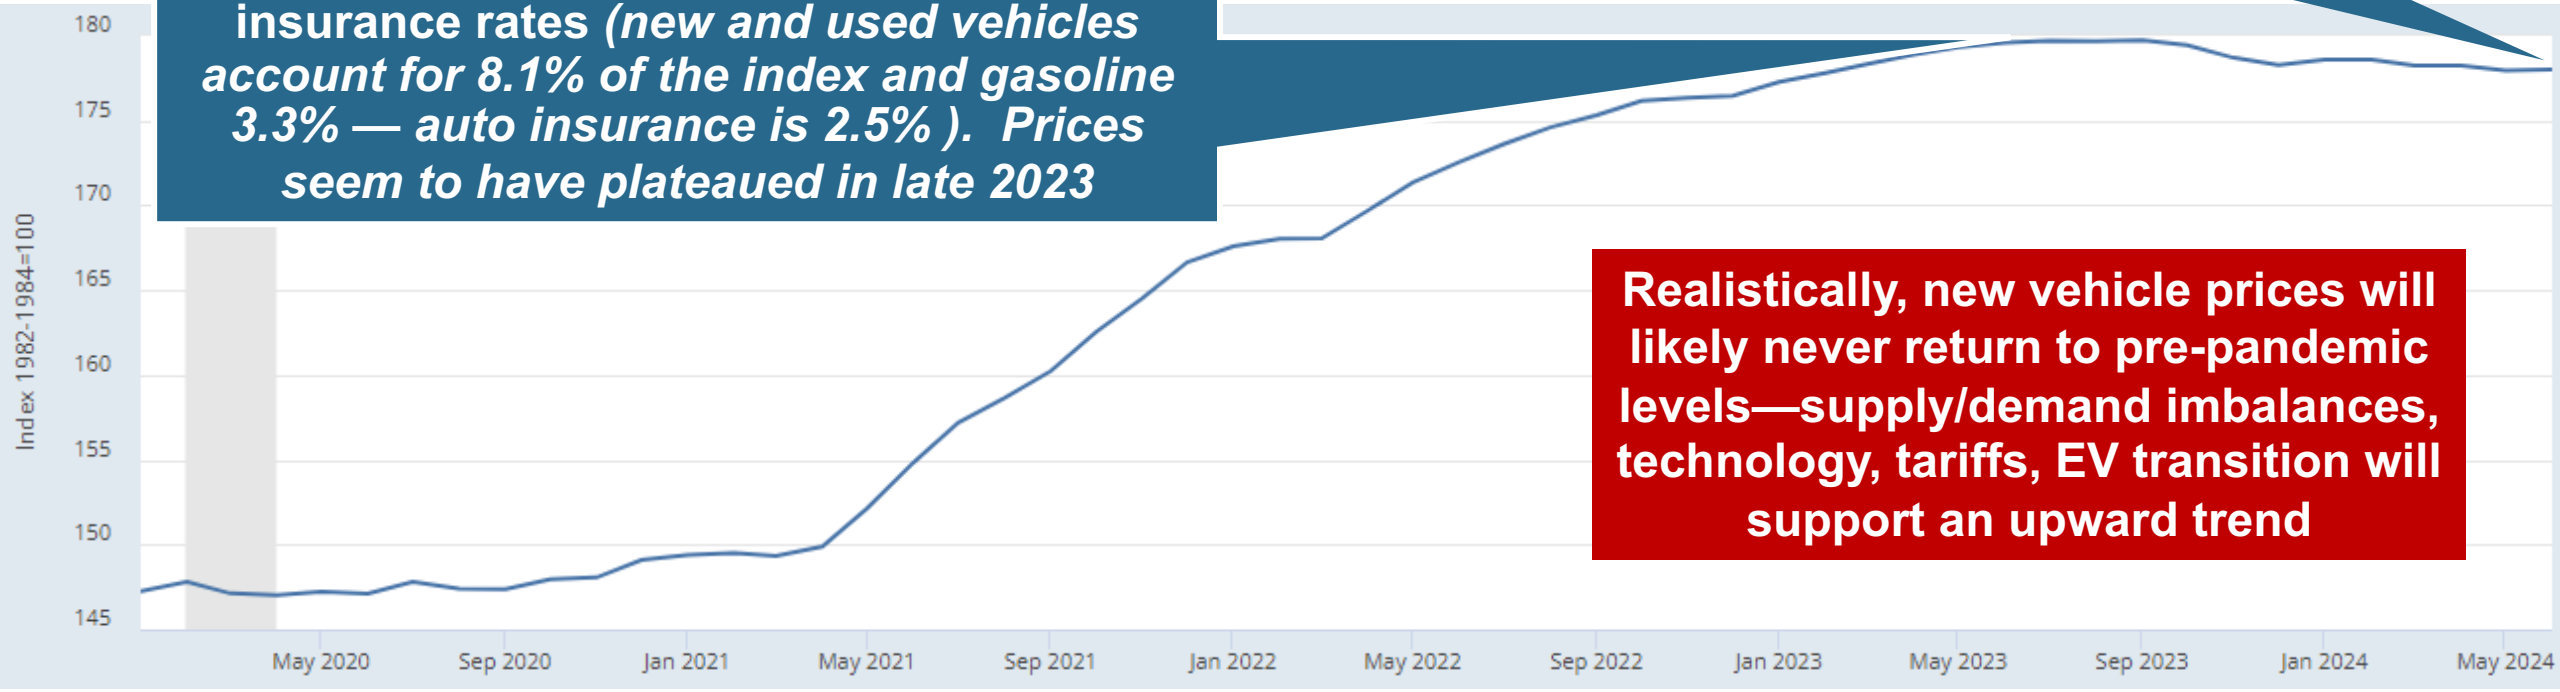
Motor Vehicle Maintenance & Repair prices continue to rise and are far above pre-Covid levels, +35.4% as of June 2024

Sources: US Bureau of Labor Statistics; Risk and Uncertainty Management Center: https://fred.stlouisfed.org/series/CUSR0000SETD; University of South Carolina.

Price Index for New Vehicles, Jan. 2020 – June 2024

New vehicle prices surged during and after the pandemic, +22.1% from Jan. 2020 to Sept. 2023 (peak), putting significant pressure on the overall CPI and auto insurance rates *(new and used vehicles account for 8.1% of the index and gasoline 3.3% — auto insurance is 2.5%). Prices seem to have plateaued in late 2023*

New car prices in recent months have begun to fall, but only slightly and still remain well above pre-Covid levels, +20.9% as of June 2024



Realistically, new vehicle prices will likely never return to pre-pandemic levels—supply/demand imbalances, technology, tariffs, EV transition will support an upward trend

Sources: US Bureau of Labor Statistics; Risk and Uncertainty Management Center: https://fred.stlouisfed.org/series/CUUR0000SETA01; University of South Carolina.

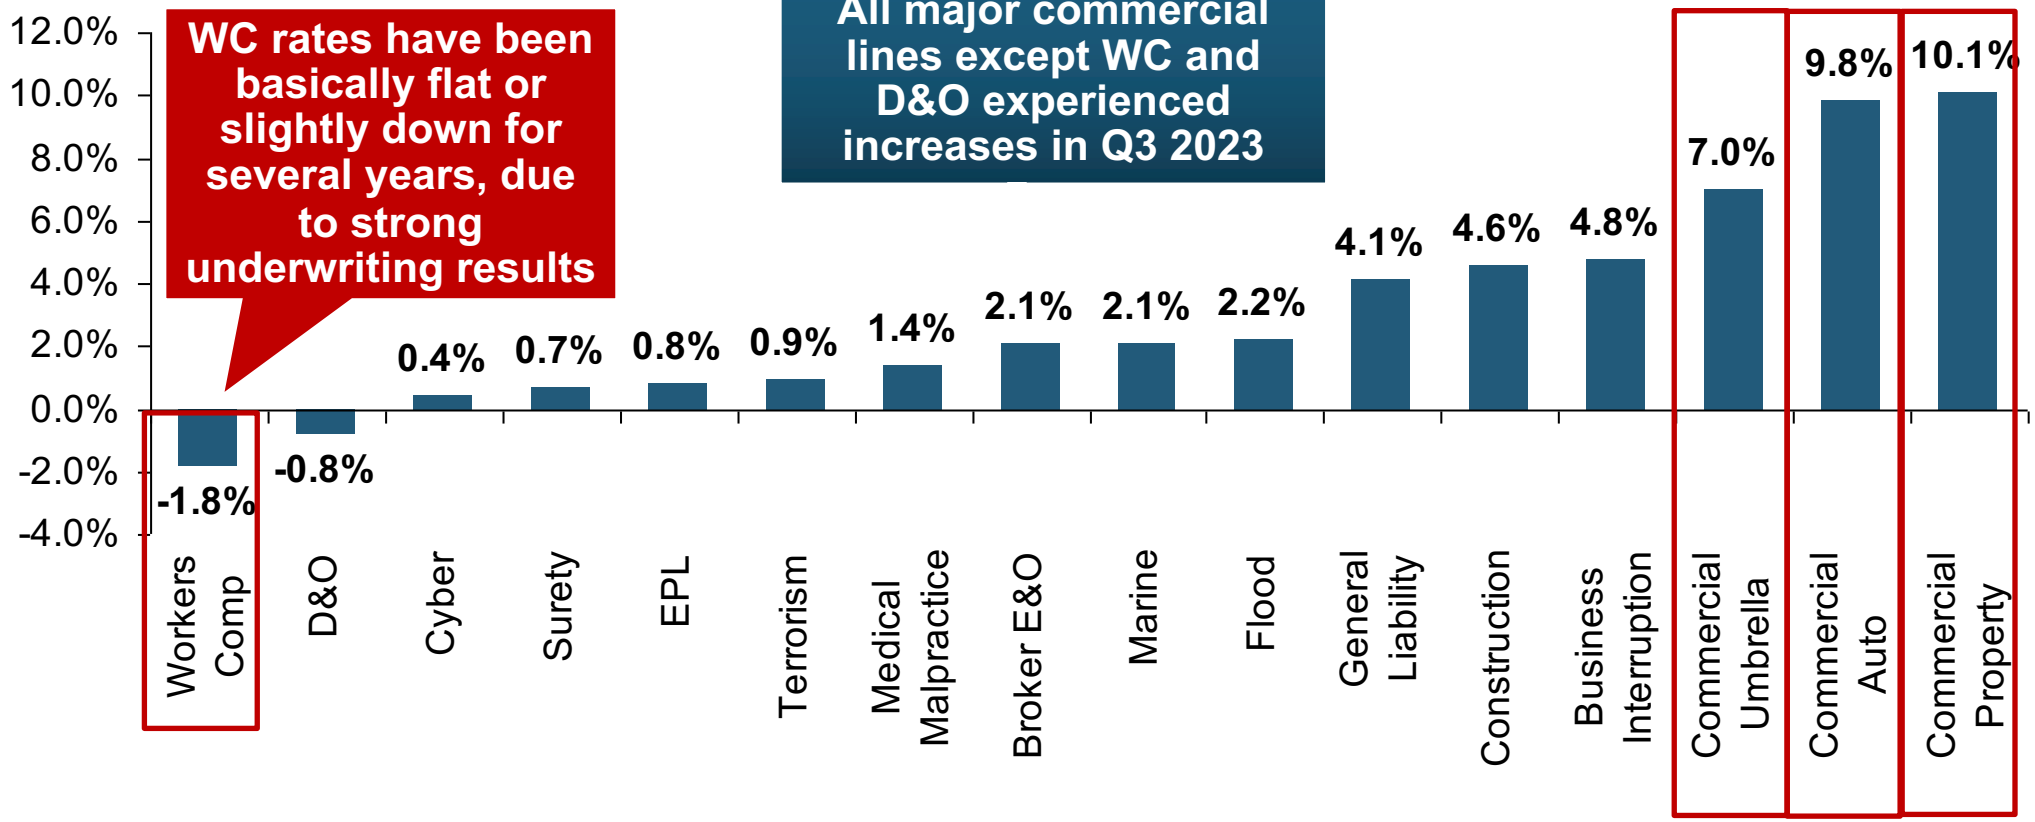
Note: CIAB data cited here are based on a survey. Rate changes earned by individual insurers can and do vary, potentially substantially.
Source: Council of Insurance Agents & Brokers; Center for Risk and Uncertainty Management, Univ. of South Carolina.

Change in Commercial Rate Renewals, by Line: 2024:Q1

Commercial Property is experiencing sharp increases due to high CAT losses, inflation and expensive reinsurance. Commercial Auto and Umbrella are impacted by legal system abuse/social inflation

(Percent Change)



Note: CIAB data cited here are based on a survey. Rate changes earned by individual insurers can and do vary, potentially substantially.

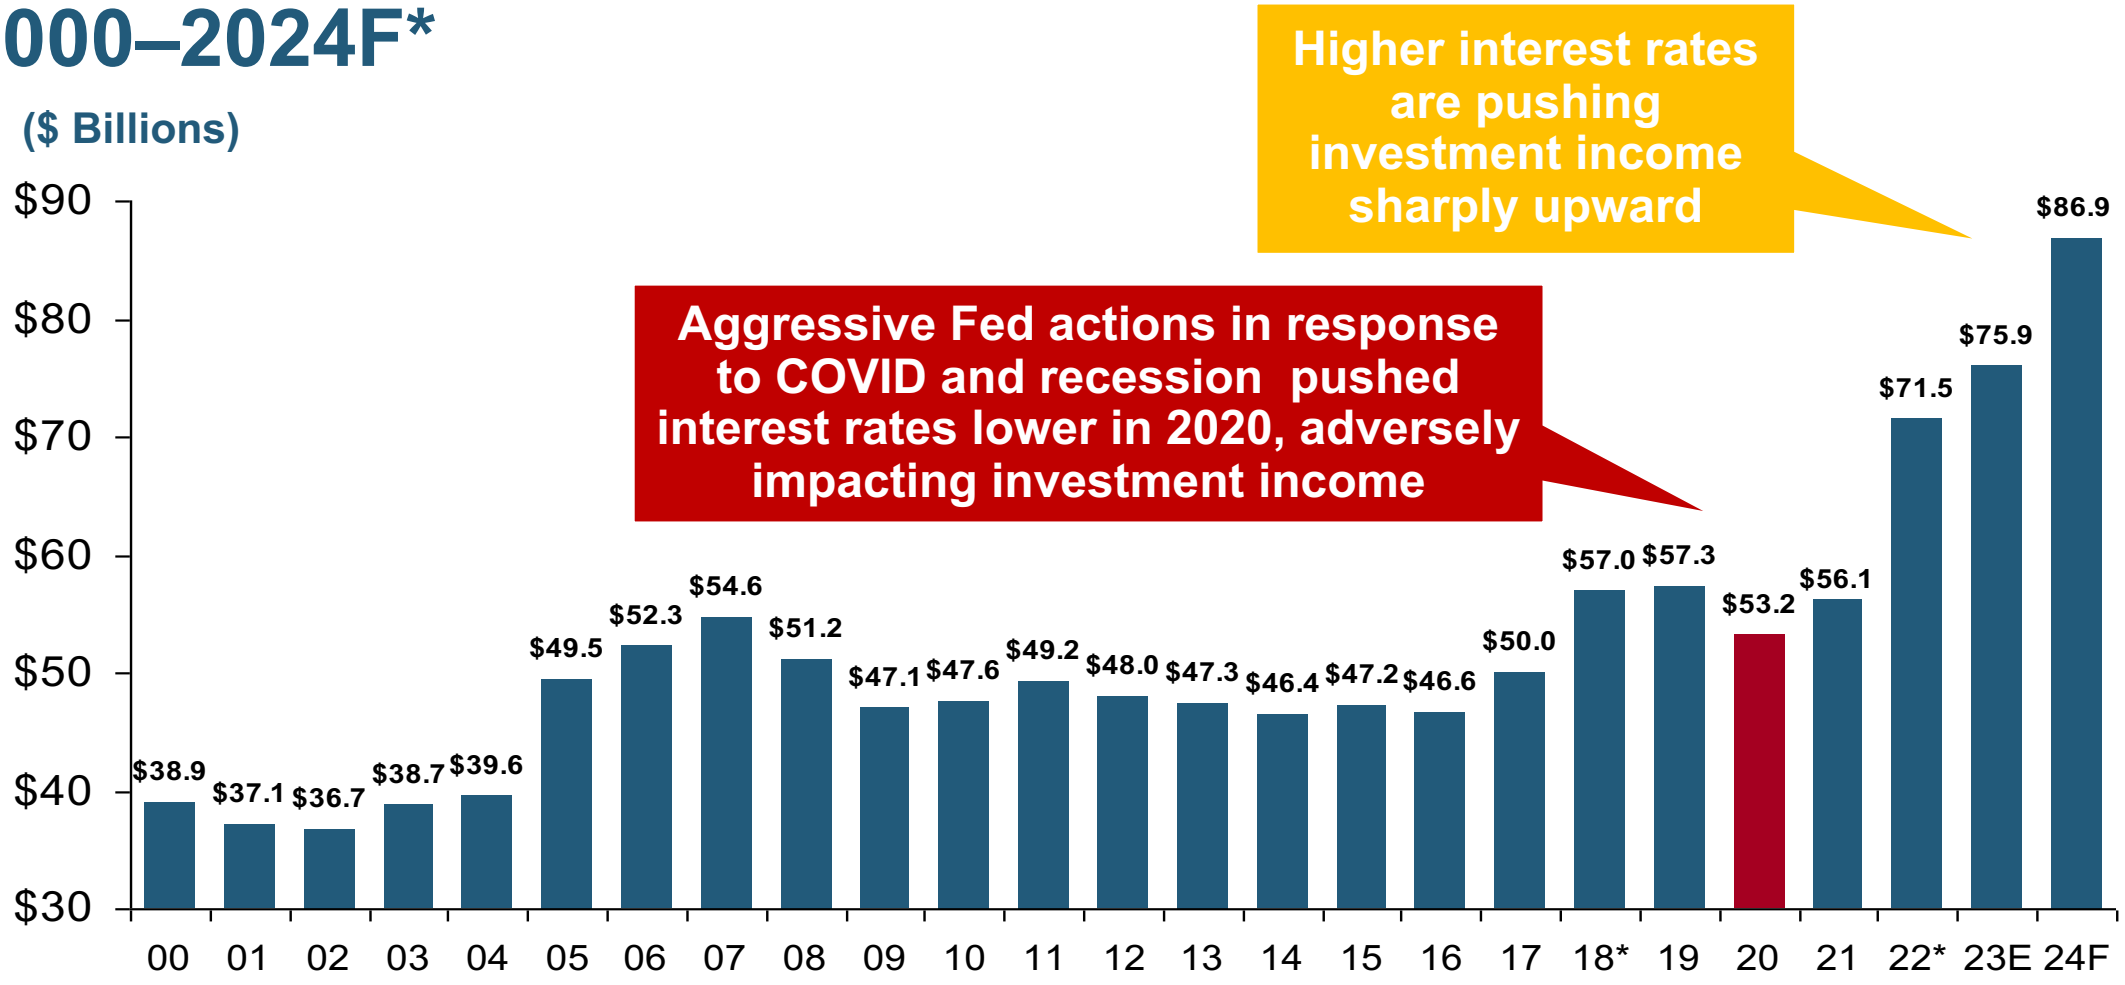
Source: Council of Insurance Agents and Brokers; USC Center for Risk and Uncertainty Management.

Investments:
Wall Street's Wild Ride Continues

Investment Performance Is a Key Driver of Insurer Profitability

How Has the Hawkish Fed Impacted Insurer Portfolios?

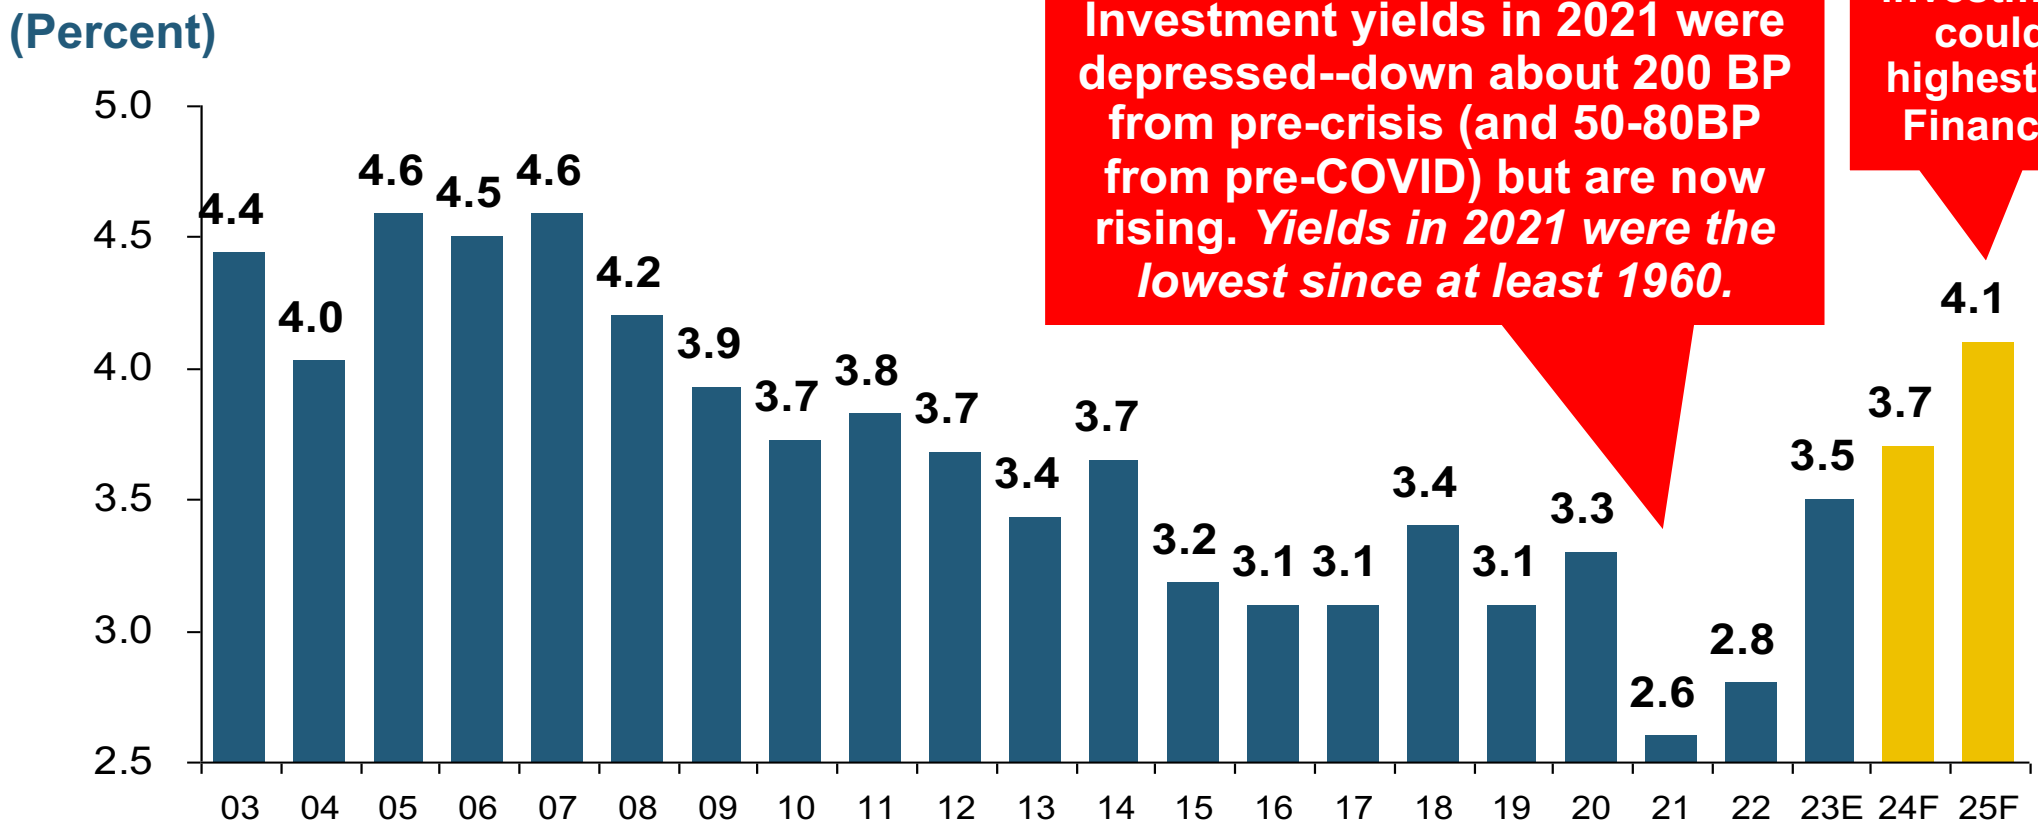
Property/Casualty Insurance Industry Investment Income: 2000–2024F*



Due to persistently low interest rates, investment income remained below pre-crisis levels for a decade. Lower interest rates during COVID drove investment income down once again. Fed rate hikes in 2022-23 are reversing this trend.

* 2018-19 figures are distorted by provisions of the TCJA of 2017. Increase reflects such items as dividends from foreign subsidiaries.
**2022 figure includes a $10.8B intercompany distribution by a large reinsurer that flowed through NII.
[1] Investment gains consist primarily of interest and stock dividends. Sources: A.M. Best Review & Preview (March 2024); ISO; University of South Carolina, Center for Risk and Uncertainty Management.

Net Investment Yield on Property/Casualty Insurance Invested Assets, 2007–2025F



Investment yields in 2021 were depressed--down about 200 BP from pre-crisis (and 50-80BP from pre-COVID) but are now rising. *Yields in 2021 were the lowest since at least 1960.*

By 2025, investment yields could be the highest since the Financial Crisis

The yield on invested assets remains depressed relative to pre-financial crisis and pre-COVID yields. Fed rate hikes in 2022-23 are lifting yields and investment income.

Average: 1960-2019 = 4.9%
Low: 2.8% (1961)
High: 8.2% (1984/85)

Sources: NAIC data, sourced from S&P Global Market Intelligence; 2017-19 figures are from ISO. 2020-22 data from APCIA. 2023E-25FP from Swiss Re (Jan. 2024). Risk and Uncertainty Management Center, Univ. of South Carolina.

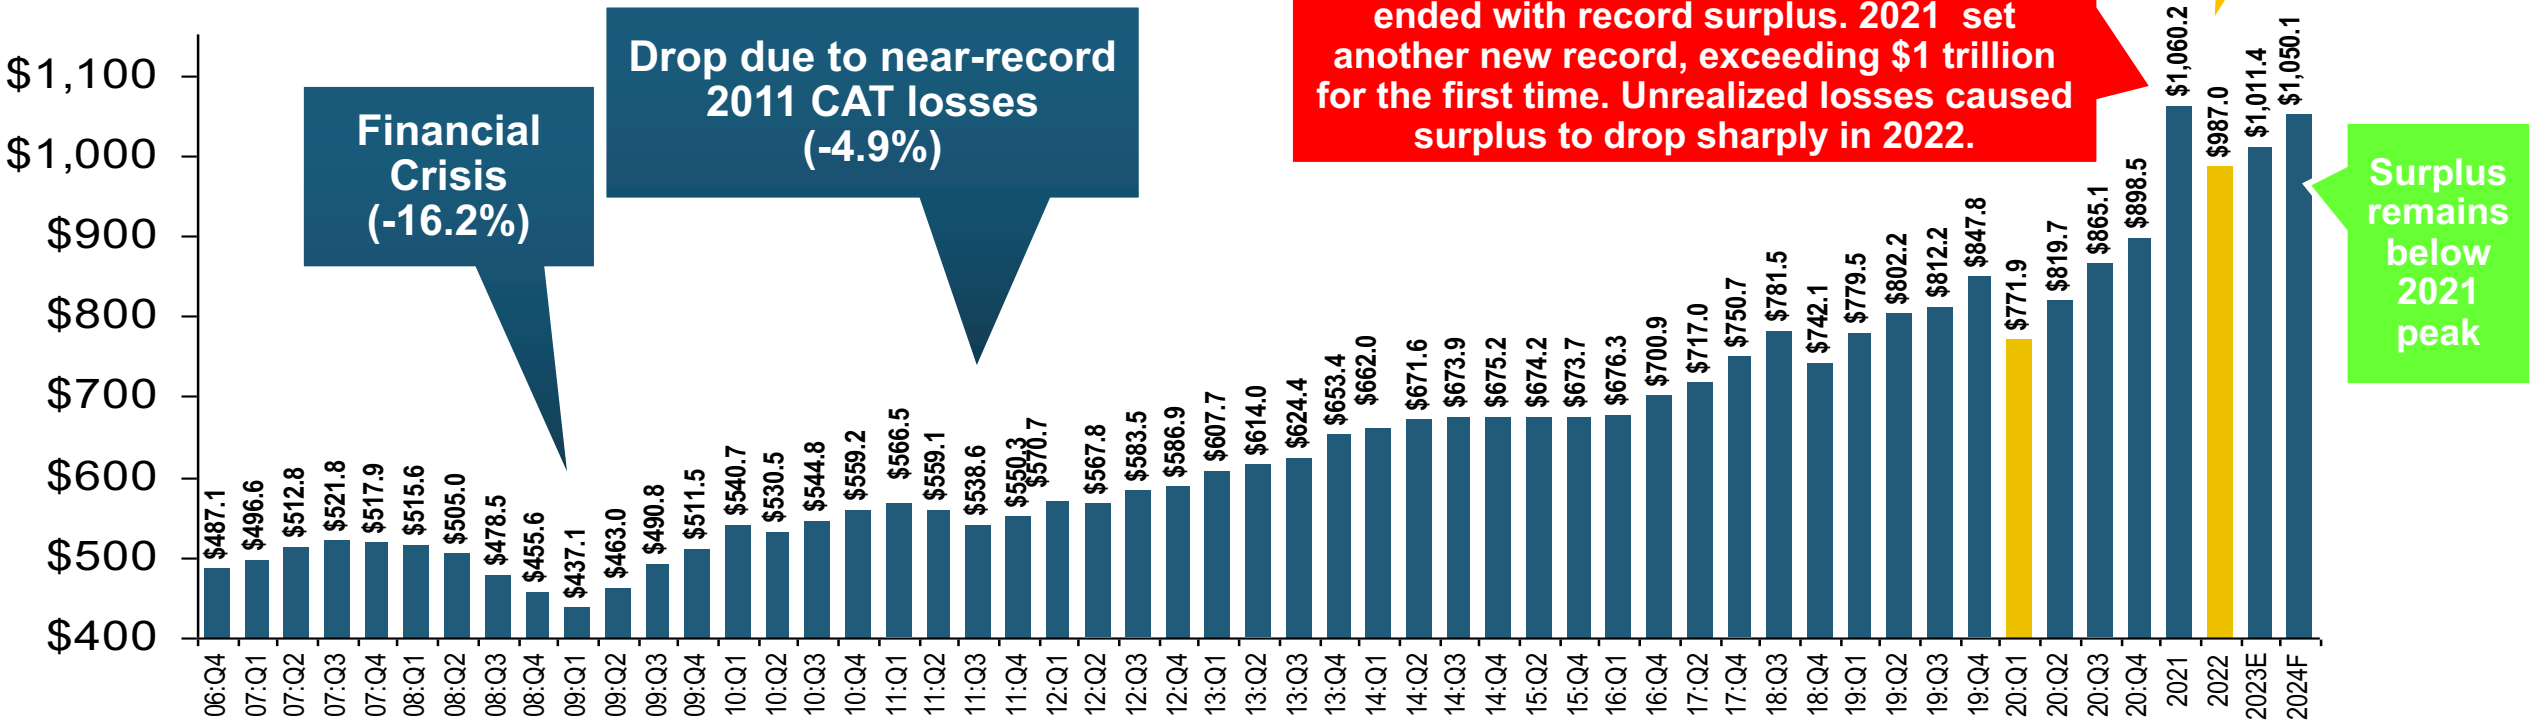
Capital and Capacity

P/C Insurance: Capitalized Crunch?

Will Industry Capacity Recover?

Policyholder Surplus (Capacity), 2006:Q4 – 2024F

($ Billions)

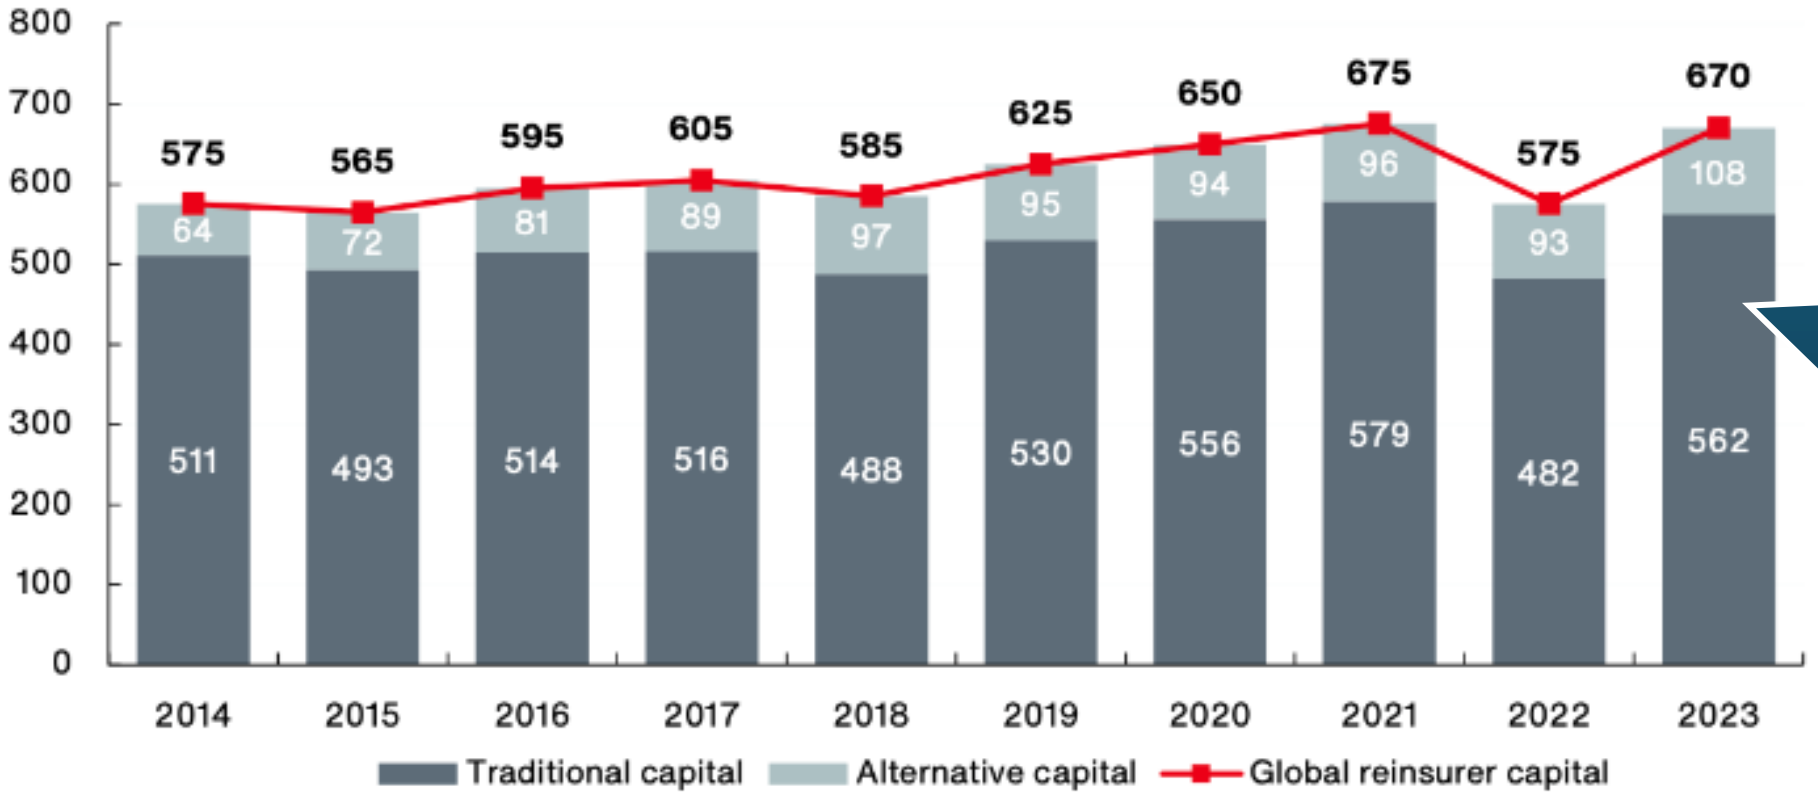


Policyholder Surplus is the industry's financial cushion against large insured events, periods of economic stress and financial market volatility. It is also a source of capital to underwrite new risks.

Sources: ISO, A.M. Best, NAIC. Risk and Uncertainty Management Center, University of South Carolina.

Global Reinsurance Capital, 2013 – 2023

$ Billions



Global reinsurance capital fell by $80B or 14.8% in 2022, contributing to today's property insurance challenges. Most of that capital was recovered in 2023—with ILS playing a key role

SUMMARY

- **The P/C Insurance Industry Remains Strong, Stable, Sound and Secure**
  - **Auto lines, property and reinsurance segments are stressed but not impaired**
  - **Continued migration toward E&S markets**
- **Odds of a "Soft Landing" Are Increasing; Recession in 2024/25 Unlikely**
- **Asset Price Volatility Will Persist as Inflation Uncertainty**
- **Higher Interest Rates Provide a Modest Tailwind for Investment Income**
- **Inflationary Pressures Are Subsiding**
- **Loss Cost Challenges Remain but Should Slowly Ease in 2024—Inflation, Supply Chain, etc.**
- **Legal System Abuse Issues Remain a Long-Term Challenge and Major Cost Driver**
